Civil Engineering Database Subject Heading Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1970. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2004 from a CEDB subject heading list. The CEDB and subject heading list can be accessed on the Web at *http://www.pubs.asce.org/cedbsrch.html*.

Acceleration
Effects of Site Classes on Damping Reduction Factors. — Yu-Yuan Lin and Kuo-Chung Chang; 130(11), 1667-75 (2004).

Acceptability
Socioeconomic Implications of Life Quality Index in Design of Optimum Structures to Withstand Earthquakes. — Mauricio Sánchez-Silva and Rüdiger Rackwitz; 130(6), 969-77 (2004).

Active control
Hybrid Feedback-Least Mean Square Algorithm for Structural Control. — Hongjin Kim and Hojjat Adeli; 130(1), 120-7 (2004).
Wavelet-Hybrid Feedback-Least Mean Square Algorithm for Robust Control of Structures. — Hojjat Adeli and Hongjin Kim; 130(1), 128-37 (2004).

Aerodynamics
Efficacy of the Implied Approximation in the Identification of Flutter Derivatives. — Xinzhong Chen and Ahsan Kareem; 130(12), 2070-4 (2004).

Airport runways
Finite Element Analysis Simulation of Airport Approach Lighting Towers. — D. G. Zimcik, M. Nejad Ensan, S. T. Jenq, and M. C. Chao; 130(5), 805-11 (2004).

Algorithms
Application of the Improved Immune Algorithm to Structural Design Support System. — Ayaho Miyamoto, Hideaki Nakamura, and Leopold Kruszka; 130(1), 108-19 (2004).

Aluminum
Design of I Beams and Deck Profiles under Concentrated Loading. — Tore Tryland, Per K. Larsen, and Magnus Langseth; 130(3), 411-22 (2004).

Analytical techniques
Simplified Nonlinear Analysis of Strengthened Concrete Beams Based on a Rigorous Approach. — Hayder A. Rasheed, Hasan Charkas, and Hani Melhem; 130(7), 1087-96 (2004).
Analytical Approach to Failure Surfaces in Reinforced Concrete Sections Subjected to Axial Loads and Biaxial Bending. — J. L. Bonet, P. F. Miguel, M. A. Fernandez, and M. L. Romero; 130(12), 2006-15 (2004).

Angle section
Biaxial Bending of Steel Angle Section Beams. — N. S. Trahair; 130(4), 554-61 (2004).

Australia
Compression Tests of Cold-Reduced High Strength Steel Sections. I: Stub Columns. — Demao Yang and Gregory J. Hancock; 130(11), 1772-81 (2004).
Compression Tests of Cold-Reduced High Strength Steel Sections. II: Long Columns. — Demao Yang, Gregory J. Hancock, and Kim J. R. Rasmussen; 130(11), 1782-9 (2004).
Self-Drilling Screw Joints for Cold-Formed Channel Portal Frames. — Julie Mills and Roger LaBoube; 130(11), 1799-806 (2004).

Axial compression
Concrete-Filled Steel Tubes Subjected to Axial Compression and Lateral Cyclic Loads. — Amir Fam, Frank S. Qie, and Sami Rizkalla; 130(4), 631-40 (2004).
Computer Modeling of Restrained Reinforced Concrete Slabs in Fire Conditions. — Linus Lim, Andrew Buchanan, Peter Moss, and Jean-Marc Franssen; 130(12), 1964-71 (2004).

Axial forces
Plastic Interaction Relationships for Square Hollow Structural Sections: Lower Bound Solution. — Magdi Mohareb and Istemi F. Ozkan; 130(9), 1381-91 (2004).

Axial loads
Postbuckling Behavior of Axially Restrained and Axially Loaded Steel Columns under Fire Conditions. — Y. C. Wang; 130(3), 371-80 (2004).
Fatigue Performance of Cracked Tubular T Joints under Combined Loads. I: Experimental. — Sing-Ping Chiew, Seng-Tjhen Lie, Chi-King Lee, and Zhi-Wei Huang; 130(4), 562-71 (2004).
Fatigue Performance of Cracked Tubular T Joints under Combined Loads. II: Numerical. — Seng-Tjhen Lie, Sing-Ping Chiew, Chi-King Lee, and Zhi-Wei Huang; 130(4), 572-81 (2004).
T-Cleat Connections to Concrete-Filled Tubular Internal Columns. — Abdel-Kareem Al-Rodan; 130(5), 725-31 (2004).
Elastic Stability of Planar Steel Frames with Unsymmetrical Beam Loading. — A. H. Salem, F. F. El Dib, M. El Aghoury, and M. T. Hanna; 130(11), 1852-9 (2004).

Axial tests
Buckling of Linear Structures above the Surface and/or Underground. — Sohrab Baghery; 130(11), 1748-55 (2004).

Bars
Compressive Strength of Solid Round Steel Bars. — Khaled Sennah and John Wahba; 130(1), 147-51 (2004).
Pre- and Postyield Finite Element Method Simulation of Bond of Ribbed Reinforcing Bars. — Hamed M. Salem and Koichi Maekawa; 130(4), 671-80 (2004).

Base isolation
Estimation of Seismic Demands on Isolators Based on Nonlinear Analysis. — Keri L. Ryan and Anil K. Chopra; 130(3), 392-402 (2004).
Behavior of Torsionally Coupled Structures with Variable Frequency Pendulum Isolator. — Pranesh Murnal and Ravi Sinha; 130(7), 1041-54 (2004).
Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. I: Experimental Study. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1119-32 (2004).
Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. II: Modeling. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1133-44 (2004).
Measurement Method for Continua by Image Processing. — Junji Yoshida, Masato Abe, Yozo Fujino, and Lewangamage Chamindalal Sujeewa; 130(8), 1145-56 (2004).

Beam columns
Steel Member Strength by Inelastic Lateral Buckling. — N. S. Trahair and G. J. Hancock; 130(1), 64-9 (2004).
Seismic Behavior and Design of High-Strength Square Concrete-Filled Steel Tube Beam Columns. — Amit H. Varma, James M. Ricles, Richard Sause, and Le-Wu Lu; 130(2), 169-79 (2004).
Behavior of Concrete-Filled Steel Tube Beam Columns. — Eiichi Inai, Akiyoshi Mukai, Makoto Kai, Hiroyoshi Tokinoya, Toshiyuki Fukumoto, and Koji Mori; 130(2), 189-202 (2004).
Brace-Beam-Column Connections for Concentrically Braced Frames with Concrete Filled Tube Columns. — Gregory MacRae, Charles W. Roeder, Chad Gunderson, and Yoshihiro Kimura; 130(2), 233-43 (2004).
Bidirectional Tests on Partially Restrained, Composite Beam-to-Column Connections. — Travis P. Green, Roberto T. Leon, and Gian A. Rassati; 130(2), 320-7 (2004).
Improved Truss Model for Design of Welded Steel Moment-Resisting Frame Connections. — Jaswant N. Arlekar and C. V. R. Murty; 130(3), 498-510 (2004).
Elastoplastic and Large Deflection Analysis of Steel Frames by One Element per Member. II: Three Hinges along Member. — Siu-Lai Chan and Zhi-Hua Zhou; 130(4), 545-53 (2004).
Experimental Study of Jumbo Size Reduced Beam Section Connections Using High-Strength Steel. — Sheng-Jin Chen and Chin-Te Tu; 130(4), 582-7 (2004).
Concrete-Filled Steel Tubes Subjected to Axial Compression and Lateral Cyclic Loads. — Amir Fam, Frank S. Qie, and Sami Rizkalla; 130(4), 631-40 (2004).
Steel Beam-Column Connections Using Shape Memory Alloys. — Justin Ocel, Reginald Des-

Civil Engineering Database Subject Heading Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1970. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2004 from a CEDB subject heading list. The CEDB and subject heading list can be accessed on the Web at *http://www.pubs.asce.org/cedbsrch.html*.

Acceleration
Effects of Site Classes on Damping Reduction Factors. — Yu-Yuan Lin and Kuo-Chung Chang; 130(11), 1667-75 (2004).

Acceptability
Socioeconomic Implications of Life Quality Index in Design of Optimum Structures to Withstand Earthquakes. — Mauricio Sánchez-Silva and Rüdiger Rackwitz; 130(6), 969-77 (2004).

Active control
Hybrid Feedback-Least Mean Square Algorithm for Structural Control. — Hongjin Kim and Hojjat Adeli; 130(1), 120-7 (2004).
Wavelet-Hybrid Feedback-Least Mean Square Algorithm for Robust Control of Structures. — Hojjat Adeli and Hongjin Kim; 130(1), 128-37 (2004).

Aerodynamics
Efficacy of the Implied Approximation in the Identification of Flutter Derivatives. — Xinzhong Chen and Ahsan Kareem; 130(12), 2070-4 (2004).

Airport runways
Finite Element Analysis Simulation of Airport Approach Lighting Towers. — D. G. Zimcik, M. Nejad Ensan, S. T. Jenq, and M. C. Chao; 130(5), 805-11 (2004).

Algorithms
Application of the Improved Immune Algorithm to Structural Design Support System. — Ayaho Miyamoto, Hideaki Nakamura, and Leopold Kruszka; 130(1), 108-19 (2004).

Aluminum
Design of I Beams and Deck Profiles under Concentrated Loading. — Tore Tryland, Per K. Larsen, and Magnus Langseth; 130(3), 411-22 (2004).

Analytical techniques
Simplified Nonlinear Analysis of Strengthened Concrete Beams Based on a Rigorous Approach. — Hayder A. Rasheed, Hasan Charkas, and Hani Melhem; 130(7), 1087-96 (2004).
Analytical Approach to Failure Surfaces in Reinforced Concrete Sections Subjected to Axial Loads and Biaxial Bending. — J. L. Bonet, P. F. Miguel, M. A. Fernandez, and M. L. Romero; 130(12), 2006-15 (2004).

Angle section
Biaxial Bending of Steel Angle Section Beams. — N. S. Trahair; 130(4), 554-61 (2004).

Australia
Compression Tests of Cold-Reduced High Strength Steel Sections. I: Stub Columns. — Demao Yang and Gregory J. Hancock; 130(11), 1772-81 (2004).
Compression Tests of Cold-Reduced High Strength Steel Sections. II: Long Columns. — Demao Yang, Gregory J. Hancock, and Kim J. R. Rasmussen; 130(11), 1782-9 (2004).
Self-Drilling Screw Joints for Cold-Formed Channel Portal Frames. — Julie Mills and Roger LaBoube; 130(11), 1799-806 (2004).

Axial compression
Concrete-Filled Steel Tubes Subjected to Axial Compression and Lateral Cyclic Loads. — Amir Fam, Frank S. Qie, and Sami Rizkalla; 130(4), 631-40 (2004).
Computer Modeling of Restrained Reinforced Concrete Slabs in Fire Conditions. — Linus Lim, Andrew Buchanan, Peter Moss, and Jean-Marc Franssen; 130(12), 1964-71 (2004).

Axial forces
Plastic Interaction Relationships for Square Hollow Structural Sections: Lower Bound Solution. — Magdi Mohareb and Istemi F. Ozkan; 130(9), 1381-91 (2004).

Axial loads
Postbuckling Behavior of Axially Restrained and Axially Loaded Steel Columns under Fire Conditions. — Y. C. Wang; 130(3), 371-80 (2004).
Fatigue Performance of Cracked Tubular T Joints under Combined Loads. I: Experimental. — Sing-Ping Chiew, Seng-Tjhen Lie, Chi-King Lee, and Zhi-Wei Huang; 130(4), 562-71 (2004).
Fatigue Performance of Cracked Tubular T Joints under Combined Loads. II: Numerical. — Seng-Tjhen Lie, Sing-Ping Chiew, Chi-King Lee, and Zhi-Wei Huang; 130(4), 572-81 (2004).
T-Cleat Connections to Concrete-Filled Tubular Internal Columns. — Abdel-Kareem Al-Rodan; 130(5), 725-31 (2004).
Elastic Stability of Planar Steel Frames with Unsymmetrical Beam Loading. — A. H. Salem, F. F. El Dib, M. El Aghoury, and M. T. Hanna; 130(11), 1852-9 (2004).

Axial tests
Buckling of Linear Structures above the Surface and/or Underground. — Sohrab Baghery; 130(11), 1748-55 (2004).

Bars
Compressive Strength of Solid Round Steel Bars. — Khaled Sennah and John Wahba; 130(1), 147-51 (2004).
Pre- and Postyield Finite Element Method Simulation of Bond of Ribbed Reinforcing Bars. — Hamed M. Salem and Koichi Maekawa; 130(4), 671-80 (2004).

Base isolation
Estimation of Seismic Demands on Isolators Based on Nonlinear Analysis. — Keri L. Ryan and Anil K. Chopra; 130(3), 392-402 (2004).
Behavior of Torsionally Coupled Structures with Variable Frequency Pendulum Isolator. — Pranesh Murnal and Ravi Sinha; 130(7), 1041-54 (2004).
Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. I: Experimental Study. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1119-32 (2004).
Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. II: Modeling. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1133-44 (2004).
Measurement Method for Continua by Image Processing. — Junji Yoshida, Masato Abe, Yozo Fujino, and Lewangamage Chamindalal Sujeewa; 130(8), 1145-56 (2004).

Beam columns
Steel Member Strength by Inelastic Lateral Buckling. — N. S. Trahair and G. J. Hancock; 130(1), 64-9 (2004).
Seismic Behavior and Design of High-Strength Square Concrete-Filled Steel Tube Beam Columns. — Amit H. Varma, James M. Ricles, Richard Sause, and Le-Wu Lu; 130(2), 169-79 (2004).
Behavior of Concrete-Filled Steel Tube Beam Columns. — Eiichi Inai, Akiyoshi Mukai, Makoto Kai, Hiroyoshi Tokinoya, Toshiyuki Fukumoto, and Koji Mori; 130(2), 189-202 (2004).
Brace-Beam-Column Connections for Concentrically Braced Frames with Concrete Filled Tube Columns. — Gregory MacRae, Charles W. Roeder, Chad Gunderson, and Yoshihiro Kimura; 130(2), 233-43 (2004).
Bidirectional Tests on Partially Restrained, Composite Beam-to-Column Connections. — Travis P. Green, Roberto T. Leon, and Gian A. Rassati; 130(2), 320-7 (2004).
Improved Truss Model for Design of Welded Steel Moment-Resisting Frame Connections. — Jaswant N. Arlekar and C. V. R. Murty; 130(3), 498-510 (2004).
Elastoplastic and Large Deflection Analysis of Steel Frames by One Element per Member. II: Three Hinges along Member. — Siu-Lai Chan and Zhi-Hua Zhou; 130(4), 545-53 (2004).
Experimental Study of Jumbo Size Reduced Beam Section Connections Using High-Strength Steel. — Sheng-Jin Chen and Chin-Te Tu; 130(4), 582-7 (2004).
Concrete-Filled Steel Tubes Subjected to Axial Compression and Lateral Cyclic Loads. — Amir Fam, Frank S. Qie, and Sami Rizkalla; 130(4), 631-40 (2004).
Steel Beam-Column Connections Using Shape Memory Alloys. — Justin Ocel, Reginald Des-

Roches, Roberto T. Leon, W. Gregory Hess, Robert Krumme, Jack R. Hayes, and Steve Sweeney; 130(5), 732-40 (2004).
Alternative Approaches for Elastic Analysis and Design of Steel Frames. I: Overview. — Andrea E. Surovek-Maleck and Donald W. White; 130(8), 1186-96 (2004).
Alternative Approaches for Elastic Analysis and Design of Steel Frames. II: Verification Studies. — Andrea E. Surovek-Maleck and Donald W. White; 130(8), 1197-205 (2004).
Response Sensitivity for Nonlinear Beam–Column Elements. — Michael H. Scott, Paolo Franchin, Gregory L. Fenves, and Filip C. Filippou; 130(9), 1281-8 (2004).
Effects of Sustained Load on Concrete-Filled Hollow Structural Steel Columns. — Lin-Hai Han, Zhong Tao, and Wei Liu; 130(9), 1392-404 (2004).

Beams

Steel Member Strength by Inelastic Lateral Buckling. — N. S. Trahair and G. J. Hancock; 130(1), 64-9 (2004).
Moment Connections to Circular Concrete-Filled Steel Tube Columns. — Atorod Azizinamini and Stephen P. Schneider; 130(2), 213-22 (2004).
Seismic Behavior of Composite Concrete Filled Steel Tube Column-Wide Flange Beam Moment Connections. — J. M. Ricles, S. W. Peng, and L. W. Lu; 130(2), 223-32 (2004).
Outrigger Beam–Wall Connections. I: Component Testing and Development of Design Model. — Bahram M. Shahrooz, Jeremy T. Deason, and Gokhan Tunc; 130(2), 253-61 (2004).
Outrigger Beam–Wall Connections. II: Subassembly Testing and Further Modeling Enhancements. — Bahram M. Shahrooz, Gokhan Tunc, and Jeremy T. Deason; 130(2), 262-70 (2004).
Experimental and Analytical Reexamination of Classic Concrete Beam Tests. — F. J. Vecchio and W. Shim; 130(3), 460-9 (2004).
Parametric Study of Coupled Wall Behavior—Implications for the Design of Coupling Beams. — Kent A. Harries, J. Dan'l Moulton, and Robert L. Clemson; 130(3), 480-8 (2004).
Experimental Investigation of a Small-Scale Bridge Model under a Moving Mass. — Cristiano Bilello, Lawrence A. Bergman, and Daniel Kuchma; 130(5), 799-804 (2004).
Cyclic Bending Tests to Determine Fully Ductile Section Slenderness Limits for Cold-Formed Circular Hollow Sections. — Mohamed Elchalakani, Xiao-Ling Zhao, and Raphael Grzebieta; 130(7), 1001-10 (2004).
Simplified Nonlinear Analysis of Strengthened Concrete Beams Based on a Rigorous Approach. — Hayder A. Rasheed, Hasan Charkas, and Hani Melhem; 130(7), 1087-96 (2004).
Structural Assessment of Corroded Reinforced Concrete Beams: Modeling Guidelines. — D. Coronelli and P. Gambarova; 130(8), 1214-24 (2004).
Effect of Beam Growth on Reinforced Concrete Frames. — Jubum Kim, John Stanton, and Gregory MacRae; 130(9), 1333-42 (2004).
Measures of Structural Redundancy in Reinforced Concrete Buildings. I: Redundancy Indices. — Mohamed Husain and Panos Tsopelas; 130(11), 1651-8 (2004).
Measures of Structural Redundancy in Reinforced Concrete Buildings. II: Redundancy Response Modification Factor R_R. — Panos Tsopelas and Mohamed Husain; 130(11), 1659-66 (2004).
Elastic Stability of Planar Steel Frames with Unsymmetrical Beam Loading. — A. H. Salem, F. F. El Dib, M. El Aghoury, and M. T. Hanna; 130(11), 1852-9 (2004).

Beams, structural

Neutral Axis Depth versus Flexural Ductility in High-Strength Concrete Beams. — L. F. A. Bernardo and S. M. R. Lopes; 130(3), 452-9 (2004).

Bearing capacity

Seismic Response Analysis of a Highway Overcrossing Equipped with Elastomeric Bearings and Fluid Dampers. — Nicos Makris and Jian Zhang; 130(6), 830-45 (2004).
Performance of a Seismically Isolated Bridge under Near-Fault Earthquake Ground Motions. — Jerry Shen, Meng-Hao Tsai, Kuo-Chun Chang, and George C. Lee; 130(6), 861-8 (2004).
Effects of Sustained Load on Concrete-Filled Hollow Structural Steel Columns. — Lin-Hai Han, Zhong Tao, and Wei Liu; 130(9), 1392-404 (2004).
Design Provisions for Sections Containing Unstiffened Elements with Stress Gradient. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1620-8 (2004).

Bearings

Characterization and Modeling of Friction Pendulum Bearings Subjected to Multiple Components of Excitation. — Gilberto Mosqueda, Andrew S. Whittaker, and Gregory L. Fenves; 130(3), 433-42 (2004).
Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. I: Experimental Study. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1119-32 (2004).
Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. II: Modeling. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1133-44 (2004).

Bending

Behavior of Concrete-Filled Steel Tube Beam Columns. — Eiichi Inai, Akiyoshi Mukai, Makoto Kai, Hiroyoshi Tokinoya, Toshiyuki Fukumoto, and Koji Mori; 130(2), 189-202 (2004).
Fatigue Performance of Cracked Tubular T Joints under Combined Loads. I: Experimental. — Sing-Ping Chiew, Seng-Tjhen Lie, Chi-King Lee, and Zhi-Wei Huang; 130(4), 562-71 (2004).
Fatigue Performance of Cracked Tubular T Joints under Combined Loads. II: Numerical. — Seng-Tjhen Lie, Sing-Ping Chiew, Chi-King Lee, and Zhi-Wei Huang; 130(4), 572-81 (2004).
Cyclic Bending Tests to Determine Fully Ductile Section Slenderness Limits for Cold-Formed Circular Hollow Sections. — Mohamed Elchalakani, Xiao-Ling Zhao, and Raphael Grzebieta; 130(7), 1001-10 (2004).
Tests of Unstiffened Plate Elements Under Combined Compression and Bending. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1602-10 (2004).
Stiffness and Deflection of Steel–Concrete Composite Beams under Negative Bending. — Jianguo Nie, Jiansheng Fan, and C. S. Cai; 130(11), 1842-51 (2004).

Bending moments

T-Cleat Connections to Concrete-Filled Tubular Internal Columns. — Abdel-Kareem Al-Rodan; 130(5), 725-31 (2004).
Elastic Stability of Planar Steel Frames with Unsymmetrical Beam Loading. — A. H. Salem, F. F. El Dib, M. El Aghoury, and M. T. Hanna; 130(11), 1852-9 (2004).

Biaxial bending

Biaxial Bending of Steel Angle Section Beams. — N. S. Trahair; 130(4), 554-61 (2004).
Plastic Interaction Relationships for Square Hollow Structural Sections: Lower Bound Solution. — Magdi Mohareb and Istemi F. Ozkan; 130(9), 1381-91 (2004).
Analytical Approach to Failure Surfaces in Reinforced Concrete Sections Subjected to Axial Loads and Biaxial Bending. — J. L. Bonet, P. F. Miguel, M. A. Fernandez, and M. L. Romero; 130(12), 2006-15 (2004).

Biaxial loads

Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. I: Experimental Study. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1119-32 (2004).

Biaxial stress

Local Buckling of Steel Plates in Double Skin Composite Panels under Biaxial Compression and Shear. — Qing Quan Liang, Brian Uy, Howard D. Wright, and Mark A. Bradford; 130(3), 443-51 (2004).

Blast loads

Explosion and Fire Analysis of Steel Frames Using Fiber Element Approach. — J. Y. Richard Liew and Hong Chen; 130(7), 991-1000 (2004).

Bolts

Cyclic Behavior of Traditional and Innovative Composite Shear Walls. — Qiuhong Zhao and Abolhassan Astaneh-Asl; 130(2), 271-84 (2004).

Bonding

Impact of New ACI 318 Flexural Resistance Factor on Bond Failures. — Christopher R. Scollard and F. Michael Bartlett; 130(1), 138-46 (2004).
Pre- and Postyield Finite Element Method Simulation of Bond of Ribbed Reinforcing Bars. — Hamed M. Salem and Koichi Maekawa; 130(4), 671-80 (2004).

Bracing

Effect of Column Stiffness on Braced Frame Seismic Behavior. — Gregory A. MacRae, Yoshihiro Kimura, and Charles Roeder; 130(3), 381-91 (2004).
Component Testing, Seismic Evaluation and Characterization of Buckling-Restrained Braces. — Cameron J. Black, Nicos Makris, and Ian D. Aiken; 130(6), 880-94 (2004).

Brick masonry

Compressive Behavior of Unconfined and Confined Clay Brick Masonry. — Bryan D. Ewing and Mervyn J. Kowalsky; 130(4), 650-61 (2004).

Bridge decks

Bridge Deck Replacement for Minimum Expected Cost Under Multiple Reliability Constraints. — Mark G. Stewart, Allen C. Estes, and Dan M. Frangopol; 130(9), 1414-9 (2004).

Bridge maintenance
Prediction of Reliability and Cost Profiles of Deteriorating Bridges under Time- and Performance-Controlled Maintenance. — Jung S. Kong and Dan M. Frangopol; 130(12), 1865-74 (2004).

Bridges
Assessment of Steel and Fiber Reinforced Plastic Jackets for Seismic Retrofit of Reinforced Concrete Columns with Structural Flares. — M. Saiid Saiidi, Frank Martinovic, Brett McElhaney, David Sanders, and Faramarz Gordaninejad; 130(4), 609-17 (2004).
Experimental Investigation of a Small-Scale Bridge Model under a Moving Mass. — Cristiano Bilello, Lawrence A. Bergman, and Daniel Kuchma; 130(5), 799-804 (2004).
Performance of a Seismically Isolated Bridge under Near-Fault Earthquake Ground Motions. — Jerry Shen, Meng-Hao Tsai, Kuo-Chun Chang, and George C. Lee; 130(6), 861-8 (2004).
Bridge Rating and Reliability Correlation: Comprehensive Study for Different Bridge Types. — Ferhat Akgül and Dan M. Frangopol; 130(7), 1063-74 (2004).
Efficacy of the Implied Approximation in the Identification of Flutter Derivatives. — Xinzhong Chen and Ahsan Kareem; 130(12), 2070-4 (2004).

Bridges, arch
Experimental and Analytical Modal Analysis of Steel Arch Bridge. — Wei-Xin Ren, Tong Zhao, and Issam E. Harik; 130(7), 1022-31 (2004).

Bridges, cable-stayed
Model for Lateral Excitation of Footbridges by Synchronous Walking. — Shun-ichi Nakamura; 130(1), 32-7 (2004).

Bridges, composite
Effective Flange Width Definition for Steel–Concrete Composite Bridge Girder. — Methee Chiewanichakorn, Amjad J. Aref, Stuart S. Chen, and Il-Sang Ahn; 130(12), 2016-31 (2004).

Bridges, concrete
Experimental Evaluation of the Seismic Performance of Reinforced Concrete Bridge Columns. — Dawn Lehman, Jack Moehle, Stephen Mahin, Anthony Calderone, and Lena Henry; 130(6), 869-79 (2004).

Bridges, girder
Model for Lateral Excitation of Footbridges by Synchronous Walking. — Shun-ichi Nakamura; 130(1), 32-7 (2004).
Stiffness and Deflection of Steel–Concrete Composite Beams under Negative Bending. — Jianguo Nie, Jiansheng Fan, and C. S. Cai; 130(11), 1842-51 (2004).
Effective Flange Width Definition for Steel–Concrete Composite Bridge Girder. — Methee Chiewanichakorn, Amjad J. Aref, Stuart S. Chen, and Il-Sang Ahn; 130(12), 2016-31 (2004).

Bridges, highways
Structural Characterization of Modern Highway Overcrossings—Case Study. — Jian Zhang, Nicos Makris, and Tim Delis; 130(6), 846-60 (2004).

Bridges, pedestrian
Model for Lateral Excitation of Footbridges by Synchronous Walking. — Shun-ichi Nakamura; 130(1), 32-7 (2004).

Bridges, steel
Experimental and Analytical Modal Analysis of Steel Arch Bridge. — Wei-Xin Ren, Tong Zhao, and Issam E. Harik; 130(7), 1022-31 (2004).
Lifetime Performance Analysis of Existing Steel Girder Bridge Superstructures. — Ferhat Akgül and Dan M. Frangopol; 130(12), 1875-88 (2004).

Brittle fractures
Performance Evaluation of Damaged Steel Frame Buildings Subjected to Seismic Loads. — Kihak Lee and Douglas A. Foutch; 130(4), 588-99 (2004).
Similitude Law of Prefracture Hysteresis of Steel Members. — Hitoshi Kuwamura and Naoto Takagi; 130(5), 752-61 (2004).

Buckling
Steel Member Strength by Inelastic Lateral Buckling. — N. S. Trahair and G. J. Hancock; 130(1), 64-9 (2004).
Local Buckling of Steel Plates in Double Skin Composite Panels under Biaxial Compression and Shear. — Qing Quan Liang, Brian Uy, Howard D. Wright, and Mark A. Bradford; 130(3), 443-51 (2004).
Elastoplastic and Large Deflection Analysis of Steel Frames by One Element per Member. II: Three Hinges along Member. — Siu-Lai Chan and Zhi-Hua Zhou; 130(4), 545-53 (2004).
Biaxial Bending of Steel Angle Section Beams. — N. S. Trahair; 130(4), 554-61 (2004).
Component Testing, Seismic Evaluation and Characterization of Buckling-Restrained Braces. — Cameron J. Black, Nicos Makris, and Ian D. Aiken; 130(6), 880-94 (2004).
Analysis of the Influence of Tensile Strength on the Stability of Eccentrically Compressed Slender Unreinforced Masonry Walls Under Lateral Loads. — Mu Lu, Arturo E. Schultz, and Henryk K. Stolarski; 130(6), 921-33 (2004).
Analysis and Design of Double-Sided High-Rise Steel Pallet Rack Frames. — Lip H. Teh, Gregory J. Hancock, and Murray J. Clarke; 130(7), 1011-21 (2004).
Interaction Model for Unprotected Concrete Filled Steel Columns Under Standard Fire Conditions. — K. H. Tan and C. Y. Tang; 130(9), 1405-13 (2004).
Effective Widths of Unstiffened Elements with Stress Gradient. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1611-9 (2004).
Buckling of Linear Structures above the Surface and/or Underground. — Sohrab Baghery; 130(11), 1748-55 (2004).
Design of Cold-Formed Steel Channel Columns with Complex Edge Stiffeners by Direct Strength Method. — Ben Young and Jintang Yan; 130(11), 1756-63 (2004).
Design of Stiffened Elements in Cold-Formed Stainless Steel Sections. — Kim J. R. Rasmussen, Tim Burns, and Paul Bezkorovainy; 130(11), 1764-71 (2004).
Compression Tests of Cold-Reduced High Strength Steel Sections. I: Stub Columns. — Demao Yang and Gregory J. Hancock; 130(11), 1772-81 (2004).
Compression Tests of Cold-Reduced High Strength Steel Sections. II: Long Columns. — Demao Yang, Gregory J. Hancock, and Kim J. R. Rasmussen; 130(11), 1782-9 (2004).
Elastic Stability of Planar Steel Frames with Unsymmetrical Beam Loading. — A. H. Salem, F. F. El Dib, M. El Aghoury, and M. T. Hanna; 130(11), 1852-9 (2004).
Probabilistic Based Design of Concentrically Loaded Fiber-Reinforced Polymeric Compression Members. — Maha Alqam, Richard M. Bennett, and Abdul-Hamid Zureick; 130(12), 1914-20 (2004).
Tests and Design of Fixed-Ended Cold-Formed Steel Plain Angle Columns. — Ben Young; 130(12), 1931-40 (2004).
Compression Tests of High Strength Steel Channel Columns with Interaction between Local and Distortional Buckling. — Demao Yang and Gregory J. Hancock; 130(12), 1954-63 (2004).

Buffeting
Directional Wind-Induced Fatigue of Slender Vertical Structures. — Maria Pia Repetto and Giovanni Solari; 130(7), 1032-40 (2004).

Building codes
Parametric Study of Coupled Wall Behavior—Implications for the Design of Coupling Beams. — Kent A. Harries, J. Dan'l Moulton, and Robert L. Clemson; 130(3), 480-8 (2004).
Fragility Assessment of Light-Frame Wood Construction Subjected to Wind and Earthquake Hazards. — Bruce R. Ellingwood, David V. Rosowsky, Yue Li, and Jun Hee Kim; 130(12), 1921-30 (2004).

Building design
Alternative Approaches for Elastic Analysis and Design of Steel Frames. I: Overview. — Andrea E. Surovek-Maleck and Donald W. White; 130(8), 1186-96 (2004).
Alternative Approaches for Elastic Analysis and Design of Steel Frames. II: Verification Studies. — Andrea E. Surovek-Maleck and Donald W. White; 130(8), 1197-205 (2004).

Building frames
Effects of Reference Displacement and Damage Accumulation in Wood Shear Walls. — Jeffrey D. Langlois, Rakesh Gupta, and Thomas H. Miller; 130(3), 470-9 (2004).
Seismic Analysis of Reinforced Concrete Frame Buildings Using Interface Modeling. — Tong-Seok Han and Sarah L. Billington; 130(8), 1157-68 (2004).
Seismic Response of Vertically Irregular Frames: Response History and Modal Pushover Analyses. — Chatpan Chintanapakdee and Anil K. Chopra; 130(8), 1177-85 (2004).
Effect of Beam Growth on Reinforced Concrete Frames. — Jubum Kim, John Stanton, and Gregory MacRae; 130(9), 1333-42 (2004).

Buildings
Seismic Analysis of Asymmetric Buildings with Flexible Floor Diaphragms. — Dhiman Basu and Sudhir K. Jain; 130(8), 1169-76 (2004).
Shear Strength Model for Lightly Reinforced Concrete Columns. — Halil Sezen and Jack P. Moehle; 130(11), 1692-703 (2004).

Buildings, high-rise
Parametric Study of Coupled Wall Behavior—Implications for the Design of Coupling Beams. — Kent A. Harries, J. Dan'l Moulton, and Robert L. Clemson; 130(3), 480-8 (2004).
Shear-Mode Rotary Magnetorheological Damper

for Small-Scale Structural Control Experiments. — Tim Tse and C. C. Chang; 130(6), 904-11 (2004).

Buildings, residential

Hurricane Damage Prediction Model for Residential Structures. — Jean-Paul Pinelli, Emil Simiu, Kurt Gurley, Chelakara Subramanian, Liang Zhang, Anne Cope, James J. Filliben, and Shahid Hamid; 130(11), 1685-91 (2004).

Buried pipes

Thrust Restraint Design of Concrete Pressure Pipe. — Mehdi S. Zarghamee, Daniel W. Eggers, Rasko P. Ojdrovic, and Daniel P. Valentine; 130(1), 95-107 (2004).

Case reports

Medium-Length Thin-Walled Cylinder under Wind Loading—Case Study. — M. Pircher; 130(12), 2062-9 (2004).

Clays

Reversed In-Plane Cyclic Behavior of Posttensioned Clay Brick Masonry Walls. — Owen A. Rosenboom and Mervyn J. Kowalsky; 130(5), 787-98 (2004).

Codes

Neutral Axis Depth versus Flexural Ductility in High-Strength Concrete Beams. — L. F. A. Bernardo and S. M. R. Lopes; 130(3), 452-9 (2004).

Coefficients

Interaction Model for Unprotected Concrete Filled Steel Columns Under Standard Fire Conditions. — K. H. Tan and C. Y. Tang; 130(9), 1405-13 (2004).

Cold-formed steel

Finite Element Idealization of a Cold-Formed Steel Portal Frame. — James B. P. Lim and David A. Nethercot; 130(1), 78-94 (2004).

Web Crippling Strength of Steel Deck Subjected to End One Flange Loading. — Onur Avci and W. Samuel Easterling; 130(5), 697-707 (2004).

Design Expressions Based on a Finite Element Model of a Stiffened Cold-Formed Steel C-Section. — Steven R. Fox and G. Wayne Brodland; 130(5), 708-14 (2004).

Cyclic Bending Tests to Determine Fully Ductile Section Slenderness Limits for Cold-Formed Circular Hollow Sections. — Mohamed Elchalakani, Xiao-Ling Zhao, and Raphael Grzebieta; 130(7), 1001-10 (2004).

Analysis and Design of Double-Sided High-Rise Steel Pallet Rack Frames. — Lip H. Teh, Gregory J. Hancock, and Murray J. Clarke; 130(7), 1011-21 (2004).

Design of Cold-Formed Steel Channel Columns with Complex Edge Stiffeners by Direct Strength Method. — Ben Young and Jintang Yan; 130(11), 1756-63 (2004).

Design of Stiffened Elements in Cold-Formed Stainless Steel Sections. — Kim J. R. Rasmussen, Tim Burns, and Paul Bezkorovainy; 130(11), 1764-71 (2004).

Compression Tests of Cold-Reduced High Strength Steel Sections. I: Stub Columns. — Demao Yang and Gregory J. Hancock; 130(11), 1772-81 (2004).

Compression Tests of Cold-Reduced High Strength Steel Sections. II: Long Columns. — Demao Yang, Gregory J. Hancock, and Kim J. R. Rasmussen; 130(11), 1782-9 (2004).

Improving the Ductility of Knee Joints between Rectangular Hollow Sections. — Lip H. Teh and Gregory J. Hancock; 130(11), 1790-8 (2004).

Self-Drilling Screw Joints for Cold-Formed Channel Portal Frames. — Julie Mills and Roger LaBoube; 130(11), 1799-806 (2004).

Tests and Design of Fixed-Ended Cold-Formed Steel Plain Angle Columns. — Ben Young; 130(12), 1931-40 (2004).

Collapse

Finite-Element Model for Collapse and Long-Term Analysis of Steel–Concrete Composite Beams. — M. Fragiacomo, C. Amadio, and L. Macorini; 130(3), 489-97 (2004).

Colorado

Lifetime Performance Analysis of Existing Steel Girder Bridge Superstructures. — Ferhat Akgül and Dan M. Frangopol; 130(12), 1875-88 (2004).

Column strength

Seismic Behavior and Design of High-Strength Square Concrete-Filled Steel Tube Beam Columns. — Amit H. Varma, James M. Ricles, Richard Sause, and Le-Wu Lu; 130(2), 169-79 (2004).

Behavior of Concrete-Filled Steel Tube Beam Columns. — Eiichi Inai, Akiyoshi Mukai, Makoto Kai, Hiroyoshi Tokinoya, Toshiyuki Fukumoto, and Koji Mori; 130(2), 189-202 (2004).

Columns

Steel Member Strength by Inelastic Lateral Buckling. — N. S. Trahair and G. J. Hancock; 130(1), 64-9 (2004).

Effect of Column Stiffness on Braced Frame Seismic Behavior. — Gregory A. MacRae, Yoshihiro Kimura, and Charles Roeder; 130(3), 381-91 (2004).

Size Effect in Axially Loaded Reinforced Concrete Columns. — Sıddık Şener, Ben I. G. Barr, and Hadi F. Abusiaf ; 130(4), 662-70 (2004).

T-Cleat Connections to Concrete-Filled Tubular Internal Columns. — Abdel-Kareem Al-Rodan; 130(5), 725-31 (2004).

Experimental Evaluation of the Seismic Performance of Reinforced Concrete Bridge Columns. — Dawn Lehman, Jack Moehle, Stephen Mahin, Anthony Calderone, and Lena Henry; 130(6), 869-79 (2004).

Interaction Model for Unprotected Concrete Filled Steel Columns Under Standard Fire Conditions. — K. H. Tan and C. Y. Tang; 130(9), 1405-13 (2004).

Measures of Structural Redundancy in Reinforced Concrete Buildings. I: Redundancy Indices. — Mohamed Husain and Panos Tsopelas; 130(11), 1651-8 (2004).

Measures of Structural Redundancy in Reinforced Concrete Buildings. II: Redundancy Response Modification Factor R_R. — Panos Tsopelas and Mohamed Husain; 130(11), 1659-66 (2004).

Design of Cold-Formed Steel Channel Columns with Complex Edge Stiffeners by Direct Strength Method. — Ben Young and Jintang Yan; 130(11), 1756-63 (2004).

Compression Tests of Cold-Reduced High Strength Steel Sections. I: Stub Columns. — Demao Yang and Gregory J. Hancock; 130(11), 1772-81 (2004).

Compression Tests of Cold-Reduced High Strength Steel Sections. II: Long Columns. — Demao Yang, Gregory J. Hancock, and Kim J. R. Rasmussen; 130(11), 1782-9 (2004).

Fire Resistance of Reinforced Concrete Columns Subjected to 1-, 2-, and 3-Face Heating. — K. H. Tan and Y. Yao; 130(11), 1820-8 (2004).

Tests and Design of Fixed-Ended Cold-Formed Steel Plain Angle Columns. — Ben Young; 130(12), 1931-40 (2004).

Analytical Approach to Failure Surfaces in Reinforced Concrete Sections Subjected to Axial Loads and Biaxial Bending. — J. L. Bonet, P. F. Miguel, M. A. Fernandez, and M. L. Romero; 130(12), 2006-15 (2004).

Combined stress

Fatigue Performance of Cracked Tubular T Joints under Combined Loads. I: Experimental. — Sing-Ping Chiew, Seng-Tjhen Lie, Chi-King Lee, and Zhi-Wei Huang; 130(4), 562-71 (2004).

Fatigue Performance of Cracked Tubular T Joints under Combined Loads. II: Numerical. — Seng-Tjhen Lie, Sing-Ping Chiew, Chi-King Lee, and Zhi-Wei Huang; 130(4), 572-81 (2004).

Communication systems

Compressive Strength of Solid Round Steel Bars. — Khaled Sennah and John Wahba; 130(1), 147-51 (2004).

Composite beams

Nonlinear Analysis of Steel-Concrete Composite Structures: State of the Art. — Enrico Spacone and Sherif El-Tawil; 130(2), 159-68 (2004).

Finite-Element Model for Collapse and Long-Term Analysis of Steel–Concrete Composite Beams. — M. Fragiacomo, C. Amadio, and L. Macorini; 130(3), 489-97 (2004).

Experimental Studies on Shear Strength of Steel–Concrete Composite Beams. — Jianguo Nie, Yan Xiao, and Lin Chen; 130(8), 1206-13 (2004).

Stiffness and Deflection of Steel–Concrete Composite Beams under Negative Bending. — Jianguo Nie, Jiansheng Fan, and C. S. Cai; 130(11), 1842-51 (2004).

Composite columns

Nonlinear Analysis of Steel-Concrete Composite Structures: State of the Art. — Enrico Spacone and Sherif El-Tawil; 130(2), 159-68 (2004).

Seismic Behavior and Design of High-Strength Square Concrete-Filled Steel Tube Beam Columns. — Amit H. Varma, James M. Ricles, Richard Sause, and Le-Wu Lu; 130(2), 169-79 (2004).

Behavior of Centrally Loaded Concrete-Filled Steel-Tube Short Columns. — Kenji Sakino, Hiroyuki Nakahara, Shosuke Morino, and Isao Nishiyama; 130(2), 180-8 (2004).

Behavior of Concrete-Filled Steel Tube Beam Columns. — Eiichi Inai, Akiyoshi Mukai, Makoto Kai, Hiroyoshi Tokinoya, Toshiyuki Fukumoto, and Koji Mori; 130(2), 189-202 (2004).

Behavior of Eccentrically Loaded Concrete-Filled Steel Tubular Columns. — Toshiaki Fujimoto, Akiyoshi Mukai, Isao Nishiyama, and Kenji Sakino; 130(2), 203-12 (2004).

Moment Connections to Circular Concrete-Filled Steel Tube Columns. — Atorod Azizinamini and Stephen P. Schneider; 130(2), 213-22 (2004).

Brace-Beam-Column Connections for Concentrically Braced Frames with Concrete Filled Tube

Columns. — Gregory MacRae, Charles W. Roeder, Chad Gunderson, and Yoshihiro Kimura; 130(2), 233-43 (2004).
Inelastic Force-Deformation Response of Joint Shear Panels in Beam-Column Moment Connections to Concrete-Filled Tubes. — Isao Nishiyama, Toshiaki Fujimoto, Toshiyuki Fukumoto, and Kenzo Yoshioka; 130(2), 244-52 (2004).
Bidirectional Tests on Partially Restrained, Composite Beam-to-Column Connections. — Travis P. Green, Roberto T. Leon, and Gian A. Rassati; 130(2), 320-7 (2004).
Effects of Sustained Load on Concrete-Filled Hollow Structural Steel Columns. — Lin-Hai Han, Zhong Tao, and Wei Liu; 130(9), 1392-404 (2004).
Tests on Cyclic Behavior of Concrete-Filled Hollow Structural Steel Columns after Exposure to the ISO-834 Standard Fire. — Lin-Hai Han and Xiao-Kang Lin; 130(11), 1807-19 (2004).

Composite materials

Energy-based Design of Dowel Connections in Wood-Plastic Composites Hollow Sections. — William R. Parsons and Donald A. Bender; 130(4), 681-9 (2004).
Composite Shear Stud Strength at Early Concrete Ages. — Cem Topkaya, Joseph A. Yura, and Eric B. Williamson; 130(6), 952-60 (2004).
Simplified Nonlinear Analysis of Strengthened Concrete Beams Based on a Rigorous Approach. — Hayder A. Rasheed, Hasan Charkas, and Hani Melhem; 130(7), 1087-96 (2004).
Probabilistic Based Design of Concentrically Loaded Fiber-Reinforced Polymeric Compression Members. — Maha Alqam, Richard M. Bennett, and Abdul-Hamid Zureick; 130(12), 1914-20 (2004).

Composite structures

Nonlinear Analysis of Steel-Concrete Composite Structures: State of the Art. — Enrico Spacone and Sherif El-Tawil; 130(2), 159-68 (2004).
Behavior of Centrally Loaded Concrete-Filled Steel-Tube Short Columns. — Kenji Sakino, Hiroyuki Nakahara, Shosuke Morino, and Isao Nishiyama; 130(2), 180-8 (2004).
Seismic Behavior of Composite Concrete Filled Steel Tube Column-Wide Flange Beam Moment Connections. — J. M. Ricles, S. W. Peng, and L. W. Lu; 130(2), 223-32 (2004).
Outrigger Beam–Wall Connections. I: Component Testing and Development of Design Model. — Bahram M. Shahrooz, Jeremy T. Deason, and Gokhan Tunc; 130(2), 253-61 (2004).
Outrigger Beam–Wall Connections. II: Subassembly Testing and Further Modeling Enhancements. — Bahram M. Shahrooz, Gokhan Tunc, and Jeremy T. Deason; 130(2), 262-70 (2004).
Cyclic Behavior of Traditional and Innovative Composite Shear Walls. — Qiuhong Zhao and Abolhassan Astaneh-Asl; 130(2), 271-84 (2004).
Seismic Behavior of Reinforced Concrete Column-Steel Beam Subassemblies and Frame Systems. — Xuemei Liang and Gustavo J. Parra-Montesinos; 130(2), 310-9 (2004).
Guidelines: Seismic Design of Composite Reinforced Concrete and Steel Buildings. — Isao Nishiyama, Hiroshi Kuramoto, and Hiroshi Noguchi; 130(2), 336-42 (2004).
Component Modeling of Partially Restrained Composite Joints under Cyclic and Dynamic Loading. — G. A. Rassati, R. T. Leon, and S. Noè; 130(2), 343-51 (2004).
Seismic Performance and Stress Transferring Mechanism of Through-Column-Type Joints for Composite Reinforced Concrete and Steel Frames. — Hiroshi Kuramoto and Isao Nishiyama; 130(2), 352-60 (2004).
Overview of U.S.–Japan Research on the Seismic Design of Composite Reinforced Concrete and Steel Moment Frame Structures. — Gregory G. Deierlein and Hiroshi Noguchi; 130(2), 361-7 (2004).
Local Buckling of Steel Plates in Double Skin Composite Panels under Biaxial Compression and Shear. — Qing Quan Liang, Brian Uy, Howard D. Wright, and Mark A. Bradford; 130(3), 443-51 (2004).
Strength and Performance of Fiber-Reinforced Concrete Composite Slabs. — Carin L. Roberts-Wollmann, Marcela Guirola, and W. Samuel Easterling; 130(3), 520-8 (2004).
Structural Steel Boundary Elements for Ductile Concrete Walls. — Soon Ho Cho, Bryce Tupper, William D. Cook, and Denis Mitchell; 130(5), 762-8 (2004).
Moment–Rotation Parameters for Composite Shear Tab Connections. — Judy Liu and Abolhassan Astaneh-Asl; 130(9), 1371-80 (2004).
Realistic Modeling of Composite and Reinforced Concrete Floor Slabs under Extreme Loading. I: Analytical Method. — B. A. Izzuddin, X. Y. Tao, and A. Y. Elghazouli; 130(12), 1972-84 (2004).
Realistic Modeling of Composite and Reinforced Concrete Floor Slabs under Extreme Loading. II: Verification and Application. — A. Y. Elghazouli and B. A. Izzuddin; 130(12), 1985-96 (2004).

Compression

Behavior of Eccentrically Loaded Concrete-Filled Steel Tubular Columns. — Toshiaki Fujimoto, Akiyoshi Mukai, Isao Nishiyama, and Kenji Sakino; 130(2), 203-12 (2004).
Tests of Unstiffened Plate Elements Under Combined Compression and Bending. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1602-10 (2004).
Probabilistic Based Design of Concentrically Loaded Fiber-Reinforced Polymeric Compression Members. — Maha Alqam, Richard M. Bennett, and Abdul-Hamid Zureick; 130(12), 1914-20 (2004).

Compression tests

Compression Tests of Cold-Reduced High Strength Steel Sections. I: Stub Columns. — Demao Yang and Gregory J. Hancock; 130(11), 1772-81 (2004).
Compression Tests of Cold-Reduced High Strength Steel Sections. II: Long Columns. — Demao Yang, Gregory J. Hancock, and Kim J. R. Rasmussen; 130(11), 1782-9 (2004).
Compression Tests of High Strength Steel Channel Columns with Interaction between Local and Distortional Buckling. — Demao Yang and Gregory J. Hancock; 130(12), 1954-63 (2004).

Compressive strength

Compressive Strength of Solid Round Steel Bars. — Khaled Sennah and John Wahba; 130(1), 147-51 (2004).
Compressive Behavior of Unconfined and Confined Clay Brick Masonry. — Bryan D. Ewing and Mervyn J. Kowalsky; 130(4), 650-61 (2004).

Computation

Seismic Analysis of Reinforced Concrete Frame Buildings Using Interface Modeling. — Tong-Seok Han and Sarah L. Billington; 130(8), 1157-68 (2004).
Effective Widths of Unstiffened Elements with Stress Gradient. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1611-9 (2004).
Design Provisions for Sections Containing Unstiffened Elements with Stress Gradient. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1620-8 (2004).

Computer aided simulation

Finite Element Analysis Simulation of Airport Approach Lighting Towers. — D. G. Zimcik, M. Nejad Ensan, S. T. Jenq, and M. C. Chao; 130(5), 805-11 (2004).

Computer models

Computer Modeling of Restrained Reinforced Concrete Slabs in Fire Conditions. — Linus Lim, Andrew Buchanan, Peter Moss, and Jean-Marc Franssen; 130(12), 1964-71 (2004).

Computer software

T-Cleat Connections to Concrete-Filled Tubular Internal Columns. — Abdel-Kareem Al-Rodan; 130(5), 725-31 (2004).

Concentrated loads

Design of I Beams and Deck Profiles under Concentrated Loading. — Tore Tryland, Per K. Larsen, and Magnus Langseth; 130(3), 411-22 (2004).
Probabilistic Based Design of Concentrically Loaded Fiber-Reinforced Polymeric Compression Members. — Maha Alqam, Richard M. Bennett, and Abdul-Hamid Zureick; 130(12), 1914-20 (2004).

Concrete

Behavior of Centrally Loaded Concrete-Filled Steel-Tube Short Columns. — Kenji Sakino, Hiroyuki Nakahara, Shosuke Morino, and Isao Nishiyama; 130(2), 180-8 (2004).
Seismic Behavior of Composite Concrete Filled Steel Tube Column-Wide Flange Beam Moment Connections. — J. M. Ricles, S. W. Peng, and L. W. Lu; 130(2), 223-32 (2004).
Experimental and Analytical Reexamination of Classic Concrete Beam Tests. — F. J. Vecchio and W. Shim; 130(3), 460-9 (2004).
Finite-Element Model for Collapse and Long-Term Analysis of Steel–Concrete Composite Beams. — M. Fragiacomo, C. Amadio, and L. Macorini; 130(3), 489-97 (2004).
Concrete-Filled Steel Tubes Subjected to Axial Compression and Lateral Cyclic Loads. — Amir Fam, Frank S. Qie, and Sami Rizkalla; 130(4), 631-40 (2004).
Concrete Shells Form-Finding with Surface Stress Density Method. — Bernard Maurin and René Motro; 130(6), 961-8 (2004).
Simplified Nonlinear Analysis of Strengthened Concrete Beams Based on a Rigorous Approach. — Hayder A. Rasheed, Hasan Charkas, and Hani Melhem; 130(7), 1087-96 (2004).
Experimental Studies on Shear Strength of Steel–

Concrete Composite Beams. — Jianguo Nie, Yan Xiao, and Lin Chen; 130(8), 1206-13 (2004).
Effects of Sustained Load on Concrete-Filled Hollow Structural Steel Columns. — Lin-Hai Han, Zhong Tao, and Wei Liu; 130(9), 1392-404 (2004).
Bridge Deck Replacement for Minimum Expected Cost Under Multiple Reliability Constraints. — Mark G. Stewart, Allen C. Estes, and Dan M. Frangopol; 130(9), 1414-9 (2004).
Effective Flange Width Definition for Steel–Concrete Composite Bridge Girder. — Methee Chiewanichakorn, Amjad J. Aref, Stuart S. Chen, and Il-Sang Ahn; 130(12), 2016-31 (2004).

Concrete columns

Finite Element Method Analysis of Hybrid Structural Frames with Reinforced Concrete Columns and Steel Beams. — Hiroshi Noguchi and Kazuhiro Uchida; 130(2), 328-35 (2004).
Seismic Performance and Stress Transferring Mechanism of Through-Column-Type Joints for Composite Reinforced Concrete and Steel Frames. — Hiroshi Kuramoto and Isao Nishiyama; 130(2), 352-60 (2004).
Assessment of Steel and Fiber Reinforced Plastic Jackets for Seismic Retrofit of Reinforced Concrete Columns with Structural Flares. — M. Saiid Saiidi, Frank Martinovic, Brett McElhaney, David Sanders, and Faramarz Gordaninejad; 130(4), 609-17 (2004).
Long-Term Effects on Response of Reinforced Concrete Columns to Cyclic Loading. — A. E. Schultz, S. S. Welton, and L. E. Rey; 130(9), 1320-32 (2004).
Shear Strength Model for Lightly Reinforced Concrete Columns. — Halil Sezen and Jack P. Moehle; 130(11), 1692-703 (2004).

Concrete construction

Overview of U.S.–Japan Research on the Seismic Design of Composite Reinforced Concrete and Steel Moment Frame Structures. — Gregory G. Deierlein and Hiroshi Noguchi; 130(2), 361-7 (2004).

Concrete deterioration

Cellular Automata Approach to Durability Analysis of Concrete Structures in Aggressive Environments. — Fabio Biondini, Franco Bontempi, Dan M. Frangopol, and Pier Giorgio Malerba; 130(11), 1724-37 (2004).

Concrete masonry

Seismic Retrofit of Concrete-Masonry-Infilled Steel Frames with Glass Fiber-Reinforced Polymer Laminates. — Wael W. El-Dakhakhni, Ahmad A. Hamid, and Mohamed Elgaaly; 130(9), 1343-52 (2004).

Concrete pipes

Thrust Restraint Design of Concrete Pressure Pipe. — Mehdi S. Zarghamee, Daniel W. Eggers, Rasko P. Ojdrovic, and Daniel P. Valentine; 130(1), 95-107 (2004).

Concrete slabs

Application of the Improved Immune Algorithm to Structural Design Support System. — Ayaho Miyamoto, Hideaki Nakamura, and Leopold Kruszka; 130(1), 108-19 (2004).
Strength and Performance of Fiber-Reinforced Concrete Composite Slabs. — Carin L. Roberts-Wollmann, Marcela Guirola, and W. Samuel Easterling; 130(3), 520-8 (2004).
Computer Modeling of Restrained Reinforced Concrete Slabs in Fire Conditions. — Linus Lim, Andrew Buchanan, Peter Moss, and Jean-Marc Franssen; 130(12), 1964-71 (2004).

Concrete structures

Neutral Axis Depth versus Flexural Ductility in High-Strength Concrete Beams. — L. F. A. Bernardo and S. M. R. Lopes; 130(3), 452-9 (2004).
Pre- and Postyield Finite Element Method Simulation of Bond of Ribbed Reinforcing Bars. — Hamed M. Salem and Koichi Maekawa; 130(4), 671-80 (2004).
Measures of Structural Redundancy in Reinforced Concrete Buildings. I: Redundancy Indices. — Mohamed Husain and Panos Tsopelas; 130(11), 1651-8 (2004).
Measures of Structural Redundancy in Reinforced Concrete Buildings. II: Redundancy Response Modification Factor R_R. — Panos Tsopelas and Mohamed Husain; 130(11), 1659-66 (2004).
Behavior and Modeling of Fiber Reinforced Polymer-Confined Concrete. — J. G. Teng and L. Lam; 130(11), 1713-23 (2004).
Cellular Automata Approach to Durability Analysis of Concrete Structures in Aggressive Environments. — Fabio Biondini, Franco Bontempi, Dan M. Frangopol, and Pier Giorgio Malerba; 130(11), 1724-37 (2004).
Numerical Analysis of Mixed-Mode Fracture in Concrete Using Extended Fictitious Crack Model. — Zihai Shi; 130(11), 1738-47 (2004).
Realistic Modeling of Composite and Reinforced Concrete Floor Slabs under Extreme Loading. I: Analytical Method. — B. A. Izzuddin, X. Y. Tao, and A. Y. Elghazouli; 130(12), 1972-84 (2004).
Realistic Modeling of Composite and Reinforced Concrete Floor Slabs under Extreme Loading. II: Verification and Application. — A. Y. Elghazouli and B. A. Izzuddin; 130(12), 1985-96 (2004).
Modeling Material Failure in Concrete Structures under Cyclic Actions. — Rui Faria, Javier Oliver, and Miguel Cervera; 130(12), 1997-2005 (2004).

Concrete, post-tensioned

Posttensioned Hybrid Coupled Walls under Lateral Loads. — Yahya C. Kurama and Qiang Shen; 130(2), 297-309 (2004).

Concrete, precast

Posttensioned Hybrid Coupled Walls under Lateral Loads. — Yahya C. Kurama and Qiang Shen; 130(2), 297-309 (2004).

Concrete, prestressed

Tension-Stiffening Model for Cracked Flexural Concrete Members. — Ll. Torres, F. López-Almansa, and L. M. Bozzo; 130(8), 1242-51 (2004).

Concrete, reinforced

Failure of Lightly Reinforced Concrete Members under Fire. I: Analytical Modeling. — B. A. Izzuddin and A. Y. Elghazouli; 130(1), 3-17 (2004).
Failure of Lightly Reinforced Concrete Members under Fire. II: Parametric Studies and Design Considerations. — A. Y. Elghazouli and B. A. Izzuddin; 130(1), 18-31 (2004).
Application of the Improved Immune Algorithm to Structural Design Support System. — Ayaho Miyamoto, Hideaki Nakamura, and Leopold Kruszka; 130(1), 108-19 (2004).
Impact of New ACI 318 Flexural Resistance Factor on Bond Failures. — Christopher R. Scollard and F. Michael Bartlett; 130(1), 138-46 (2004).
Inelastic Dynamic Behavior of Hybrid Coupled Walls. — Mohammad Hassan and Sherif El-Tawil; 130(2), 285-96 (2004).
Posttensioned Hybrid Coupled Walls under Lateral Loads. — Yahya C. Kurama and Qiang Shen; 130(2), 297-309 (2004).
Neutral Axis Depth versus Flexural Ductility in High-Strength Concrete Beams. — L. F. A. Bernardo and S. M. R. Lopes; 130(3), 452-9 (2004).
Assessment of Steel and Fiber Reinforced Plastic Jackets for Seismic Retrofit of Reinforced Concrete Columns with Structural Flares. — M. Saiid Saiidi, Frank Martinovic, Brett McElhaney, David Sanders, and Faramarz Gordaninejad; 130(4), 609-17 (2004).
Displacement-Based Design of Slender Reinforced Concrete Structural Walls—Experimental Verification. — John H. Thomsen, IV, and John W. Wallace; 130(4), 618-30 (2004).
Size Effect in Axially Loaded Reinforced Concrete Columns. — Sıddık Şener, Ben I. G. Barr, and Hadi F. Abusiaf ; 130(4), 662-70 (2004).
Pre- and Postyield Finite Element Method Simulation of Bond of Ribbed Reinforcing Bars. — Hamed M. Salem and Koichi Maekawa; 130(4), 671-80 (2004).
Structural Steel Boundary Elements for Ductile Concrete Walls. — Soon Ho Cho, Bryce Tupper, William D. Cook, and Denis Mitchell; 130(5), 762-8 (2004).
Experimental Evaluation of the Seismic Performance of Reinforced Concrete Bridge Columns. — Dawn Lehman, Jack Moehle, Stephen Mahin, Anthony Calderone, and Lena Henry; 130(6), 869-79 (2004).
Composite Shear Stud Strength at Early Concrete Ages. — Cem Topkaya, Joseph A. Yura, and Eric B. Williamson; 130(6), 952-60 (2004).
Seismic Analysis of Reinforced Concrete Frame Buildings Using Interface Modeling. — Tong-Seok Han and Sarah L. Billington; 130(8), 1157-68 (2004).
Structural Assessment of Corroded Reinforced Concrete Beams: Modeling Guidelines. — D. Coronelli and P. Gambarova; 130(8), 1214-24 (2004).
Influence of Concrete Cover on Fire Resistance of Reinforced Concrete Flexural Members. — Xudong Shi, Teng-Hooi Tan, Kang-Hai Tan, and Zhenhai Guo; 130(8), 1225-32 (2004).
Repeated Loading Tests of Concrete Walls Containing Headed Shear Reinforcement. — Young Hoon Kim, Young Soo Yoon, William D. Cook, and Denis Mitchell; 130(8), 1233-41 (2004).
Tension-Stiffening Model for Cracked Flexural Concrete Members. — Ll. Torres, F. López-Almansa, and L. M. Bozzo; 130(8), 1242-51 (2004).
Effect of Beam Growth on Reinforced Concrete Frames. — Jubum Kim, John Stanton, and Gregory MacRae; 130(9), 1333-42 (2004).
Interaction Model for Unprotected Concrete Filled

Steel Columns Under Standard Fire Conditions. — K. H. Tan and C. Y. Tang; 130(9), 1405-13 (2004).
Shear Strength Model for Lightly Reinforced Concrete Columns. — Halil Sezen and Jack P. Moehle; 130(11), 1692-703 (2004).
Fire Resistance of Reinforced Concrete Columns Subjected to 1-, 2-, and 3-Face Heating. — K. H. Tan and Y. Yao; 130(11), 1820-8 (2004).
Computer Modeling of Restrained Reinforced Concrete Slabs in Fire Conditions. — Linus Lim, Andrew Buchanan, Peter Moss, and Jean-Marc Franssen; 130(12), 1964-71 (2004).
Analytical Approach to Failure Surfaces in Reinforced Concrete Sections Subjected to Axial Loads and Biaxial Bending. — J. L. Bonet, P. F. Miguel, M. A. Fernandez, and M. L. Romero; 130(12), 2006-15 (2004).

Confinement

Compressive Behavior of Unconfined and Confined Clay Brick Masonry. — Bryan D. Ewing and Mervyn J. Kowalsky; 130(4), 650-61 (2004).
Experimental Evaluation of the Seismic Performance of Reinforced Concrete Bridge Columns. — Dawn Lehman, Jack Moehle, Stephen Mahin, Anthony Calderone, and Lena Henry; 130(6), 869-79 (2004).
Behavior and Modeling of Fiber Reinforced Polymer-Confined Concrete. — J. G. Teng and L. Lam; 130(11), 1713-23 (2004).

Connections

Durability of Galvanized Light-Gauge Steel Shapes. — Y. Sakumoto, H. Nomura, M. Matsumoto, A. Ninomiya, T. Miyao, and Y. Sakamoto; 130(1), 70-7 (2004).
Moment Connections to Circular Concrete-Filled Steel Tube Columns. — Atorod Azizinamini and Stephen P. Schneider; 130(2), 213-22 (2004).
Seismic Behavior of Composite Concrete Filled Steel Tube Column-Wide Flange Beam Moment Connections. — J. M. Ricles, S. W. Peng, and L. W. Lu; 130(2), 223-32 (2004).
Brace-Beam-Column Connections for Concentrically Braced Frames with Concrete Filled Tube Columns. — Gregory MacRae, Charles W. Roeder, Chad Gunderson, and Yoshihiro Kimura; 130(2), 233-43 (2004).
Outrigger Beam–Wall Connections. I: Component Testing and Development of Design Model. — Bahram M. Shahrooz, Jeremy T. Deason, and Gokhan Tunc; 130(2), 253-61 (2004).
Outrigger Beam–Wall Connections. II: Subassembly Testing and Further Modeling Enhancements. — Bahram M. Shahrooz, Gokhan Tunc, and Jeremy T. Deason; 130(2), 262-70 (2004).
Seismic Behavior of Reinforced Concrete Column-Steel Beam Subassemblies and Frame Systems. — Xuemei Liang and Gustavo J. Parra-Montesinos; 130(2), 310-9 (2004).
Bidirectional Tests on Partially Restrained, Composite Beam-to-Column Connections. — Travis P. Green, Roberto T. Leon, and Gian A. Rassati; 130(2), 320-7 (2004).
Seismic Performance and Stress Transferring Mechanism of Through-Column-Type Joints for Composite Reinforced Concrete and Steel Frames. — Hiroshi Kuramoto and Isao Nishiyama; 130(2), 352-60 (2004).
Experimental Study of Jumbo Size Reduced Beam Section Connections Using High-Strength Steel. — Sheng-Jin Chen and Chin-Te Tu; 130(4), 582-7 (2004).
Energy-based Design of Dowel Connections in Wood-Plastic Composites Hollow Sections. — William R. Parsons and Donald A. Bender; 130(4), 681-9 (2004).
T-Cleat Connections to Concrete-Filled Tubular Internal Columns. — Abdel-Kareem Al-Rodan; 130(5), 725-31 (2004).
Seismic Response of Electrical Substation Equipment Interconnected by Flexible Conductors. — André Filiatrault and Christopher Stearns; 130(5), 769-78 (2004).
Finite-Element Model for Wood-Based Floors with Lateral Reinforcements. — Lei Jiang, Lin Hu, and Ying-Hei Chui; 130(7), 1097-107 (2004).
Improved Analysis of Timber Rivet Connections. — Douglas C. Stahl, Ronald W. Wolfe, and Marshall Begel; 130(8), 1272-9 (2004).
Self-Drilling Screw Joints for Cold-Formed Channel Portal Frames. — Julie Mills and Roger LaBoube; 130(11), 1799-806 (2004).

Connections, bolted

Single Plate Shear Connection Response to Rotation Demands Imposed by Frames Undergoing Cyclic Lateral Displacements. — Joseph P. Crocker and Janice J. Chambers; 130(6), 934-41 (2004).
Moment–Rotation Parameters for Composite Shear Tab Connections. — Judy Liu and Abolhassan Astaneh-Asl; 130(9), 1371-80 (2004).
Reliability Analysis of Block Shear Capacity of Coped Steel Beams. — Cameron R. Franchuk, Robert G. Driver, and Gilbert Y. Grondin; 130(12), 1904-13 (2004).

Connections, flexible

Single Plate Shear Connection Response to Rotation Demands Imposed by Frames Undergoing Cyclic Lateral Displacements. — Joseph P. Crocker and Janice J. Chambers; 130(6), 934-41 (2004).

Connections, semi-rigid

Component Modeling of Partially Restrained Composite Joints under Cyclic and Dynamic Loading. — G. A. Rassati, R. T. Leon, and S. Noè; 130(2), 343-51 (2004).
Steel Beam-Column Connections Using Shape Memory Alloys. — Justin Ocel, Reginald DesRoches, Roberto T. Leon, W. Gregory Hess, Robert Krumme, Jack R. Hayes, and Steve Sweeney; 130(5), 732-40 (2004).
Finite-Element Model for Wood-Based Floors with Lateral Reinforcements. — Lei Jiang, Lin Hu, and Ying-Hei Chui; 130(7), 1097-107 (2004).

Connections, welded

Improved Truss Model for Design of Welded Steel Moment-Resisting Frame Connections. — Jaswant N. Arlekar and C. V. R. Murty; 130(3), 498-510 (2004).

Constitutive models

Tension-Stiffening Model for Cracked Flexural Concrete Members. — Ll. Torres, F. López-Almansa, and L. M. Bozzo; 130(8), 1242-51 (2004).
Modeling Material Failure in Concrete Structures under Cyclic Actions. — Rui Faria, Javier Oliver, and Miguel Cervera; 130(12), 1997-2005 (2004).

Control

Active Tensegrity Structure. — Etienne Fest, Kristina Shea, and Ian F. C. Smith; 130(10), 1454-65 (2004).

Control equipment

Modeling the Dynamic Behavior of Electrical Cabinets and Control Panels: Experimental and Analytical Results. — Sudhir Rustogi and Abhinav Gupta; 130(3), 511-9 (2004).

Correlation

Combination of Modal Responses Consistent with Seismic Input Representation. — P. Cacciola, P. Colajanni, and G. Muscolino; 130(1), 47-55 (2004).

Corrosion

Bridge Deck Replacement for Minimum Expected Cost Under Multiple Reliability Constraints. — Mark G. Stewart, Allen C. Estes, and Dan M. Frangopol; 130(9), 1414-9 (2004).
Cellular Automata Approach to Durability Analysis of Concrete Structures in Aggressive Environments. — Fabio Biondini, Franco Bontempi, Dan M. Frangopol, and Pier Giorgio Malerba; 130(11), 1724-37 (2004).

Corrosion control

Structural Assessment of Corroded Reinforced Concrete Beams: Modeling Guidelines. — D. Coronelli and P. Gambarova; 130(8), 1214-24 (2004).

Costs

Prediction of Reliability and Cost Profiles of Deteriorating Bridges under Time- and Performance-Controlled Maintenance. — Jung S. Kong and Dan M. Frangopol; 130(12), 1865-74 (2004).

Coupled walls

Inelastic Dynamic Behavior of Hybrid Coupled Walls. — Mohammad Hassan and Sherif El-Tawil; 130(2), 285-96 (2004).
Posttensioned Hybrid Coupled Walls under Lateral Loads. — Yahya C. Kurama and Qiang Shen; 130(2), 297-309 (2004).
Parametric Study of Coupled Wall Behavior—Implications for the Design of Coupling Beams. — Kent A. Harries, J. Dan'l Moulton, and Robert L. Clemson; 130(3), 480-8 (2004).

Coupling

Posttensioned Hybrid Coupled Walls under Lateral Loads. — Yahya C. Kurama and Qiang Shen; 130(2), 297-309 (2004).
Parametric Study of Coupled Wall Behavior—Implications for the Design of Coupling Beams. — Kent A. Harries, J. Dan'l Moulton, and Robert L. Clemson; 130(3), 480-8 (2004).

Crack propagation

Numerical Analysis of Mixed-Mode Fracture in Concrete Using Extended Fictitious Crack Model. — Zihai Shi; 130(11), 1738-47 (2004).

Cracking

Lateral Load Behavior of Masonry Infilled Steel Frames with Repair and Retrofit. — H. A. Moghaddam; 130(1), 56-63 (2004).
Fatigue Performance of Cracked Tubular T Joints under Combined Loads. I: Experimental. — Sing-Ping Chiew, Seng-Tjhen Lie, Chi-King Lee, and Zhi-Wei Huang; 130(4), 562-71 (2004).
Fatigue Performance of Cracked Tubular T Joints under Combined Loads. II: Numerical. — Seng-Tjhen Lie, Sing-Ping Chiew, Chi-King Lee, and Zhi-Wei Huang; 130(4), 572-81 (2004).
Modeling Soil/Structure Interaction for Masonry

Structures. — Mark J. Masia, Peter W. Kleeman, and Robert E. Melchers; 130(4), 641-9 (2004).
Masonry Wall Damage by Restraint to Shrinkage. — G. P. A. G. van Zijl, P. A. de Vries, and A. T. Vermeltfoort; 130(7), 1075-86 (2004).
Influence of Concrete Cover on Fire Resistance of Reinforced Concrete Flexural Members. — Xudong Shi, Teng-Hooi Tan, Kang-Hai Tan, and Zhenhai Guo; 130(8), 1225-32 (2004).
Tension-Stiffening Model for Cracked Flexural Concrete Members. — Ll. Torres, F. López-Almansa, and L. M. Bozzo; 130(8), 1242-51 (2004).
Long-Term Effects on Response of Reinforced Concrete Columns to Cyclic Loading. — A. E. Schultz, S. S. Welton, and L. E. Rey; 130(9), 1320-32 (2004).
Numerical Analysis of Mixed-Mode Fracture in Concrete Using Extended Fictitious Crack Model. — Zihai Shi; 130(11), 1738-47 (2004).

Creep

Long-Term Effects on Response of Reinforced Concrete Columns to Cyclic Loading. — A. E. Schultz, S. S. Welton, and L. E. Rey; 130(9), 1320-32 (2004).
Effects of Sustained Load on Concrete-Filled Hollow Structural Steel Columns. — Lin-Hai Han, Zhong Tao, and Wei Liu; 130(9), 1392-404 (2004).

Critical loads

Buckling of Linear Structures above the Surface and/or Underground. — Sohrab Baghery; 130(11), 1748-55 (2004).

Cross sections

Analytical Approach to Failure Surfaces in Reinforced Concrete Sections Subjected to Axial Loads and Biaxial Bending. — J. L. Bonet, P. F. Miguel, M. A. Fernandez, and M. L. Romero; 130(12), 2006-15 (2004).

Crosswind

Directional Wind-Induced Fatigue of Slender Vertical Structures. — Maria Pia Repetto and Giovanni Solari; 130(7), 1032-40 (2004).

Cyclic loads

Outrigger Beam–Wall Connections. I: Component Testing and Development of Design Model. — Bahram M. Shahrooz, Jeremy T. Deason, and Gokhan Tunc; 130(2), 253-61 (2004).
Outrigger Beam–Wall Connections. II: Subassembly Testing and Further Modeling Enhancements. — Bahram M. Shahrooz, Gokhan Tunc, and Jeremy T. Deason; 130(2), 262-70 (2004).
Bidirectional Tests on Partially Restrained, Composite Beam-to-Column Connections. — Travis P. Green, Roberto T. Leon, and Gian A. Rassati; 130(2), 320-7 (2004).
Component Modeling of Partially Restrained Composite Joints under Cyclic and Dynamic Loading. — G. A. Rassati, R. T. Leon, and S. Noè; 130(2), 343-51 (2004).
Concrete-Filled Steel Tubes Subjected to Axial Compression and Lateral Cyclic Loads. — Amir Fam, Frank S. Qie, and Sami Rizkalla; 130(4), 631-40 (2004).
Similitude Law of Prefracture Hysteresis of Steel Members. — Hitoshi Kuwamura and Naoto Takagi; 130(5), 752-61 (2004).
Characterization of Cyclic Behavior of Dry Masonry Joints. — Paulo B. Lourenço and Luís F. Ramos; 130(5), 779-86 (2004).
Reversed In-Plane Cyclic Behavior of Posttensioned Clay Brick Masonry Walls. — Owen A. Rosenboom and Mervyn J. Kowalsky; 130(5), 787-98 (2004).
Cyclic Bending Tests to Determine Fully Ductile Section Slenderness Limits for Cold-Formed Circular Hollow Sections. — Mohamed Elchalakani, Xiao-Ling Zhao, and Raphael Grzebieta; 130(7), 1001-10 (2004).
Behavior of Timber Pile-to-Cap Connections under Cyclic Lateral Loading. — Ayman. A. Shama and John B. Mander; 130(8), 1252-62 (2004).
Long-Term Effects on Response of Reinforced Concrete Columns to Cyclic Loading. — A. E. Schultz, S. S. Welton, and L. E. Rey; 130(9), 1320-32 (2004).
Tests on Cyclic Behavior of Concrete-Filled Hollow Structural Steel Columns after Exposure to the ISO-834 Standard Fire. — Lin-Hai Han and Xiao-Kang Lin; 130(11), 1807-19 (2004).
Modeling Material Failure in Concrete Structures under Cyclic Actions. — Rui Faria, Javier Oliver, and Miguel Cervera; 130(12), 1997-2005 (2004).

Cyclic tests

Cyclic Properties of Superelastic Shape Memory Alloy Wires and Bars. — Reginald DesRoches, Jason McCormick, and Michael Delemont; 130(1), 38-46 (2004).
Moment Connections to Circular Concrete-Filled Steel Tube Columns. — Atorod Azizinamini and Stephen P. Schneider; 130(2), 213-22 (2004).
Cyclic Behavior of Traditional and Innovative Composite Shear Walls. — Qiuhong Zhao and Abolhassan Astaneh-Asl; 130(2), 271-84 (2004).
Effects of Reference Displacement and Damage Accumulation in Wood Shear Walls. — Jeffrey D. Langlois, Rakesh Gupta, and Thomas H. Miller; 130(3), 470-9 (2004).
Steel Beam-Column Connections Using Shape Memory Alloys. — Justin Ocel, Reginald DesRoches, Roberto T. Leon, W. Gregory Hess, Robert Krumme, Jack R. Hayes, and Steve Sweeney; 130(5), 732-40 (2004).
Seismic Retrofit of Concrete-Masonry-Infilled Steel Frames with Glass Fiber-Reinforced Polymer Laminates. — Wael W. El-Dakhakhni, Ahmad A. Hamid, and Mohamed Elgaaly; 130(9), 1343-52 (2004).
Moment–Rotation Parameters for Composite Shear Tab Connections. — Judy Liu and Abolhassan Astaneh-Asl; 130(9), 1371-80 (2004).

Cylinders

Medium-Length Thin-Walled Cylinder under Wind Loading—Case Study. — M. Pircher; 130(12), 2062-9 (2004).

Damage

Effects of Reference Displacement and Damage Accumulation in Wood Shear Walls. — Jeffrey D. Langlois, Rakesh Gupta, and Thomas H. Miller; 130(3), 470-9 (2004).
Hurricane Damage Prediction Model for Residential Structures. — Jean-Paul Pinelli, Emil Simiu, Kurt Gurley, Chelakara Subramanian, Liang Zhang, Anne Cope, James J. Filliben, and Shahid Hamid; 130(11), 1685-91 (2004).
Modeling Material Failure in Concrete Structures under Cyclic Actions. — Rui Faria, Javier Oliver, and Miguel Cervera; 130(12), 1997-2005 (2004).

Damage assessment

Statistical Wavelet-Based Method for Structural Health Monitoring. — Z. Sun and C. C. Chang; 130(7), 1055-62 (2004).
Cellular Automata Approach to Durability Analysis of Concrete Structures in Aggressive Environments. — Fabio Biondini, Franco Bontempi, Dan M. Frangopol, and Pier Giorgio Malerba; 130(11), 1724-37 (2004).
Experimental and Analytical Study of Masonry Infill Reinforced Concrete Frames Retrofitted with Steel Braces. — Ricardo Perera, Susana Gómez, and Enrique Alarcón; 130(12), 2032-9 (2004).

Damping

Cyclic Properties of Superelastic Shape Memory Alloy Wires and Bars. — Reginald DesRoches, Jason McCormick, and Michael Delemont; 130(1), 38-46 (2004).
Seismic Response of Full-Scale Structure with Added Viscoelastic Dampers. — Kuo-Chun Chang and Yu-Yuan Lin; 130(4), 600-8 (2004).
Seismic Response Analysis of a Highway Overcrossing Equipped with Elastomeric Bearings and Fluid Dampers. — Nicos Makris and Jian Zhang; 130(6), 830-45 (2004).
Structural Characterization of Modern Highway Overcrossings—Case Study. — Jian Zhang, Nicos Makris, and Tim Delis; 130(6), 846-60 (2004).
Rocking Wall–Frame Structures with Supplemental Tendon Systems. — Jack J. Ajrab, Gokhan Pekcan, and John B. Mander; 130(6), 895-903 (2004).
Shear-Mode Rotary Magnetorheological Damper for Small-Scale Structural Control Experiments. — Tim Tse and C. C. Chang; 130(6), 904-11 (2004).
Bound of Earthquake Input Energy. — Izuru Takewaki; 130(9), 1289-97 (2004).
Effects of Site Classes on Damping Reduction Factors. — Yu-Yuan Lin and Kuo-Chung Chang; 130(11), 1667-75 (2004).
Applicability of Seismic Protective Systems to Structures with Vibration-Sensitive Equipment. — J. S. Hwang, Y. N. Huang, Y. H. Hung, and J. C. Huang; 130(11), 1676-84 (2004).

Data processing

Characterizing Nonstationary Wind Speed Using Empirical Mode Decomposition. — Y. L. Xu and J. Chen; 130(6), 912-20 (2004).

Decks

Design of I Beams and Deck Profiles under Concentrated Loading. — Tore Tryland, Per K. Larsen, and Magnus Langseth; 130(3), 411-22 (2004).
Composite Shear Stud Strength at Early Concrete Ages. — Cem Topkaya, Joseph A. Yura, and Eric B. Williamson; 130(6), 952-60 (2004).

Decomposition

Statistical Wavelet-Based Method for Structural Health Monitoring. — Z. Sun and C. C. Chang; 130(7), 1055-62 (2004).

Deflection
Elastoplastic and Large Deflection Analysis of Steel Frames by One Element per Member. I: One Hinge along Member. — Zhi-Hua Zhou and Siu-Lai Chan; 130(4), 538-44 (2004).
Elastoplastic and Large Deflection Analysis of Steel Frames by One Element per Member. II: Three Hinges along Member. — Siu-Lai Chan and Zhi-Hua Zhou; 130(4), 545-53 (2004).
Simplified Nonlinear Analysis of Strengthened Concrete Beams Based on a Rigorous Approach. — Hayder A. Rasheed, Hasan Charkas, and Hani Melhem; 130(7), 1087-96 (2004).

Deformation
Estimation of Seismic Demands on Isolators Based on Nonlinear Analysis. — Keri L. Ryan and Anil K. Chopra; 130(3), 392-402 (2004).
Inelastic Deformation Ratios for Design and Evaluation of Structures: Single-Degree-of-Freedom Bilinear Systems. — Anil K. Chopra and Chatpan Chintanapakdee; 130(9), 1309-19 (2004).
Long-Term Effects on Response of Reinforced Concrete Columns to Cyclic Loading. — A. E. Schultz, S. S. Welton, and L. E. Rey; 130(9), 1320-32 (2004).
Stiffness and Deflection of Steel–Concrete Composite Beams under Negative Bending. — Jianguo Nie, Jiansheng Fan, and C. S. Cai; 130(11), 1842-51 (2004).
Medium-Length Thin-Walled Cylinder under Wind Loading—Case Study. — M. Pircher; 130(12), 2062-9 (2004).

Deformation analysis
Single Plate Shear Connection Response to Rotation Demands Imposed by Frames Undergoing Cyclic Lateral Displacements. — Joseph P. Crocker and Janice J. Chambers; 130(6), 934-41 (2004).

Design
Compressive Strength of Solid Round Steel Bars. — Khaled Sennah and John Wahba; 130(1), 147-51 (2004).
Parametric Study of Coupled Wall Behavior—Implications for the Design of Coupling Beams. — Kent A. Harries, J. Dan'l Moulton, and Robert L. Clemson; 130(3), 480-8 (2004).
Strength and Design of Open Web Steel Joists with Crimped-End Web Members. — Joseph Robert Yost, David W. Dinehart, Shawn P. Gross, Joseph J. Pote, and Brian Gargan; 130(5), 715-24 (2004).
Design of Space Trusses Using Ant Colony Optimization. — Charles V. Camp and Barron J. Bichon; 130(5), 741-51 (2004).
Modern Approach of Design of Welded Components Subjected to Fatigue Loading. — Abir Ghosh; 130(5), 812-20 (2004).
Effects of Sustained Load on Concrete-Filled Hollow Structural Steel Columns. — Lin-Hai Han, Zhong Tao, and Wei Liu; 130(9), 1392-404 (2004).
Design of Stiffened Elements in Cold-Formed Stainless Steel Sections. — Kim J. R. Rasmussen, Tim Burns, and Paul Bezkorovainy; 130(11), 1764-71 (2004).

Design improvements
Masonry Wall Damage by Restraint to Shrinkage. — G. P. A. G. van Zijl, P. A. de Vries, and A. T. Vermeltfoort; 130(7), 1075-86 (2004).

Design standards
Alternative Approaches for Elastic Analysis and Design of Steel Frames. I: Overview. — Andrea E. Surovek-Maleck and Donald W. White; 130(8), 1186-96 (2004).
Alternative Approaches for Elastic Analysis and Design of Steel Frames. II: Verification Studies. — Andrea E. Surovek-Maleck and Donald W. White; 130(8), 1197-205 (2004).

Deterioration
Cost–Reliability Interaction in Life-Cycle Cost Optimization of Deteriorating Structures. — Jung S. Kong and Dan M. Frangopol; 130(11), 1704-12 (2004).
Prediction of Reliability and Cost Profiles of Deteriorating Bridges under Time- and Performance-Controlled Maintenance. — Jung S. Kong and Dan M. Frangopol; 130(12), 1865-74 (2004).
Lifetime Performance Analysis of Existing Steel Girder Bridge Superstructures. — Ferhat Akgül and Dan M. Frangopol; 130(12), 1875-88 (2004).

Dilatancy
Characterization of Cyclic Behavior of Dry Masonry Joints. — Paulo B. Lourenço and Luís F. Ramos; 130(5), 779-86 (2004).

Disasters
Hurricane Damage Prediction Model for Residential Structures. — Jean-Paul Pinelli, Emil Simiu, Kurt Gurley, Chelakara Subramanian, Liang Zhang, Anne Cope, James J. Filliben, and Shahid Hamid; 130(11), 1685-91 (2004).

Displacement
Experimental Investigation of Unreinforced Brick Masonry Walls in Flexure. — Michael Craig Griffith, Nelson T. K. Lam, John Leonard Wilson, and Kevin Doherty; 130(3), 423-32 (2004).
Displacement-Based Design of Slender Reinforced Concrete Structural Walls—Experimental Verification. — John H. Thomsen, IV, and John W. Wallace; 130(4), 618-30 (2004).
Single Plate Shear Connection Response to Rotation Demands Imposed by Frames Undergoing Cyclic Lateral Displacements. — Joseph P. Crocker and Janice J. Chambers; 130(6), 934-41 (2004).
Effects of Site Classes on Damping Reduction Factors. — Yu-Yuan Lin and Kuo-Chung Chang; 130(11), 1667-75 (2004).
Inelastic Displacement Ratios for Design of Structures on Soft Soils Sites. — Jorge Ruiz-García and Eduardo Miranda; 130(12), 2051-61 (2004).

Dowels
Improved Analysis of Timber Rivet Connections. — Douglas C. Stahl, Ronald W. Wolfe, and Marshall Begel; 130(8), 1272-9 (2004).

Drift
Reversed In-Plane Cyclic Behavior of Posttensioned Clay Brick Masonry Walls. — Owen A. Rosenboom and Mervyn J. Kowalsky; 130(5), 787-98 (2004).

Ductility
Behavior of Eccentrically Loaded Concrete-Filled Steel Tubular Columns. — Toshiaki Fujimoto, Akiyoshi Mukai, Isao Nishiyama, and Kenji Sakino; 130(2), 203-12 (2004).
Inelastic Force-Deformation Response of Joint Shear Panels in Beam-Column Moment Connections to Concrete-Filled Tubes. — Isao Nishiyama, Toshiaki Fujimoto, Toshiyuki Fukumoto, and Kenzo Yoshioka; 130(2), 244-52 (2004).
Guidelines: Seismic Design of Composite Reinforced Concrete and Steel Buildings. — Isao Nishiyama, Hiroshi Kuramoto, and Hiroshi Noguchi; 130(2), 336-42 (2004).
Neutral Axis Depth versus Flexural Ductility in High-Strength Concrete Beams. — L. F. A. Bernardo and S. M. R. Lopes; 130(3), 452-9 (2004).
Experimental and Analytical Reexamination of Classic Concrete Beam Tests. — F. J. Vecchio and W. Shim; 130(3), 460-9 (2004).
Experimental Study of Jumbo Size Reduced Beam Section Connections Using High-Strength Steel. — Sheng-Jin Chen and Chin-Te Tu; 130(4), 582-7 (2004).
Pre- and Postyield Finite Element Method Simulation of Bond of Ribbed Reinforcing Bars. — Hamed M. Salem and Koichi Maekawa; 130(4), 671-80 (2004).
Similitude Law of Prefracture Hysteresis of Steel Members. — Hitoshi Kuwamura and Naoto Takagi; 130(5), 752-61 (2004).
Behavior and Modeling of Fiber Reinforced Polymer-Confined Concrete. — J. G. Teng and L. Lam; 130(11), 1713-23 (2004).
Improving the Ductility of Knee Joints between Rectangular Hollow Sections. — Lip H. Teh and Gregory J. Hancock; 130(11), 1790-8 (2004).
Tests on Cyclic Behavior of Concrete-Filled Hollow Structural Steel Columns after Exposure to the ISO-834 Standard Fire. — Lin-Hai Han and Xiao-Kang Lin; 130(11), 1807-19 (2004).

Durability
Durability of Galvanized Light-Gauge Steel Shapes. — Y. Sakumoto, H. Nomura, M. Matsumoto, A. Ninomiya, T. Miyao, and Y. Sakamoto; 130(1), 70-7 (2004).
Cellular Automata Approach to Durability Analysis of Concrete Structures in Aggressive Environments. — Fabio Biondini, Franco Bontempi, Dan M. Frangopol, and Pier Giorgio Malerba; 130(11), 1724-37 (2004).

Dynamic analysis
Seismic Response of Vertically Irregular Frames: Response History and Modal Pushover Analyses. — Chatpan Chintanapakdee and Anil K. Chopra; 130(8), 1177-85 (2004).
Seismic Analysis of Woodframe Structures. I: Model Formulation. — Bryan Folz and Andre Filiatrault; 130(9), 1353-60 (2004).
Seismic Analysis of Woodframe Structures. II: Model Implementation and Verification. — Bryan Folz and Andre Filiatrault; 130(9), 1361-70 (2004).

Dynamic loads
Experimental Investigation of a Small-Scale Bridge Model under a Moving Mass. — Cristiano Bilello, Lawrence A. Bergman, and Daniel Kuchma; 130(5), 799-804 (2004).

Dynamic models
Model for Lateral Excitation of Footbridges by Synchronous Walking. — Shun-ichi Nakamura; 130(1), 32-7 (2004).

Dynamic tests
Seismic Response of Electrical Substation Equipment Interconnected by Flexible Conductors. — André Filiatrault and Christopher Stearns; 130(5), 769-78 (2004).

Dynamics
Hybrid Feedback-Least Mean Square Algorithm for Structural Control. — Hongjin Kim and Hojjat Adeli; 130(1), 120-7 (2004).
Wavelet-Hybrid Feedback-Least Mean Square Algorithm for Robust Control of Structures. — Hojjat Adeli and Hongjin Kim; 130(1), 128-37 (2004).

Earthquake damage
Performance Evaluation of Damaged Steel Frame Buildings Subjected to Seismic Loads. — Kihak Lee and Douglas A. Foutch; 130(4), 588-99 (2004).
Role of Damage Functions in Evaluation of Response Modification Factors. — Luis D. Decanini, Silvia Bruno, and Fabrizio Mollaioli; 130(9), 1298-308 (2004).
Shear Strength Model for Lightly Reinforced Concrete Columns. — Halil Sezen and Jack P. Moehle; 130(11), 1692-703 (2004).

Earthquake engineering
Cyclic Behavior of Traditional and Innovative Composite Shear Walls. — Qiuhong Zhao and Abolhassan Astaneh-Asl; 130(2), 271-84 (2004).
Effect of Column Stiffness on Braced Frame Seismic Behavior. — Gregory A. MacRae, Yoshihiro Kimura, and Charles Roeder; 130(3), 381-91 (2004).
Performance Evaluation of Damaged Steel Frame Buildings Subjected to Seismic Loads. — Kihak Lee and Douglas A. Foutch; 130(4), 588-99 (2004).
Experimental Evaluation of the Seismic Performance of Reinforced Concrete Bridge Columns. — Dawn Lehman, Jack Moehle, Stephen Mahin, Anthony Calderone, and Lena Henry; 130(6), 869-79 (2004).
Moment–Rotation Parameters for Composite Shear Tab Connections. — Judy Liu and Abolhassan Astaneh-Asl; 130(9), 1371-80 (2004).
Shear Strength Model for Lightly Reinforced Concrete Columns. — Halil Sezen and Jack P. Moehle; 130(11), 1692-703 (2004).

Earthquake loads
Experimental Investigation of Unreinforced Brick Masonry Walls in Flexure. — Michael Craig Griffith, Nelson T. K. Lam, John Leonard Wilson, and Kevin Doherty; 130(3), 423-32 (2004).
Assessment of Steel and Fiber Reinforced Plastic Jackets for Seismic Retrofit of Reinforced Concrete Columns with Structural Flares. — M. Saiid Saiidi, Frank Martinovic, Brett McElhaney, David Sanders, and Faramarz Gordaninejad; 130(4), 609-17 (2004).

Earthquake resistant structures
Seismic Behavior and Design of High-Strength Square Concrete-Filled Steel Tube Beam Columns. — Amit H. Varma, James M. Ricles, Richard Sause, and Le-Wu Lu; 130(2), 169-79 (2004).
Seismic Behavior of Reinforced Concrete Column-Steel Beam Subassemblies and Frame Systems. — Xuemei Liang and Gustavo J. Parra-Montesinos; 130(2), 310-9 (2004).
Adapting the CQC3 Rule for Three Seismic Components with Different Spectra. — Oscar A. López, Anil K. Chopra, and Julio J. Hernández; 130(3), 403-10 (2004).
Similitude Law of Prefracture Hysteresis of Steel Members. — Hitoshi Kuwamura and Naoto Takagi; 130(5), 752-61 (2004).
Seismic Analysis of Asymmetric Buildings with Flexible Floor Diaphragms. — Dhiman Basu and Sudhir K. Jain; 130(8), 1169-76 (2004).

Earthquakes
Hybrid Feedback-Least Mean Square Algorithm for Structural Control. — Hongjin Kim and Hojjat Adeli; 130(1), 120-7 (2004).
Wavelet-Hybrid Feedback-Least Mean Square Algorithm for Robust Control of Structures. — Hojjat Adeli and Hongjin Kim; 130(1), 128-37 (2004).
Seismic Response of Full-Scale Structure with Added Viscoelastic Dampers. — Kuo-Chun Chang and Yu-Yuan Lin; 130(4), 600-8 (2004).
Displacement-Based Design of Slender Reinforced Concrete Structural Walls—Experimental Verification. — John H. Thomsen, IV, and John W. Wallace; 130(4), 618-30 (2004).
Seismic Response of Electrical Substation Equipment Interconnected by Flexible Conductors. — André Filiatrault and Christopher Stearns; 130(5), 769-78 (2004).
Earthquake Duration Effect on Structural Reliability. — John W. van de Lindt and Ginhuat Goh; 130(5), 821-6 (2004).
Performance of a Seismically Isolated Bridge under Near-Fault Earthquake Ground Motions. — Jerry Shen, Meng-Hao Tsai, Kuo-Chun Chang, and George C. Lee; 130(6), 861-8 (2004).
Shear-Mode Rotary Magnetorheological Damper for Small-Scale Structural Control Experiments. — Tim Tse and C. C. Chang; 130(6), 904-11 (2004).
Socioeconomic Implications of Life Quality Index in Design of Optimum Structures to Withstand Earthquakes. — Mauricio Sánchez-Silva and Rüdiger Rackwitz; 130(6), 969-77 (2004).
Bound of Earthquake Input Energy. — Izuru Takewaki; 130(9), 1289-97 (2004).
Fragility Assessment of Light-Frame Wood Construction Subjected to Wind and Earthquake Hazards. — Bruce R. Ellingwood, David V. Rosowsky, Yue Li, and Jun Hee Kim; 130(12), 1921-30 (2004).

Eccentric bracing
Experimental and Analytical Study of Masonry Infill Reinforced Concrete Frames Retrofitted with Steel Braces. — Ricardo Perera, Susana Gómez, and Enrique Alarcón; 130(12), 2032-9 (2004).

Effective length
Alternative Approaches for Elastic Analysis and Design of Steel Frames. I: Overview. — Andrea E. Surovek-Maleck and Donald W. White; 130(8), 1186-96 (2004).
Alternative Approaches for Elastic Analysis and Design of Steel Frames. II: Verification Studies. — Andrea E. Surovek-Maleck and Donald W. White; 130(8), 1197-205 (2004).

Effective width
Effective Widths of Unstiffened Elements with Stress Gradient. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1611-9 (2004).

Elastic analysis
Adapting the CQC3 Rule for Three Seismic Components with Different Spectra. — Oscar A. López, Anil K. Chopra, and Julio J. Hernández; 130(3), 403-10 (2004).

Elasticity
Biaxial Bending of Steel Angle Section Beams. — N. S. Trahair; 130(4), 554-61 (2004).
Elastic Stability of Planar Steel Frames with Unsymmetrical Beam Loading. — A. H. Salem, F. F. El Dib, M. El Aghoury, and M. T. Hanna; 130(11), 1852-9 (2004).

Elastomer
Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. I: Experimental Study. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1119-32 (2004).
Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. II: Modeling. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1133-44 (2004).

Elastoplasticity
Elastoplastic and Large Deflection Analysis of Steel Frames by One Element per Member. I: One Hinge along Member. — Zhi-Hua Zhou and Siu-Lai Chan; 130(4), 538-44 (2004).
Elastoplastic and Large Deflection Analysis of Steel Frames by One Element per Member. II: Three Hinges along Member. — Siu-Lai Chan and Zhi-Hua Zhou; 130(4), 545-53 (2004).
Earthquake Duration Effect on Structural Reliability. — John W. van de Lindt and Ginhuat Goh; 130(5), 821-6 (2004).
Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. II: Modeling. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1133-44 (2004).

Electrical equipment
Modeling the Dynamic Behavior of Electrical Cabinets and Control Panels: Experimental and Analytical Results. — Sudhir Rustogi and Abhinav Gupta; 130(3), 511-9 (2004).
Seismic Response of Electrical Substation Equipment Interconnected by Flexible Conductors. — André Filiatrault and Christopher Stearns; 130(5), 769-78 (2004).

Energy dissipation
Rocking Wall–Frame Structures with Supplemental Tendon Systems. — Jack J. Ajrab, Gokhan Pekcan, and John B. Mander; 130(6), 895-903 (2004).
Behavior of Torsionally Coupled Structures with Variable Frequency Pendulum Isolator. — Pranesh Murnal and Ravi Sinha; 130(7), 1041-54 (2004).
Long-Term Effects on Response of Reinforced Concrete Columns to Cyclic Loading. — A. E. Schultz, S. S. Welton, and L. E. Rey; 130(9), 1320-32 (2004).
Applicability of Seismic Protective Systems to Structures with Vibration-Sensitive Equipment. — J. S. Hwang, Y. N. Huang, Y. H. Hung, and J. C. Huang; 130(11), 1676-84 (2004).

Excitation
Characterization and Modeling of Friction Pendulum Bearings Subjected to Multiple Components of Excitation. — Gilberto Mosqueda, Andrew S. Whittaker, and Gregory L. Fenves; 130(3), 433-42 (2004).
Bound of Earthquake Input Energy. — Izuru Takewaki; 130(9), 1289-97 (2004).

Expansive soils
Modeling Soil/Structure Interaction for Masonry Structures. — Mark J. Masia, Peter W. Kleeman, and Robert E. Melchers; 130(4), 641-9 (2004).

Experimental data
Seismic Behavior and Design of High-Strength Square Concrete-Filled Steel Tube Beam Columns. — Amit H. Varma, James M. Ricles, Richard Sause, and Le-Wu Lu; 130(2), 169-79 (2004).
Component Testing, Seismic Evaluation and Characterization of Buckling-Restrained Braces. — Cameron J. Black, Nicos Makris, and Ian D. Aiken; 130(6), 880-94 (2004).
Masonry Wall Damage by Restraint to Shrinkage. — G. P. A. G. van Zijl, P. A. de Vries, and A. T. Vermeltfoort; 130(7), 1075-86 (2004).
Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. I: Experimental Study. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1119-32 (2004).
Behavior of Timber Pile-to-Cap Connections under Cyclic Lateral Loading. — Ayman. A. Shama and John B. Mander; 130(8), 1252-62 (2004).

Experimentation
Characterization and Modeling of Friction Pendulum Bearings Subjected to Multiple Components of Excitation. — Gilberto Mosqueda, Andrew S. Whittaker, and Gregory L. Fenves; 130(3), 433-42 (2004).
Experimental and Analytical Modal Analysis of Steel Arch Bridge. — Wei-Xin Ren, Tong Zhao, and Issam E. Harik; 130(7), 1022-31 (2004).
Tests and Design of Fixed-Ended Cold-Formed Steel Plain Angle Columns. — Ben Young; 130(12), 1931-40 (2004).

Explosions
Explosion and Fire Analysis of Steel Frames Using Fiber Element Approach. — J. Y. Richard Liew and Hong Chen; 130(7), 991-1000 (2004).

Failure modes
Design of Cold-Formed Steel Channel Columns with Complex Edge Stiffeners by Direct Strength Method. — Ben Young and Jintang Yan; 130(11), 1756-63 (2004).

Failures
Failure of Lightly Reinforced Concrete Members under Fire. I: Analytical Modeling. — B. A. Izzuddin and A. Y. Elghazouli; 130(1), 3-17 (2004).
Failure of Lightly Reinforced Concrete Members under Fire. II: Parametric Studies and Design Considerations. — A. Y. Elghazouli and B. A. Izzuddin; 130(1), 18-31 (2004).
Impact of New ACI 318 Flexural Resistance Factor on Bond Failures. — Christopher R. Scollard and F. Michael Bartlett; 130(1), 138-46 (2004).
Size Effect in Axially Loaded Reinforced Concrete Columns. — Sıddık Şener, Ben I. G. Barr, and Hadi F. Abusiaf ; 130(4), 662-70 (2004).
Characterization of Cyclic Behavior of Dry Masonry Joints. — Paulo B. Lourenço and Luís F. Ramos; 130(5), 779-86 (2004).
Analytical Approach to Failure Surfaces in Reinforced Concrete Sections Subjected to Axial Loads and Biaxial Bending. — J. L. Bonet, P. F. Miguel, M. A. Fernandez, and M. L. Romero; 130(12), 2006-15 (2004).

Fasteners
Finite-Element Model for Wood-Based Floors with Lateral Reinforcements. — Lei Jiang, Lin Hu, and Ying-Hei Chui; 130(7), 1097-107 (2004).

Fatigue
Fatigue Performance of Cracked Tubular T Joints under Combined Loads. I: Experimental. — Sing-Ping Chiew, Seng-Tjhen Lie, Chi-King Lee, and Zhi-Wei Huang; 130(4), 562-71 (2004).
Fatigue Performance of Cracked Tubular T Joints under Combined Loads. II: Numerical. — Seng-Tjhen Lie, Sing-Ping Chiew, Chi-King Lee, and Zhi-Wei Huang; 130(4), 572-81 (2004).
Similitude Law of Prefracture Hysteresis of Steel Members. — Hitoshi Kuwamura and Naoto Takagi; 130(5), 752-61 (2004).
Modern Approach of Design of Welded Components Subjected to Fatigue Loading. — Abir Ghosh; 130(5), 812-20 (2004).

Fatigue life
Directional Wind-Induced Fatigue of Slender Vertical Structures. — Maria Pia Repetto and Giovanni Solari; 130(7), 1032-40 (2004).

Feedback control
Hybrid Feedback-Least Mean Square Algorithm for Structural Control. — Hongjin Kim and Hojjat Adeli; 130(1), 120-7 (2004).
Wavelet-Hybrid Feedback-Least Mean Square Algorithm for Robust Control of Structures. — Hojjat Adeli and Hongjin Kim; 130(1), 128-37 (2004).

Fiber reinforced materials
Strength and Performance of Fiber-Reinforced Concrete Composite Slabs. — Carin L. Roberts-Wollmann, Marcela Guirola, and W. Samuel Easterling; 130(3), 520-8 (2004).

Fiber reinforced plastics
Simplified Nonlinear Analysis of Strengthened Concrete Beams Based on a Rigorous Approach. — Hayder A. Rasheed, Hasan Charkas, and Hani Melhem; 130(7), 1087-96 (2004).
Seismic Retrofit of Concrete-Masonry-Infilled Steel Frames with Glass Fiber-Reinforced Polymer Laminates. — Wael W. El-Dakhakhni, Ahmad A. Hamid, and Mohamed Elgaaly; 130(9), 1343-52 (2004).

Fiber reinforced polymers
Behavior and Modeling of Fiber Reinforced Polymer-Confined Concrete. — J. G. Teng and L. Lam; 130(11), 1713-23 (2004).

Field tests
Seismic Response of Full-Scale Structure with Added Viscoelastic Dampers. — Kuo-Chun Chang and Yu-Yuan Lin; 130(4), 600-8 (2004).

Finite element method
Thrust Restraint Design of Concrete Pressure Pipe. — Mehdi S. Zarghamee, Daniel W. Eggers, Rasko P. Ojdrovic, and Daniel P. Valentine; 130(1), 95-107 (2004).
Inelastic Dynamic Behavior of Hybrid Coupled Walls. — Mohammad Hassan and Sherif El-Tawil; 130(2), 285-96 (2004).
Finite Element Method Analysis of Hybrid Structural Frames with Reinforced Concrete Columns and Steel Beams. — Hiroshi Noguchi and Kazuhiro Uchida; 130(2), 328-35 (2004).
Local Buckling of Steel Plates in Double Skin Composite Panels under Biaxial Compression and Shear. — Qing Quan Liang, Brian Uy, Howard D. Wright, and Mark A. Bradford; 130(3), 443-51 (2004).
Finite-Element Model for Collapse and Long-Term Analysis of Steel–Concrete Composite Beams. — M. Fragiacomo, C. Amadio, and L. Macorini; 130(3), 489-97 (2004).
Improved Truss Model for Design of Welded Steel Moment-Resisting Frame Connections. — Jaswant N. Arlekar and C. V. R. Murty; 130(3), 498-510 (2004).
Design Expressions Based on a Finite Element Model of a Stiffened Cold-Formed Steel C-Section. — Steven R. Fox and G. Wayne Brodland; 130(5), 708-14 (2004).
Finite Element Analysis Simulation of Airport Approach Lighting Towers. — D. G. Zimcik, M. Nejad Ensan, S. T. Jenq, and M. C. Chao; 130(5), 805-11 (2004).
Analysis of the Influence of Tensile Strength on the Stability of Eccentrically Compressed Slender Unreinforced Masonry Walls Under Lateral Loads. — Mu Lu, Arturo E. Schultz, and Henryk K. Stolarski; 130(6), 921-33 (2004).
Analysis and Design of Double-Sided High-Rise Steel Pallet Rack Frames. — Lip H. Teh, Gregory J. Hancock, and Murray J. Clarke; 130(7), 1011-21 (2004).
Finite-Element Model for Wood-Based Floors with Lateral Reinforcements. — Lei Jiang, Lin Hu, and Ying-Hei Chui; 130(7), 1097-107 (2004).
Computer Modeling of Restrained Reinforced Concrete Slabs in Fire Conditions. — Linus Lim, Andrew Buchanan, Peter Moss, and Jean-Marc Franssen; 130(12), 1964-71 (2004).

Finite elements
Finite Element Idealization of a Cold-Formed Steel Portal Frame. — James B. P. Lim and David A. Nethercot; 130(1), 78-94 (2004).
Nonlinear Analysis of Steel-Concrete Composite Structures: State of the Art. — Enrico Spacone and Sherif El-Tawil; 130(2), 159-68 (2004).
Experimental and Analytical Reexamination of Classic Concrete Beam Tests. — F. J. Vecchio and W. Shim; 130(3), 460-9 (2004).
T-Cleat Connections to Concrete-Filled Tubular Internal Columns. — Abdel-Kareem Al-Rodan; 130(5), 725-31 (2004).
Offshore Tubular T-Joints Reinforced with Internal Plain Annular Ring Stiffeners. — M. M. K. Lee and A. Llewelyn-Parry; 130(6), 942-51 (2004).
Structural Assessment of Corroded Reinforced Concrete Beams: Modeling Guidelines. — D. Coronelli and P. Gambarova; 130(8), 1214-24 (2004).
Response Sensitivity for Nonlinear Beam–Column Elements. — Michael H. Scott, Paolo Franchin, Gregory L. Fenves, and Filip C. Filippou; 130(9), 1281-8 (2004).
Realistic Modeling of Composite and Reinforced Concrete Floor Slabs under Extreme Loading. I: Analytical Method. — B. A. Izzuddin, X. Y. Tao, and A. Y. Elghazouli; 130(12), 1972-84 (2004).
Realistic Modeling of Composite and Reinforced Concrete Floor Slabs under Extreme Loading. II: Verification and Application. — A. Y. Elghazouli and B. A. Izzuddin; 130(12), 1985-96 (2004).

Fire hazards
Postbuckling Behavior of Axially Restrained and Axially Loaded Steel Columns under Fire Conditions. — Y. C. Wang; 130(3), 371-80 (2004).

Fire resistance
Nonlinear Plastic Hinge Analysis of Three-Dimensional Steel Frames in Fire. — K. Y. Ma and J. Y. Richard Liew; 130(7), 981-90 (2004).
Explosion and Fire Analysis of Steel Frames Using Fiber Element Approach. — J. Y. Richard Liew and Hong Chen; 130(7), 991-1000 (2004).
Influence of Concrete Cover on Fire Resistance of Reinforced Concrete Flexural Members. — Xu-dong Shi, Teng-Hooi Tan, Kang-Hai Tan, and Zhenhai Guo; 130(8), 1225-32 (2004).
Interaction Model for Unprotected Concrete Filled Steel Columns Under Standard Fire Conditions. — K. H. Tan and C. Y. Tang; 130(9), 1405-13 (2004).
Tests on Cyclic Behavior of Concrete-Filled Hollow Structural Steel Columns after Exposure to the ISO-834 Standard Fire. — Lin-Hai Han and Xiao-Kang Lin; 130(11), 1807-19 (2004).
Fire Resistance of Reinforced Concrete Columns Subjected to 1-, 2-, and 3-Face Heating. — K. H. Tan and Y. Yao; 130(11), 1820-8 (2004).
Computer Modeling of Restrained Reinforced Concrete Slabs in Fire Conditions. — Linus Lim, Andrew Buchanan, Peter Moss, and Jean-Marc Franssen; 130(12), 1964-71 (2004).

Fires
Failure of Lightly Reinforced Concrete Members under Fire. I: Analytical Modeling. — B. A. Izzuddin and A. Y. Elghazouli; 130(1), 3-17 (2004).
Failure of Lightly Reinforced Concrete Members under Fire. II: Parametric Studies and Design Considerations. — A. Y. Elghazouli and B. A. Izzuddin; 130(1), 18-31 (2004).
Realistic Modeling of Composite and Reinforced Concrete Floor Slabs under Extreme Loading. I: Analytical Method. — B. A. Izzuddin, X. Y. Tao, and A. Y. Elghazouli; 130(12), 1972-84 (2004).
Realistic Modeling of Composite and Reinforced Concrete Floor Slabs under Extreme Loading. II: Verification and Application. — A. Y. Elghazouli and B. A. Izzuddin; 130(12), 1985-96 (2004).

Flanges
Web Crippling Strength of Steel Deck Subjected to End One Flange Loading. — Onur Avci and W. Samuel Easterling; 130(5), 697-707 (2004).
Effective Flange Width Definition for Steel–Concrete Composite Bridge Girder. — Methee Chiewanichakorn, Amjad J. Aref, Stuart S. Chen, and Il-Sang Ahn; 130(12), 2016-31 (2004).

Flexural strength
Impact of New ACI 318 Flexural Resistance Factor on Bond Failures. — Christopher R. Scollard and F. Michael Bartlett; 130(1), 138-46 (2004).
Behavior of Eccentrically Loaded Concrete-Filled Steel Tubular Columns. — Toshiaki Fujimoto, Akiyoshi Mukai, Isao Nishiyama, and Kenji Sakino; 130(2), 203-12 (2004).
Reversed In-Plane Cyclic Behavior of Posttensioned Clay Brick Masonry Walls. — Owen A. Rosenboom and Mervyn J. Kowalsky; 130(5), 787-98 (2004).

Flexure
Experimental Investigation of Unreinforced Brick Masonry Walls in Flexure. — Michael Craig Griffith, Nelson T. K. Lam, John Leonard Wilson, and Kevin Doherty; 130(3), 423-32 (2004).

Floors
Realistic Modeling of Composite and Reinforced Concrete Floor Slabs under Extreme Loading. I: Analytical Method. — B. A. Izzuddin, X. Y. Tao, and A. Y. Elghazouli; 130(12), 1972-84 (2004).
Realistic Modeling of Composite and Reinforced Concrete Floor Slabs under Extreme Loading. II: Verification and Application. — A. Y. Elghazouli and B. A. Izzuddin; 130(12), 1985-96 (2004).

Flutter
Efficacy of the Implied Approximation in the Identification of Flutter Derivatives. — Xinzhong Chen and Ahsan Kareem; 130(12), 2070-4 (2004).

Fracture mechanics
Size Effect in Axially Loaded Reinforced Concrete Columns. — Sıddık Şener, Ben I. G. Barr, and Hadi F. Abusiaf ; 130(4), 662-70 (2004).
Modern Approach of Design of Welded Components Subjected to Fatigue Loading. — Abir Ghosh; 130(5), 812-20 (2004).

Fractures
Experimental Study of Jumbo Size Reduced Beam Section Connections Using High-Strength Steel. — Sheng-Jin Chen and Chin-Te Tu; 130(4), 582-7 (2004).
Pre- and Postyield Finite Element Method Simulation of Bond of Ribbed Reinforcing Bars. — Hamed M. Salem and Koichi Maekawa; 130(4), 671-80 (2004).
Numerical Analysis of Mixed-Mode Fracture in Concrete Using Extended Fictitious Crack Model. — Zihai Shi; 130(11), 1738-47 (2004).

Framed structures
Overview of U.S.–Japan Research on the Seismic Design of Composite Reinforced Concrete and Steel Moment Frame Structures. — Gregory G. Deierlein and Hiroshi Noguchi; 130(2), 361-7 (2004).
Effect of Column Stiffness on Braced Frame Seismic Behavior. — Gregory A. MacRae, Yoshihiro Kimura, and Charles Roeder; 130(3), 381-91 (2004).
Design Models of Light Frame Wood Buildings under Lateral Loads. — B. Kasal, M. S. Collins, P. Paevere, and G. C. Foliente; 130(8), 1263-71 (2004).
Seismic Analysis of Woodframe Structures. I: Model Formulation. — Bryan Folz and Andre Filiatrault; 130(9), 1353-60 (2004).
Seismic Analysis of Woodframe Structures. II: Model Implementation and Verification. — Bryan Folz and Andre Filiatrault; 130(9), 1361-70 (2004).
Fragility Assessment of Light-Frame Wood Construction Subjected to Wind and Earthquake Hazards. — Bruce R. Ellingwood, David V. Rosowsky, Yue Li, and Jun Hee Kim; 130(12), 1921-30 (2004).

Frames
Nonlinear Analysis of Steel-Concrete Composite Structures: State of the Art. — Enrico Spacone and Sherif El-Tawil; 130(2), 159-68 (2004).
Finite Element Method Analysis of Hybrid Structural Frames with Reinforced Concrete Columns and Steel Beams. — Hiroshi Noguchi and Kazuhiro Uchida; 130(2), 328-35 (2004).
Rocking Wall–Frame Structures with Supplemental Tendon Systems. — Jack J. Ajrab, Gokhan Pekcan, and John B. Mander; 130(6), 895-903 (2004).
Experimental and Analytical Study of Masonry Infill Reinforced Concrete Frames Retrofitted with Steel Braces. — Ricardo Perera, Susana Gómez, and Enrique Alarcón; 130(12), 2032-9 (2004).

Friction
Characterization and Modeling of Friction Pendulum Bearings Subjected to Multiple Components of Excitation. — Gilberto Mosqueda, Andrew S. Whittaker, and Gregory L. Fenves; 130(3), 433-42 (2004).

Full-scale tests
Moment Connections to Circular Concrete-Filled Steel Tube Columns. — Atorod Azizinamini and Stephen P. Schneider; 130(2), 213-22 (2004).
Design Models of Light Frame Wood Buildings under Lateral Loads. — B. Kasal, M. S. Collins, P. Paevere, and G. C. Foliente; 130(8), 1263-71 (2004).

Girders
Composite Shear Stud Strength at Early Concrete Ages. — Cem Topkaya, Joseph A. Yura, and Eric B. Williamson; 130(6), 952-60 (2004).

Gradient
Design Provisions for Sections Containing Unstiffened Elements with Stress Gradient. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1620-8 (2004).

Gravity loads
Measures of Structural Redundancy in Reinforced Concrete Buildings. I: Redundancy Indices. — Mohamed Husain and Panos Tsopelas; 130(11), 1651-8 (2004).
Measures of Structural Redundancy in Reinforced Concrete Buildings. II: Redundancy Response Modification Factor R_R. — Panos Tsopelas and Mohamed Husain; 130(11), 1659-66 (2004).

Ground motion
Estimation of Seismic Demands on Isolators Based on Nonlinear Analysis. — Keri L. Ryan and Anil K. Chopra; 130(3), 392-402 (2004).
Seismic Response of Vertically Irregular Frames: Response History and Modal Pushover Analyses. — Chatpan Chintanapakdee and Anil K. Chopra; 130(8), 1177-85 (2004).
Role of Damage Functions in Evaluation of Response Modification Factors. — Luis D. Decanini, Silvia Bruno, and Fabrizio Mollaioli; 130(9), 1298-308 (2004).
Inelastic Deformation Ratios for Design and Evaluation of Structures: Single-Degree-of-Freedom Bilinear Systems. — Anil K. Chopra and Chatpan Chintanapakdee; 130(9), 1309-19 (2004).

Gypsum
Development of Test Method for Determining Plasterboard Bracing Performance. — Y. L. Liew, E. F. Gad, and C. F. Duffield; 130(7), 1108-16 (2004).

Heating
Fire Resistance of Reinforced Concrete Columns Subjected to 1-, 2-, and 3-Face Heating. — K. H. Tan and Y. Yao; 130(11), 1820-8 (2004).

High strength concrete
Neutral Axis Depth versus Flexural Ductility in High-Strength Concrete Beams. — L. F. A. Bernardo and S. M. R. Lopes; 130(3), 452-9 (2004).

High strength steel
Compression Tests of Cold-Reduced High Strength Steel Sections. I: Stub Columns. — Demao Yang and Gregory J. Hancock; 130(11), 1772-81 (2004).
Compression Tests of Cold-Reduced High Strength Steel Sections. II: Long Columns. — Demao Yang, Gregory J. Hancock, and Kim J. R. Rasmussen; 130(11), 1782-9 (2004).
Compression Tests of High Strength Steel Channel Columns with Interaction between Local and Distortional Buckling. — Demao Yang and Gregory J. Hancock; 130(12), 1954-63 (2004).

Highways
Structural Characterization of Modern Highway Overcrossings—Case Study. — Jian Zhang, Nicos Makris, and Tim Delis; 130(6), 846-60 (2004).

Hinges
Elastoplastic and Large Deflection Analysis of Steel Frames by One Element per Member. II: Three Hinges along Member. — Siu-Lai Chan and Zhi-Hua Zhou; 130(4), 545-53 (2004).

Hollow sections
Energy-based Design of Dowel Connections in Wood-Plastic Composites Hollow Sections. — William R. Parsons and Donald A. Bender; 130(4), 681-9 (2004).
Plastic Interaction Relationships for Square Hollow Structural Sections: Lower Bound Solution. — Magdi Mohareb and Istemi F. Ozkan; 130(9), 1381-91 (2004).
Improving the Ductility of Knee Joints between Rectangular Hollow Sections. — Lip H. Teh and Gregory J. Hancock; 130(11), 1790-8 (2004).
Tests on Cyclic Behavior of Concrete-Filled Hollow Structural Steel Columns after Exposure to the ISO-834 Standard Fire. — Lin-Hai Han and Xiao-Kang Lin; 130(11), 1807-19 (2004).

Hurricanes
Hurricane Damage Prediction Model for Residential Structures. — Jean-Paul Pinelli, Emil Simiu, Kurt Gurley, Chelakara Subramanian, Liang Zhang, Anne Cope, James J. Filliben, and Shahid Hamid; 130(11), 1685-91 (2004).
Fragility Assessment of Light-Frame Wood Construction Subjected to Wind and Earthquake Hazards. — Bruce R. Ellingwood, David V. Rosowsky, Yue Li, and Jun Hee Kim; 130(12), 1921-30 (2004).

Hysteresis
Characterization of Cyclic Behavior of Dry Masonry Joints. — Paulo B. Lourenço and Luís F. Ramos; 130(5), 779-86 (2004).

Hysteresis models
Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. II: Modeling. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1133-44 (2004).

Hysteretic systems
Role of Damage Functions in Evaluation of Response Modification Factors. — Luis D. Decanini, Silvia Bruno, and Fabrizio Mollaioli; 130(9), 1298-308 (2004).

I beams
Design of I Beams and Deck Profiles under Concentrated Loading. — Tore Tryland, Per K. Larsen, and Magnus Langseth; 130(3), 411-22 (2004).

Identification
Efficacy of the Implied Approximation in the Identification of Flutter Derivatives. — Xinzhong Chen and Ahsan Kareem; 130(12), 2070-4 (2004).

Image analysis
Measurement Method for Continua by Image Processing. — Junji Yoshida, Masato Abe, Yozo Fujino, and Lewangamage Chamindalal Sujeewa; 130(8), 1145-56 (2004).

Impact tests
Finite Element Analysis Simulation of Airport Approach Lighting Towers. — D. G. Zimcik, M. Nejad Ensan, S. T. Jenq, and M. C. Chao; 130(5), 805-11 (2004).

Imperfections
Alternative Approaches for Elastic Analysis and Design of Steel Frames. I: Overview. — Andrea E. Surovek-Maleck and Donald W. White; 130(8), 1186-96 (2004).
Alternative Approaches for Elastic Analysis and Design of Steel Frames. II: Verification Studies. — Andrea E. Surovek-Maleck and Donald W. White; 130(8), 1197-205 (2004).

Industrial plants
Applicability of Seismic Protective Systems to Structures with Vibration-Sensitive Equipment. — J. S. Hwang, Y. N. Huang, Y. H. Hung, and J. C. Huang; 130(11), 1676-84 (2004).

Inelastic action
Inelastic Dynamic Behavior of Hybrid Coupled Walls. — Mohammad Hassan and Sherif El-Tawil; 130(2), 285-96 (2004).
Seismic Response of Vertically Irregular Frames: Response History and Modal Pushover Analyses. — Chatpan Chintanapakdee and Anil K. Chopra; 130(8), 1177-85 (2004).
Inelastic Deformation Ratios for Design and Evaluation of Structures: Single-Degree-of-Freedom Bilinear Systems. — Anil K. Chopra and Chatpan Chintanapakdee; 130(9), 1309-19 (2004).
Inelastic Displacement Ratios for Design of Structures on Soft Soils Sites. — Jorge Ruiz-García and Eduardo Miranda; 130(12), 2051-61 (2004).

Infrastructure
Cost–Reliability Interaction in Life-Cycle Cost Optimization of Deteriorating Structures. — Jung S. Kong and Dan M. Frangopol; 130(11), 1704-12 (2004).

Interactions
Plastic Interaction Relationships for Square Hollow Structural Sections: Lower Bound Solution. — Magdi Mohareb and Istemi F. Ozkan; 130(9), 1381-91 (2004).
Compression Tests of High Strength Steel Channel Columns with Interaction between Local and Distortional Buckling. — Demao Yang and Gregory J. Hancock; 130(12), 1954-63 (2004).

Interfaces
Seismic Analysis of Reinforced Concrete Frame Buildings Using Interface Modeling. — Tong-Seok Han and Sarah L. Billington; 130(8), 1157-68 (2004).

Isolation
Performance of a Seismically Isolated Bridge under Near-Fault Earthquake Ground Motions. — Jerry Shen, Meng-Hao Tsai, Kuo-Chun Chang, and George C. Lee; 130(6), 861-8 (2004).

Joints
Seismic Behavior of Reinforced Concrete Column-Steel Beam Subassemblies and Frame Systems. — Xuemei Liang and Gustavo J. Parra-Montesinos; 130(2), 310-9 (2004).
Design Expressions Based on a Finite Element Model of a Stiffened Cold-Formed Steel C-Section. — Steven R. Fox and G. Wayne Brodland; 130(5), 708-14 (2004).
Strength and Design of Open Web Steel Joists with Crimped-End Web Members. — Joseph Robert Yost, David W. Dinehart, Shawn P. Gross, Joseph J. Pote, and Brian Gargan; 130(5), 715-24 (2004).
Characterization of Cyclic Behavior of Dry Masonry Joints. — Paulo B. Lourenço and Luís F. Ramos; 130(5), 779-86 (2004).
Finite-Element Model for Wood-Based Floors with Lateral Reinforcements. — Lei Jiang, Lin Hu, and Ying-Hei Chui; 130(7), 1097-107 (2004).
Improving the Ductility of Knee Joints between Rectangular Hollow Sections. — Lip H. Teh and Gregory J. Hancock; 130(11), 1790-8 (2004).
Self-Drilling Screw Joints for Cold-Formed Channel Portal Frames. — Julie Mills and Roger LaBoube; 130(11), 1799-806 (2004).

Laminated wood
Improved Analysis of Timber Rivet Connections. — Douglas C. Stahl, Ronald W. Wolfe, and Marshall Begel; 130(8), 1272-9 (2004).

Laminates
Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. I: Experimental Study. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1119-32 (2004).
Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. II: Modeling. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1133-44 (2004).

Lateral forces
Behavior of Timber Pile-to-Cap Connections under Cyclic Lateral Loading. — Ayman. A. Shama and John B. Mander; 130(8), 1252-62 (2004).

Lateral loads
Lateral Load Behavior of Masonry Infilled Steel Frames with Repair and Retrofit. — H. A. Moghaddam; 130(1), 56-63 (2004).
Posttensioned Hybrid Coupled Walls under Lateral Loads. — Yahya C. Kurama and Qiang Shen; 130(2), 297-309 (2004).
Displacement-Based Design of Slender Reinforced Concrete Structural Walls—Experimental Verification. — John H. Thomsen, IV, and John W. Wallace; 130(4), 618-30 (2004).
Concrete-Filled Steel Tubes Subjected to Axial Compression and Lateral Cyclic Loads. — Amir Fam, Frank S. Qie, and Sami Rizkalla; 130(4), 631-40 (2004).
Analysis of the Influence of Tensile Strength on the Stability of Eccentrically Compressed Slender Unreinforced Masonry Walls Under Lateral Loads. — Mu Lu, Arturo E. Schultz, and Henryk K. Stolarski; 130(6), 921-33 (2004).
Design Models of Light Frame Wood Buildings under Lateral Loads. — B. Kasal, M. S. Collins, P. Paevere, and G. C. Foliente; 130(8), 1263-71 (2004).

Lead
Performance of a Seismically Isolated Bridge under Near-Fault Earthquake Ground Motions. — Jerry Shen, Meng-Hao Tsai, Kuo-Chun Chang, and George C. Lee; 130(6), 861-8 (2004).
Measurement Method for Continua by Image Processing. — Junji Yoshida, Masato Abe, Yozo Fujino, and Lewangamage Chamindalal Sujeewa; 130(8), 1145-56 (2004).

Life cycle cost
Bridge Deck Replacement for Minimum Expected Cost Under Multiple Reliability Constraints. — Mark G. Stewart, Allen C. Estes, and Dan M. Frangopol; 130(9), 1414-9 (2004).
Cost–Reliability Interaction in Life-Cycle Cost Optimization of Deteriorating Structures. — Jung S. Kong and Dan M. Frangopol; 130(11), 1704-12 (2004).

Life cycles
Prediction of Reliability and Cost Profiles of Deteriorating Bridges under Time- and Performance-Controlled Maintenance. — Jung S. Kong and Dan M. Frangopol; 130(12), 1865-74 (2004).
Lifetime Performance Analysis of Existing Steel Girder Bridge Superstructures. — Ferhat Akgül and Dan M. Frangopol; 130(12), 1875-88 (2004).

Light
Finite Element Analysis Simulation of Airport Approach Lighting Towers. — D. G. Zimcik, M. Nejad Ensan, S. T. Jenq, and M. C. Chao; 130(5), 805-11 (2004).

Limit states
Finite-Element Model for Collapse and Long-Term Analysis of Steel–Concrete Composite Beams. — M. Fragiacomo, C. Amadio, and L. Macorini; 130(3), 489-97 (2004).
Bridge Deck Replacement for Minimum Expected Cost Under Multiple Reliability Constraints. — Mark G. Stewart, Allen C. Estes, and Dan M. Frangopol; 130(9), 1414-9 (2004).

Linear systems
Buckling of Linear Structures above the Surface and/or Underground. — Sohrab Baghery; 130(11), 1748-55 (2004).

Load distribution
Design Models of Light Frame Wood Buildings under Lateral Loads. — B. Kasal, M. S. Collins, P. Paevere, and G. C. Foliente; 130(8), 1263-71 (2004).

Load resistant design factor
Probabilistic Based Design of Concentrically Loaded Fiber-Reinforced Polymeric Compression Members. — Maha Alqam, Richard M. Bennett, and Abdul-Hamid Zureick; 130(12), 1914-20 (2004).

Maintenance
Cost–Reliability Interaction in Life-Cycle Cost Optimization of Deteriorating Structures. — Jung S. Kong and Dan M. Frangopol; 130(11), 1704-12 (2004).

Masonry
Experimental Investigation of Unreinforced Brick Masonry Walls in Flexure. — Michael Craig Griffith, Nelson T. K. Lam, John Leonard Wilson, and Kevin Doherty; 130(3), 423-32 (2004).
Modeling Soil/Structure Interaction for Masonry Structures. — Mark J. Masia, Peter W. Kleeman, and Robert E. Melchers; 130(4), 641-9 (2004).
Characterization of Cyclic Behavior of Dry Masonry Joints. — Paulo B. Lourenço and Luís F. Ramos; 130(5), 779-86 (2004).
Reversed In-Plane Cyclic Behavior of Posttensioned Clay Brick Masonry Walls. — Owen A. Rosenboom and Mervyn J. Kowalsky; 130(5), 787-98 (2004).
Analysis of the Influence of Tensile Strength on the Stability of Eccentrically Compressed Slender Unreinforced Masonry Walls Under Lateral Loads. — Mu Lu, Arturo E. Schultz, and Henryk K. Stolarski; 130(6), 921-33 (2004).
Masonry Wall Damage by Restraint to Shrinkage. — G. P. A. G. van Zijl, P. A. de Vries, and A. T. Vermeltfoort; 130(7), 1075-86 (2004).
Experimental and Analytical Study of Masonry Infill Reinforced Concrete Frames Retrofitted with Steel Braces. — Ricardo Perera, Susana Gómez, and Enrique Alarcón; 130(12), 2032-9 (2004).

Material failure
Modeling Material Failure in Concrete Structures under Cyclic Actions. — Rui Faria, Javier Oliver, and Miguel Cervera; 130(12), 1997-2005 (2004).

Material tests
Development of Test Method for Determining Plasterboard Bracing Performance. — Y. L. Liew, E. F. Gad, and C. F. Duffield; 130(7), 1108-16 (2004).

Mathematical models
Behavior of Eccentrically Loaded Concrete-Filled Steel Tubular Columns. — Toshiaki Fujimoto, Akiyoshi Mukai, Isao Nishiyama, and Kenji Sakino; 130(2), 203-12 (2004).

Measurement
Characterizing Nonstationary Wind Speed Using Empirical Mode Decomposition. — Y. L. Xu and J. Chen; 130(6), 912-20 (2004).
Measurement Method for Continua by Image Processing. — Junji Yoshida, Masato Abe, Yozo Fujino, and Lewangamage Chamindalal Sujeewa; 130(8), 1145-56 (2004).

Methodology
Concrete Shells Form-Finding with Surface Stress Density Method. — Bernard Maurin and René Motro; 130(6), 961-8 (2004).

Micro piles
Buckling of Linear Structures above the Surface and/or Underground. — Sohrab Baghery; 130(11), 1748-55 (2004).

Modal analysis
Combination of Modal Responses Consistent with Seismic Input Representation. — P. Cacciola, P. Colajanni, and G. Muscolino; 130(1), 47-55 (2004).
Experimental and Analytical Modal Analysis of Steel Arch Bridge. — Wei-Xin Ren, Tong Zhao, and Issam E. Harik; 130(7), 1022-31 (2004).

Model tests
Experimental Investigation of a Small-Scale Bridge Model under a Moving Mass. — Cristiano Bilello, Lawrence A. Bergman, and Daniel Kuchma; 130(5), 799-804 (2004).
Experimental and Analytical Modal Analysis of Steel Arch Bridge. — Wei-Xin Ren, Tong Zhao, and Issam E. Harik; 130(7), 1022-31 (2004).

Model verification
Seismic Analysis of Woodframe Structures. II: Model Implementation and Verification. — Bryan Folz and Andre Filiatrault; 130(9), 1361-70 (2004).

Models
Failure of Lightly Reinforced Concrete Members under Fire. I: Analytical Modeling. — B. A. Izzuddin and A. Y. Elghazouli; 130(1), 3-17 (2004).
Experimental and Analytical Reexamination of Classic Concrete Beam Tests. — F. J. Vecchio and W. Shim; 130(3), 460-9 (2004).
Modeling Soil/Structure Interaction for Masonry Structures. — Mark J. Masia, Peter W. Kleeman, and Robert E. Melchers; 130(4), 641-9 (2004).
Design Expressions Based on a Finite Element Model of a Stiffened Cold-Formed Steel C-Section. — Steven R. Fox and G. Wayne Brodland; 130(5), 708-14 (2004).
Analysis of the Influence of Tensile Strength on the Stability of Eccentrically Compressed Slender Unreinforced Masonry Walls Under Lateral Loads. — Mu Lu, Arturo E. Schultz, and Henryk K. Stolarski; 130(6), 921-33 (2004).
Design Models of Light Frame Wood Buildings under Lateral Loads. — B. Kasal, M. S. Collins, P. Paevere, and G. C. Foliente; 130(8), 1263-71 (2004).
Behavior and Modeling of Fiber Reinforced Polymer-Confined Concrete. — J. G. Teng and L. Lam; 130(11), 1713-23 (2004).

Monitoring
Statistical Wavelet-Based Method for Structural Health Monitoring. — Z. Sun and C. C. Chang; 130(7), 1055-62 (2004).

Monte Carlo method
Impact of New ACI 318 Flexural Resistance Factor on Bond Failures. — Christopher R. Scollard and F. Michael Bartlett; 130(1), 138-46 (2004).
Hurricane Damage Prediction Model for Residential Structures. — Jean-Paul Pinelli, Emil Simiu, Kurt Gurley, Chelakara Subramanian, Liang Zhang, Anne Cope, James J. Filliben, and Shahid Hamid; 130(11), 1685-91 (2004).

Nonlinear analysis
Nonlinear Analysis of Steel-Concrete Composite Structures: State of the Art. — Enrico Spacone and Sherif El-Tawil; 130(2), 159-68 (2004).
Behavior of Centrally Loaded Concrete-Filled Steel-Tube Short Columns. — Kenji Sakino, Hiroyuki Nakahara, Shosuke Morino, and Isao Nishiyama; 130(2), 180-8 (2004).
Estimation of Seismic Demands on Isolators Based on Nonlinear Analysis. — Keri L. Ryan and Anil K. Chopra; 130(3), 392-402 (2004).
Elastoplastic and Large Deflection Analysis of Steel Frames by One Element per Member. I: One Hinge along Member. — Zhi-Hua Zhou and Siu-Lai Chan; 130(4), 538-44 (2004).
Elastoplastic and Large Deflection Analysis of Steel Frames by One Element per Member. II: Three Hinges along Member. — Siu-Lai Chan and Zhi-Hua Zhou; 130(4), 545-53 (2004).
Simplified Nonlinear Analysis of Strengthened Concrete Beams Based on a Rigorous Approach. — Hayder A. Rasheed, Hasan Charkas, and Hani Melhem; 130(7), 1087-96 (2004).
Response Sensitivity for Nonlinear Beam–Column

Elements. — Michael H. Scott, Paolo Franchin, Gregory L. Fenves, and Filip C. Filippou; 130(9), 1281-8 (2004).
Seismic Analysis of Woodframe Structures. I: Model Formulation. — Bryan Folz and Andre Filiatrault; 130(9), 1353-60 (2004).
Seismic Analysis of Woodframe Structures. II: Model Implementation and Verification. — Bryan Folz and Andre Filiatrault; 130(9), 1361-70 (2004).
Realistic Modeling of Composite and Reinforced Concrete Floor Slabs under Extreme Loading. I: Analytical Method. — B. A. Izzuddin, X. Y. Tao, and A. Y. Elghazouli; 130(12), 1972-84 (2004).
Realistic Modeling of Composite and Reinforced Concrete Floor Slabs under Extreme Loading. II: Verification and Application. — A. Y. Elghazouli and B. A. Izzuddin; 130(12), 1985-96 (2004).

Nonlinear response
Earthquake Duration Effect on Structural Reliability. — John W. van de Lindt and Ginhuat Goh; 130(5), 821-6 (2004).

Nonstructural elements
Modeling the Dynamic Behavior of Electrical Cabinets and Control Panels: Experimental and Analytical Results. — Sudhir Rustogi and Abhinav Gupta; 130(3), 511-9 (2004).

Numerical analysis
Tension-Stiffening Model for Cracked Flexural Concrete Members. — Ll. Torres, F. López-Almansa, and L. M. Bozzo; 130(8), 1242-51 (2004).
Numerical Analysis of Mixed-Mode Fracture in Concrete Using Extended Fictitious Crack Model. — Zihai Shi; 130(11), 1738-47 (2004).

Numerical models
Component Modeling of Partially Restrained Composite Joints under Cyclic and Dynamic Loading. — G. A. Rassati, R. T. Leon, and S. Noè; 130(2), 343-51 (2004).
Masonry Wall Damage by Restraint to Shrinkage. — G. P. A. G. van Zijl, P. A. de Vries, and A. T. Vermeltfoort; 130(7), 1075-86 (2004).
Seismic Analysis of Woodframe Structures. I: Model Formulation. — Bryan Folz and Andre Filiatrault; 130(9), 1353-60 (2004).
Seismic Analysis of Woodframe Structures. II: Model Implementation and Verification. — Bryan Folz and Andre Filiatrault; 130(9), 1361-70 (2004).

Offshore platforms
Offshore Tubular T-Joints Reinforced with Internal Plain Annular Ring Stiffeners. — M. M. K. Lee and A. Llewelyn-Parry; 130(6), 942-51 (2004).

Optimization
Application of the Improved Immune Algorithm to Structural Design Support System. — Ayaho Miyamoto, Hideaki Nakamura, and Leopold Kruszka; 130(1), 108-19 (2004).
Design of Space Trusses Using Ant Colony Optimization. — Charles V. Camp and Barron J. Bichon; 130(5), 741-51 (2004).
Socioeconomic Implications of Life Quality Index in Design of Optimum Structures to Withstand Earthquakes. — Mauricio Sánchez-Silva and Rüdiger Rackwitz; 130(6), 969-77 (2004).
Response Sensitivity for Nonlinear Beam–Column Elements. — Michael H. Scott, Paolo Franchin, Gregory L. Fenves, and Filip C. Filippou; 130(9), 1281-8 (2004).
Cost–Reliability Interaction in Life-Cycle Cost Optimization of Deteriorating Structures. — Jung S. Kong and Dan M. Frangopol; 130(11), 1704-12 (2004).

Overpasses
Seismic Response Analysis of a Highway Overcrossing Equipped with Elastomeric Bearings and Fluid Dampers. — Nicos Makris and Jian Zhang; 130(6), 830-45 (2004).
Structural Characterization of Modern Highway Overcrossings—Case Study. — Jian Zhang, Nicos Makris, and Tim Delis; 130(6), 846-60 (2004).

Panels
Guidelines: Seismic Design of Composite Reinforced Concrete and Steel Buildings. — Isao Nishiyama, Hiroshi Kuramoto, and Hiroshi Noguchi; 130(2), 336-42 (2004).
Experimental Investigation of Unreinforced Brick Masonry Walls in Flexure. — Michael Craig Griffith, Nelson T. K. Lam, John Leonard Wilson, and Kevin Doherty; 130(3), 423-32 (2004).

Parameters
Response Sensitivity for Nonlinear Beam–Column Elements. — Michael H. Scott, Paolo Franchin, Gregory L. Fenves, and Filip C. Filippou; 130(9), 1281-8 (2004).

Passive control
Behavior of Torsionally Coupled Structures with Variable Frequency Pendulum Isolator. — Pranesh Murnal and Ravi Sinha; 130(7), 1041-54 (2004).

Performance evaluation
Performance Evaluation of Damaged Steel Frame Buildings Subjected to Seismic Loads. — Kihak Lee and Douglas A. Foutch; 130(4), 588-99 (2004).
Lifetime Performance Analysis of Existing Steel Girder Bridge Superstructures. — Ferhat Akgül and Dan M. Frangopol; 130(12), 1875-88 (2004).

Piles
Behavior of Timber Pile-to-Cap Connections under Cyclic Lateral Loading. — Ayman. A. Shama and John B. Mander; 130(8), 1252-62 (2004).

Pipe design
Thrust Restraint Design of Concrete Pressure Pipe. — Mehdi S. Zarghamee, Daniel W. Eggers, Rasko P. Ojdrovic, and Daniel P. Valentine; 130(1), 95-107 (2004).

Plastic analysis
Plastic Interaction Relationships for Square Hollow Structural Sections: Lower Bound Solution. — Magdi Mohareb and Istemi F. Ozkan; 130(9), 1381-91 (2004).

Plastic design
Improving the Ductility of Knee Joints between Rectangular Hollow Sections. — Lip H. Teh and Gregory J. Hancock; 130(11), 1790-8 (2004).

Plastic hinges
Nonlinear Plastic Hinge Analysis of Three-Dimensional Steel Frames in Fire. — K. Y. Ma and J. Y. Richard Liew; 130(7), 981-90 (2004).

Plasticity
Nonlinear Plastic Hinge Analysis of Three-Dimensional Steel Frames in Fire. — K. Y. Ma and J. Y. Richard Liew; 130(7), 981-90 (2004).

Plastics
Energy-based Design of Dowel Connections in Wood-Plastic Composites Hollow Sections. — William R. Parsons and Donald A. Bender; 130(4), 681-9 (2004).

Plates
Single Plate Shear Connection Response to Rotation Demands Imposed by Frames Undergoing Cyclic Lateral Displacements. — Joseph P. Crocker and Janice J. Chambers; 130(6), 934-41 (2004).
Tests of Unstiffened Plate Elements Under Combined Compression and Bending. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1602-10 (2004).
Design Provisions for Sections Containing Unstiffened Elements with Stress Gradient. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1620-8 (2004).

Post-tensioning
Reversed In-Plane Cyclic Behavior of Posttensioned Clay Brick Masonry Walls. — Owen A. Rosenboom and Mervyn J. Kowalsky; 130(5), 787-98 (2004).

Postbuckling
Postbuckling Behavior of Axially Restrained and Axially Loaded Steel Columns under Fire Conditions. — Y. C. Wang; 130(3), 371-80 (2004).
Local Buckling of Steel Plates in Double Skin Composite Panels under Biaxial Compression and Shear. — Qing Quan Liang, Brian Uy, Howard D. Wright, and Mark A. Bradford; 130(3), 443-51 (2004).

Power spectral density
Combination of Modal Responses Consistent with Seismic Input Representation. — P. Cacciola, P. Colajanni, and G. Muscolino; 130(1), 47-55 (2004).

Pressure pipes
Thrust Restraint Design of Concrete Pressure Pipe. — Mehdi S. Zarghamee, Daniel W. Eggers, Rasko P. Ojdrovic, and Daniel P. Valentine; 130(1), 95-107 (2004).

Prestressing
Reversed In-Plane Cyclic Behavior of Posttensioned Clay Brick Masonry Walls. — Owen A. Rosenboom and Mervyn J. Kowalsky; 130(5), 787-98 (2004).

Probability
Probabilistic Based Design of Concentrically Loaded Fiber-Reinforced Polymeric Compression Members. — Maha Alqam, Richard M. Bennett, and Abdul-Hamid Zureick; 130(12), 1914-20 (2004).
Fragility Assessment of Light-Frame Wood Construction Subjected to Wind and Earthquake Hazards. — Bruce R. Ellingwood, David V. Rosowsky, Yue Li, and Jun Hee Kim; 130(12), 1921-30 (2004).

Quality control
Development of Test Method for Determining Plasterboard Bracing Performance. — Y. L. Liew, E. F. Gad, and C. F. Duffield; 130(7), 1108-16 (2004).

Redundancy
Measures of Structural Redundancy in Reinforced Concrete Buildings. I: Redundancy Indices. — Mohamed Husain and Panos Tsopelas; 130(11), 1651-8 (2004).

Measures of Structural Redundancy in Reinforced Concrete Buildings. II: Redundancy Response Modification Factor R_R. — Panos Tsopelas and Mohamed Husain; 130(11), 1659-66 (2004).

Regression analysis

Effects of Site Classes on Damping Reduction Factors. — Yu-Yuan Lin and Kuo-Chung Chang; 130(11), 1667-75 (2004).

Rehabilitation

Bridge Deck Replacement for Minimum Expected Cost Under Multiple Reliability Constraints. — Mark G. Stewart, Allen C. Estes, and Dan M. Frangopol; 130(9), 1414-9 (2004).

Reinforcement

Offshore Tubular T-Joints Reinforced with Internal Plain Annular Ring Stiffeners. — M. M. K. Lee and A. Llewelyn-Parry; 130(6), 942-51 (2004).

Reliability

Bridge Deck Replacement for Minimum Expected Cost Under Multiple Reliability Constraints. — Mark G. Stewart, Allen C. Estes, and Dan M. Frangopol; 130(9), 1414-9 (2004).

Cost–Reliability Interaction in Life-Cycle Cost Optimization of Deteriorating Structures. — Jung S. Kong and Dan M. Frangopol; 130(11), 1704-12 (2004).

Lifetime Performance Analysis of Existing Steel Girder Bridge Superstructures. — Ferhat Akgül and Dan M. Frangopol; 130(12), 1875-88 (2004).

Reliability analysis

Reliability Analysis of Block Shear Capacity of Coped Steel Beams. — Cameron R. Franchuk, Robert G. Driver, and Gilbert Y. Grondin; 130(12), 1904-13 (2004).

Repeated loads

Repeated Loading Tests of Concrete Walls Containing Headed Shear Reinforcement. — Young Hoon Kim, Young Soo Yoon, William D. Cook, and Denis Mitchell; 130(8), 1233-41 (2004).

Replacement

Bridge Deck Replacement for Minimum Expected Cost Under Multiple Reliability Constraints. — Mark G. Stewart, Allen C. Estes, and Dan M. Frangopol; 130(9), 1414-9 (2004).

Research

Overview of U.S.–Japan Research on the Seismic Design of Composite Reinforced Concrete and Steel Moment Frame Structures. — Gregory G. Deierlein and Hiroshi Noguchi; 130(2), 361-7 (2004).

Residual strength

Tests on Cyclic Behavior of Concrete-Filled Hollow Structural Steel Columns after Exposure to the ISO-834 Standard Fire. — Lin-Hai Han and Xiao-Kang Lin; 130(11), 1807-19 (2004).

Residual stress

Steel Member Strength by Inelastic Lateral Buckling. — N. S. Trahair and G. J. Hancock; 130(1), 64-9 (2004).

Resistance factors

Reliability Analysis of Block Shear Capacity of Coped Steel Beams. — Cameron R. Franchuk, Robert G. Driver, and Gilbert Y. Grondin; 130(12), 1904-13 (2004).

Probabilistic Based Design of Concentrically Loaded Fiber-Reinforced Polymeric Compression Members. — Maha Alqam, Richard M. Bennett, and Abdul-Hamid Zureick; 130(12), 1914-20 (2004).

Response spectra

Adapting the CQC3 Rule for Three Seismic Components with Different Spectra. — Oscar A. López, Anil K. Chopra, and Julio J. Hernández; 130(3), 403-10 (2004).

Role of Damage Functions in Evaluation of Response Modification Factors. — Luis D. Decanini, Silvia Bruno, and Fabrizio Mollaioli; 130(9), 1298-308 (2004).

Retrofitting

Lateral Load Behavior of Masonry Infilled Steel Frames with Repair and Retrofit. — H. A. Moghaddam; 130(1), 56-63 (2004).

Assessment of Steel and Fiber Reinforced Plastic Jackets for Seismic Retrofit of Reinforced Concrete Columns with Structural Flares. — M. Saiid Saiidi, Frank Martinovic, Brett McElhaney, David Sanders, and Faramarz Gordaninejad; 130(4), 609-17 (2004).

Seismic Retrofit of Concrete-Masonry-Infilled Steel Frames with Glass Fiber-Reinforced Polymer Laminates. — Wael W. El-Dakhakhni, Ahmad A. Hamid, and Mohamed Elgaaly; 130(9), 1343-52 (2004).

Behavior and Modeling of Fiber Reinforced Polymer-Confined Concrete. — J. G. Teng and L. Lam; 130(11), 1713-23 (2004).

Experimental and Analytical Study of Masonry Infill Reinforced Concrete Frames Retrofitted with Steel Braces. — Ricardo Perera, Susana Gómez, and Enrique Alarcón; 130(12), 2032-9 (2004).

Rheology

Tension-Stiffening Model for Cracked Flexural Concrete Members. — Ll. Torres, F. López-Almansa, and L. M. Bozzo; 130(8), 1242-51 (2004).

Rigid frames

Characterization and Modeling of Friction Pendulum Bearings Subjected to Multiple Components of Excitation. — Gilberto Mosqueda, Andrew S. Whittaker, and Gregory L. Fenves; 130(3), 433-42 (2004).

Risk analysis

Hurricane Damage Prediction Model for Residential Structures. — Jean-Paul Pinelli, Emil Simiu, Kurt Gurley, Chelakara Subramanian, Liang Zhang, Anne Cope, James J. Filliben, and Shahid Hamid; 130(11), 1685-91 (2004).

Rotation

Single Plate Shear Connection Response to Rotation Demands Imposed by Frames Undergoing Cyclic Lateral Displacements. — Joseph P. Crocker and Janice J. Chambers; 130(6), 934-41 (2004).

Rubber

Performance of a Seismically Isolated Bridge under Near-Fault Earthquake Ground Motions. — Jerry Shen, Meng-Hao Tsai, Kuo-Chun Chang, and George C. Lee; 130(6), 861-8 (2004).

Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. I: Experimental Study. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1119-32 (2004).

Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. II: Modeling. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1133-44 (2004).

Safety

Bridge Rating and Reliability Correlation: Comprehensive Study for Different Bridge Types. — Ferhat Akgül and Dan M. Frangopol; 130(7), 1063-74 (2004).

Seismic analysis

Nonlinear Analysis of Steel-Concrete Composite Structures: State of the Art. — Enrico Spacone and Sherif El-Tawil; 130(2), 159-68 (2004).

Posttensioned Hybrid Coupled Walls under Lateral Loads. — Yahya C. Kurama and Qiang Shen; 130(2), 297-309 (2004).

Component Modeling of Partially Restrained Composite Joints under Cyclic and Dynamic Loading. — G. A. Rassati, R. T. Leon, and S. Noè; 130(2), 343-51 (2004).

Seismic Analysis of Reinforced Concrete Frame Buildings Using Interface Modeling. — Tong-Seok Han and Sarah L. Billington; 130(8), 1157-68 (2004).

Seismic Analysis of Asymmetric Buildings with Flexible Floor Diaphragms. — Dhiman Basu and Sudhir K. Jain; 130(8), 1169-76 (2004).

Experimental and Analytical Study of Masonry Infill Reinforced Concrete Frames Retrofitted with Steel Braces. — Ricardo Perera, Susana Gómez, and Enrique Alarcón; 130(12), 2032-9 (2004).

Seismic design

Seismic Behavior and Design of High-Strength Square Concrete-Filled Steel Tube Beam Columns. — Amit H. Varma, James M. Ricles, Richard Sause, and Le-Wu Lu; 130(2), 169-79 (2004).

Seismic Behavior of Composite Concrete Filled Steel Tube Column-Wide Flange Beam Moment Connections. — J. M. Ricles, S. W. Peng, and L. W. Lu; 130(2), 223-32 (2004).

Outrigger Beam–Wall Connections. I: Component Testing and Development of Design Model. — Bahram M. Shahrooz, Jeremy T. Deason, and Gokhan Tunc; 130(2), 253-61 (2004).

Outrigger Beam–Wall Connections. II: Subassembly Testing and Further Modeling Enhancements. — Bahram M. Shahrooz, Gokhan Tunc, and Jeremy T. Deason; 130(2), 262-70 (2004).

Cyclic Behavior of Traditional and Innovative Composite Shear Walls. — Qiuhong Zhao and Abolhassan Astaneh-Asl; 130(2), 271-84 (2004).

Bidirectional Tests on Partially Restrained, Composite Beam-to-Column Connections. — Travis P. Green, Roberto T. Leon, and Gian A. Rassati; 130(2), 320-7 (2004).

Guidelines: Seismic Design of Composite Reinforced Concrete and Steel Buildings. — Isao Nishiyama, Hiroshi Kuramoto, and Hiroshi Noguchi; 130(2), 336-42 (2004).

Overview of U.S.–Japan Research on the Seismic Design of Composite Reinforced Concrete and Steel Moment Frame Structures. — Gregory G. Deierlein and Hiroshi Noguchi; 130(2), 361-7 (2004).

Effect of Column Stiffness on Braced Frame Seismic Behavior. — Gregory A. MacRae, Yoshihiro Kimura, and Charles Roeder; 130(3), 381-91 (2004).

Improved Truss Model for Design of Welded Steel

Moment-Resisting Frame Connections. — Jaswant N. Arlekar and C. V. R. Murty; 130(3), 498-510 (2004).
Steel Beam-Column Connections Using Shape Memory Alloys. — Justin Ocel, Reginald DesRoches, Roberto T. Leon, W. Gregory Hess, Robert Krumme, Jack R. Hayes, and Steve Sweeney; 130(5), 732-40 (2004).
Experimental Evaluation of the Seismic Performance of Reinforced Concrete Bridge Columns. — Dawn Lehman, Jack Moehle, Stephen Mahin, Anthony Calderone, and Lena Henry; 130(6), 869-79 (2004).
Single Plate Shear Connection Response to Rotation Demands Imposed by Frames Undergoing Cyclic Lateral Displacements. — Joseph P. Crocker and Janice J. Chambers; 130(6), 934-41 (2004).
Socioeconomic Implications of Life Quality Index in Design of Optimum Structures to Withstand Earthquakes. — Mauricio Sánchez-Silva and Rüdiger Rackwitz; 130(6), 969-77 (2004).
Behavior of Timber Pile-to-Cap Connections under Cyclic Lateral Loading. — Ayman. A. Shama and John B. Mander; 130(8), 1252-62 (2004).
Effect of Beam Growth on Reinforced Concrete Frames. — Jubum Kim, John Stanton, and Gregory MacRae; 130(9), 1333-42 (2004).
Applicability of Seismic Protective Systems to Structures with Vibration-Sensitive Equipment. — J. S. Hwang, Y. N. Huang, Y. H. Hung, and J. C. Huang; 130(11), 1676-84 (2004).
Tests on Cyclic Behavior of Concrete-Filled Hollow Structural Steel Columns after Exposure to the ISO-834 Standard Fire. — Lin-Hai Han and Xiao-Kang Lin; 130(11), 1807-19 (2004).

Seismic effects

Experimental Study of Jumbo Size Reduced Beam Section Connections Using High-Strength Steel. — Sheng-Jin Chen and Chin-Te Tu; 130(4), 582-7 (2004).
Seismic Response of Electrical Substation Equipment Interconnected by Flexible Conductors. — André Filiatrault and Christopher Stearns; 130(5), 769-78 (2004).

Seismic hazard

Performance Evaluation of Damaged Steel Frame Buildings Subjected to Seismic Loads. — Kihak Lee and Douglas A. Foutch; 130(4), 588-99 (2004).
Seismic Retrofit of Concrete-Masonry-Infilled Steel Frames with Glass Fiber-Reinforced Polymer Laminates. — Wael W. El-Dakhakhni, Ahmad A. Hamid, and Mohamed Elgaaly; 130(9), 1343-52 (2004).

Seismic isolation

Applicability of Seismic Protective Systems to Structures with Vibration-Sensitive Equipment. — J. S. Hwang, Y. N. Huang, Y. H. Hung, and J. C. Huang; 130(11), 1676-84 (2004).

Seismic properties

Cyclic Properties of Superelastic Shape Memory Alloy Wires and Bars. — Reginald DesRoches, Jason McCormick, and Michael Delemont; 130(1), 38-46 (2004).
Brace-Beam-Column Connections for Concentrically Braced Frames with Concrete Filled Tube Columns. — Gregory MacRae, Charles W. Roeder, Chad Gunderson, and Yoshihiro Kimura; 130(2), 233-43 (2004).
Estimation of Seismic Demands on Isolators Based on Nonlinear Analysis. — Keri L. Ryan and Anil K. Chopra; 130(3), 392-402 (2004).

Seismic response

Combination of Modal Responses Consistent with Seismic Input Representation. — P. Cacciola, P. Colajanni, and G. Muscolino; 130(1), 47-55 (2004).
Seismic Behavior of Reinforced Concrete Column-Steel Beam Subassemblies and Frame Systems. — Xuemei Liang and Gustavo J. Parra-Montesinos; 130(2), 310-9 (2004).
Adapting the CQC3 Rule for Three Seismic Components with Different Spectra. — Oscar A. López, Anil K. Chopra, and Julio J. Hernández; 130(3), 403-10 (2004).
Effects of Reference Displacement and Damage Accumulation in Wood Shear Walls. — Jeffrey D. Langlois, Rakesh Gupta, and Thomas H. Miller; 130(3), 470-9 (2004).
Modeling the Dynamic Behavior of Electrical Cabinets and Control Panels: Experimental and Analytical Results. — Sudhir Rustogi and Abhinav Gupta; 130(3), 511-9 (2004).
Seismic Response of Full-Scale Structure with Added Viscoelastic Dampers. — Kuo-Chun Chang and Yu-Yuan Lin; 130(4), 600-8 (2004).
Structural Steel Boundary Elements for Ductile Concrete Walls. — Soon Ho Cho, Bryce Tupper, William D. Cook, and Denis Mitchell; 130(5), 762-8 (2004).
Seismic Response Analysis of a Highway Overcrossing Equipped with Elastomeric Bearings and Fluid Dampers. — Nicos Makris and Jian Zhang; 130(6), 830-45 (2004).
Structural Characterization of Modern Highway Overcrossings—Case Study. — Jian Zhang, Nicos Makris, and Tim Delis; 130(6), 846-60 (2004).
Single Plate Shear Connection Response to Rotation Demands Imposed by Frames Undergoing Cyclic Lateral Displacements. — Joseph P. Crocker and Janice J. Chambers; 130(6), 934-41 (2004).
Seismic Response of Vertically Irregular Frames: Response History and Modal Pushover Analyses. — Chatpan Chintanapakdee and Anil K. Chopra; 130(8), 1177-85 (2004).
Effect of Beam Growth on Reinforced Concrete Frames. — Jubum Kim, John Stanton, and Gregory MacRae; 130(9), 1333-42 (2004).
Seismic Retrofit of Concrete-Masonry-Infilled Steel Frames with Glass Fiber-Reinforced Polymer Laminates. — Wael W. El-Dakhakhni, Ahmad A. Hamid, and Mohamed Elgaaly; 130(9), 1343-52 (2004).
Seismic Analysis of Woodframe Structures. I: Model Formulation. — Bryan Folz and Andre Filiatrault; 130(9), 1353-60 (2004).
Seismic Analysis of Woodframe Structures. II: Model Implementation and Verification. — Bryan Folz and Andre Filiatrault; 130(9), 1361-70 (2004).

Seismic stability

Effect of Column Stiffness on Braced Frame Seismic Behavior. — Gregory A. MacRae, Yoshihiro Kimura, and Charles Roeder; 130(3), 381-91 (2004).

Seismic tests

Seismic Behavior and Design of High-Strength Square Concrete-Filled Steel Tube Beam Columns. — Amit H. Varma, James M. Ricles, Richard Sause, and Le-Wu Lu; 130(2), 169-79 (2004).
Inelastic Force-Deformation Response of Joint Shear Panels in Beam-Column Moment Connections to Concrete-Filled Tubes. — Isao Nishiyama, Toshiaki Fujimoto, Toshiyuki Fukumoto, and Kenzo Yoshioka; 130(2), 244-52 (2004).
Seismic Performance and Stress Transferring Mechanism of Through-Column-Type Joints for Composite Reinforced Concrete and Steel Frames. — Hiroshi Kuramoto and Isao Nishiyama; 130(2), 352-60 (2004).
Component Testing, Seismic Evaluation and Characterization of Buckling-Restrained Braces. — Cameron J. Black, Nicos Makris, and Ian D. Aiken; 130(6), 880-94 (2004).

Sensitivity analysis

Response Sensitivity for Nonlinear Beam–Column Elements. — Michael H. Scott, Paolo Franchin, Gregory L. Fenves, and Filip C. Filippou; 130(9), 1281-8 (2004).

Service life

Cellular Automata Approach to Durability Analysis of Concrete Structures in Aggressive Environments. — Fabio Biondini, Franco Bontempi, Dan M. Frangopol, and Pier Giorgio Malerba; 130(11), 1724-37 (2004).

Shake table tests

Seismic Response of Electrical Substation Equipment Interconnected by Flexible Conductors. — André Filiatrault and Christopher Stearns; 130(5), 769-78 (2004).

Shape memory effect

Cyclic Properties of Superelastic Shape Memory Alloy Wires and Bars. — Reginald DesRoches, Jason McCormick, and Michael Delemont; 130(1), 38-46 (2004).
Steel Beam-Column Connections Using Shape Memory Alloys. — Justin Ocel, Reginald DesRoches, Roberto T. Leon, W. Gregory Hess, Robert Krumme, Jack R. Hayes, and Steve Sweeney; 130(5), 732-40 (2004).

Shear

Local Buckling of Steel Plates in Double Skin Composite Panels under Biaxial Compression and Shear. — Qing Quan Liang, Brian Uy, Howard D. Wright, and Mark A. Bradford; 130(3), 443-51 (2004).
Experimental and Analytical Reexamination of Classic Concrete Beam Tests. — F. J. Vecchio and W. Shim; 130(3), 460-9 (2004).

Shear forces

Plastic Interaction Relationships for Square Hollow Structural Sections: Lower Bound Solution. — Magdi Mohareb and Istemi F. Ozkan; 130(9), 1381-91 (2004).

Shear lag

Numerical Analysis of Mixed-Mode Fracture in Concrete Using Extended Fictitious Crack Model. — Zihai Shi; 130(11), 1738-47 (2004).

Shear resistance

Development of Test Method for Determining Plasterboard Bracing Performance. — Y. L. Liew, E. F. Gad, and C. F. Duffield; 130(7), 1108-16 (2004).
Shear Strength Model for Lightly Reinforced Con-

crete Columns. — Halil Sezen and Jack P. Moehle; 130(11), 1692-703 (2004).

Shear strength

Lateral Load Behavior of Masonry Infilled Steel Frames with Repair and Retrofit. — H. A. Moghaddam; 130(1), 56-63 (2004).

Inelastic Force-Deformation Response of Joint Shear Panels in Beam-Column Moment Connections to Concrete-Filled Tubes. — Isao Nishiyama, Toshiaki Fujimoto, Toshiyuki Fukumoto, and Kenzo Yoshioka; 130(2), 244-52 (2004).

Seismic Behavior of Reinforced Concrete Column-Steel Beam Subassemblies and Frame Systems. — Xuemei Liang and Gustavo J. Parra-Montesinos; 130(2), 310-9 (2004).

Guidelines: Seismic Design of Composite Reinforced Concrete and Steel Buildings. — Isao Nishiyama, Hiroshi Kuramoto, and Hiroshi Noguchi; 130(2), 336-42 (2004).

Seismic Performance and Stress Transferring Mechanism of Through-Column-Type Joints for Composite Reinforced Concrete and Steel Frames. — Hiroshi Kuramoto and Isao Nishiyama; 130(2), 352-60 (2004).

Assessment of Steel and Fiber Reinforced Plastic Jackets for Seismic Retrofit of Reinforced Concrete Columns with Structural Flares. — M. Saiid Saiidi, Frank Martinovic, Brett McElhaney, David Sanders, and Faramarz Gordaninejad; 130(4), 609-17 (2004).

Experimental Studies on Shear Strength of Steel–Concrete Composite Beams. — Jianguo Nie, Yan Xiao, and Lin Chen; 130(8), 1206-13 (2004).

Shear Strength Model for Lightly Reinforced Concrete Columns. — Halil Sezen and Jack P. Moehle; 130(11), 1692-703 (2004).

Reliability Analysis of Block Shear Capacity of Coped Steel Beams. — Cameron R. Franchuk, Robert G. Driver, and Gilbert Y. Grondin; 130(12), 1904-13 (2004).

Shear tests

Development of Test Method for Determining Plasterboard Bracing Performance. — Y. L. Liew, E. F. Gad, and C. F. Duffield; 130(7), 1108-16 (2004).

Shear walls

Cyclic Behavior of Traditional and Innovative Composite Shear Walls. — Qiuhong Zhao and Abolhassan Astaneh-Asl; 130(2), 271-84 (2004).

Inelastic Dynamic Behavior of Hybrid Coupled Walls. — Mohammad Hassan and Sherif El-Tawil; 130(2), 285-96 (2004).

Posttensioned Hybrid Coupled Walls under Lateral Loads. — Yahya C. Kurama and Qiang Shen; 130(2), 297-309 (2004).

Effects of Reference Displacement and Damage Accumulation in Wood Shear Walls. — Jeffrey D. Langlois, Rakesh Gupta, and Thomas H. Miller; 130(3), 470-9 (2004).

Rocking Wall–Frame Structures with Supplemental Tendon Systems. — Jack J. Ajrab, Gokhan Pekcan, and John B. Mander; 130(6), 895-903 (2004).

Repeated Loading Tests of Concrete Walls Containing Headed Shear Reinforcement. — Young Hoon Kim, Young Soo Yoon, William D. Cook, and Denis Mitchell; 130(8), 1233-41 (2004).

Shell structures

Medium-Length Thin-Walled Cylinder under Wind Loading—Case Study. — M. Pircher; 130(12), 2062-9 (2004).

Shrinkage

Masonry Wall Damage by Restraint to Shrinkage. — G. P. A. G. van Zijl, P. A. de Vries, and A. T. Vermeltfoort; 130(7), 1075-86 (2004).

Long-Term Effects on Response of Reinforced Concrete Columns to Cyclic Loading. — A. E. Schultz, S. S. Welton, and L. E. Rey; 130(9), 1320-32 (2004).

Effects of Sustained Load on Concrete-Filled Hollow Structural Steel Columns. — Lin-Hai Han, Zhong Tao, and Wei Liu; 130(9), 1392-404 (2004).

Simulation models

Hurricane Damage Prediction Model for Residential Structures. — Jean-Paul Pinelli, Emil Simiu, Kurt Gurley, Chelakara Subramanian, Liang Zhang, Anne Cope, James J. Filliben, and Shahid Hamid; 130(11), 1685-91 (2004).

Size effect

Size Effect in Axially Loaded Reinforced Concrete Columns. — Sıddık Şener, Ben I. G. Barr, and Hadi F. Abusiaf ; 130(4), 662-70 (2004).

Slabs

Bidirectional Tests on Partially Restrained, Composite Beam-to-Column Connections. — Travis P. Green, Roberto T. Leon, and Gian A. Rassati; 130(2), 320-7 (2004).

Realistic Modeling of Composite and Reinforced Concrete Floor Slabs under Extreme Loading. I: Analytical Method. — B. A. Izzuddin, X. Y. Tao, and A. Y. Elghazouli; 130(12), 1972-84 (2004).

Realistic Modeling of Composite and Reinforced Concrete Floor Slabs under Extreme Loading. II: Verification and Application. — A. Y. Elghazouli and B. A. Izzuddin; 130(12), 1985-96 (2004).

Slenderness ratio

Cyclic Bending Tests to Determine Fully Ductile Section Slenderness Limits for Cold-Formed Circular Hollow Sections. — Mohamed Elchalakani, Xiao-Ling Zhao, and Raphael Grzebieta; 130(7), 1001-10 (2004).

Slip

Pre- and Postyield Finite Element Method Simulation of Bond of Ribbed Reinforcing Bars. — Hamed M. Salem and Koichi Maekawa; 130(4), 671-80 (2004).

Stiffness and Deflection of Steel–Concrete Composite Beams under Negative Bending. — Jianguo Nie, Jiansheng Fan, and C. S Cai; 130(11), 1842-51 (2004).

Social impact

Socioeconomic Implications of Life Quality Index in Design of Optimum Structures to Withstand Earthquakes. — Mauricio Sánchez-Silva and Rüdiger Rackwitz; 130(6), 969-77 (2004).

Soft soils

Inelastic Displacement Ratios for Design of Structures on Soft Soils Sites. — Jorge Ruiz-García and Eduardo Miranda; 130(12), 2051-61 (2004).

Soil modulus

Buckling of Linear Structures above the Surface and/or Underground. — Sohrab Baghery; 130(11), 1748-55 (2004).

Soil-pile interaction

Buckling of Linear Structures above the Surface and/or Underground. — Sohrab Baghery; 130(11), 1748-55 (2004).

Soil-structure interaction

Modeling Soil/Structure Interaction for Masonry Structures. — Mark J. Masia, Peter W. Kleeman, and Robert E. Melchers; 130(4), 641-9 (2004).

Seismic Response Analysis of a Highway Overcrossing Equipped with Elastomeric Bearings and Fluid Dampers. — Nicos Makris and Jian Zhang; 130(6), 830-45 (2004).

Space frames

Analysis and Design of Double-Sided High-Rise Steel Pallet Rack Frames. — Lip H. Teh, Gregory J. Hancock, and Murray J. Clarke; 130(7), 1011-21 (2004).

Space structures

Active Tensegrity Structure. — Etienne Fest, Kristina Shea, and Ian F. C. Smith; 130(10), 1454-65 (2004).

Space truss

Design of Space Trusses Using Ant Colony Optimization. — Charles V. Camp and Barron J. Bichon; 130(5), 741-51 (2004).

Stainless steel

Design of Stiffened Elements in Cold-Formed Stainless Steel Sections. — Kim J. R. Rasmussen, Tim Burns, and Paul Bezkorovainy; 130(11), 1764-71 (2004).

Standards

Design of Cold-Formed Steel Channel Columns with Complex Edge Stiffeners by Direct Strength Method. — Ben Young and Jintang Yan; 130(11), 1756-63 (2004).

Static loads

Experimental Investigation of a Small-Scale Bridge Model under a Moving Mass. — Cristiano Bilello, Lawrence A. Bergman, and Daniel Kuchma; 130(5), 799-804 (2004).

Stationary processes

Characterizing Nonstationary Wind Speed Using Empirical Mode Decomposition. — Y. L. Xu and J. Chen; 130(6), 912-20 (2004).

Statistical analysis

Statistical Wavelet-Based Method for Structural Health Monitoring. — Z. Sun and C. C. Chang; 130(7), 1055-62 (2004).

Steel

Steel Member Strength by Inelastic Lateral Buckling. — N. S. Trahair and G. J. Hancock; 130(1), 64-9 (2004).

Behavior of Centrally Loaded Concrete-Filled Steel-Tube Short Columns. — Kenji Sakino, Hiroyuki Nakahara, Shosuke Morino, and Isao Nishiyama; 130(2), 180-8 (2004).

Finite-Element Model for Collapse and Long-Term Analysis of Steel–Concrete Composite Beams. — M. Fragiacomo, C. Amadio, and L. Macorini; 130(3), 489-97 (2004).

Improved Truss Model for Design of Welded Steel Moment-Resisting Frame Connections. — Jaswant N. Arlekar and C. V. R. Murty; 130(3), 498-510 (2004).

Concrete-Filled Steel Tubes Subjected to Axial Compression and Lateral Cyclic Loads. — Amir Fam, Frank S. Qie, and Sami Rizkalla; 130(4), 631-40 (2004).

Strength and Design of Open Web Steel Joists with Crimped-End Web Members. — Joseph Robert

Yost, David W. Dinehart, Shawn P. Gross, Joseph J. Pote, and Brian Gargan; 130(5), 715-24 (2004).
Steel Beam-Column Connections Using Shape Memory Alloys. — Justin Ocel, Reginald DesRoches, Roberto T. Leon, W. Gregory Hess, Robert Krumme, Jack R. Hayes, and Steve Sweeney; 130(5), 732-40 (2004).
Composite Shear Stud Strength at Early Concrete Ages. — Cem Topkaya, Joseph A. Yura, and Eric B. Williamson; 130(6), 952-60 (2004).
Experimental Studies on Shear Strength of Steel–Concrete Composite Beams. — Jianguo Nie, Yan Xiao, and Lin Chen; 130(8), 1206-13 (2004).
Moment–Rotation Parameters for Composite Shear Tab Connections. — Judy Liu and Abolhassan Astaneh-Asl; 130(9), 1371-80 (2004).
Effects of Sustained Load on Concrete-Filled Hollow Structural Steel Columns. — Lin-Hai Han, Zhong Tao, and Wei Liu; 130(9), 1392-404 (2004).
Interaction Model for Unprotected Concrete Filled Steel Columns Under Standard Fire Conditions. — K. H. Tan and C. Y. Tang; 130(9), 1405-13 (2004).
Modeling Material Failure in Concrete Structures under Cyclic Actions. — Rui Faria, Javier Oliver, and Miguel Cervera; 130(12), 1997-2005 (2004).
Effective Flange Width Definition for Steel–Concrete Composite Bridge Girder. — Methee Chiewanichakorn, Amjad J. Aref, Stuart S. Chen, and Il-Sang Ahn; 130(12), 2016-31 (2004).

Steel beams

Inelastic Force-Deformation Response of Joint Shear Panels in Beam-Column Moment Connections to Concrete-Filled Tubes. — Isao Nishiyama, Toshiaki Fujimoto, Toshiyuki Fukumoto, and Kenzo Yoshioka; 130(2), 244-52 (2004).
Inelastic Dynamic Behavior of Hybrid Coupled Walls. — Mohammad Hassan and Sherif El-Tawil; 130(2), 285-96 (2004).
Finite Element Method Analysis of Hybrid Structural Frames with Reinforced Concrete Columns and Steel Beams. — Hiroshi Noguchi and Kazuhiro Uchida; 130(2), 328-35 (2004).
Seismic Performance and Stress Transferring Mechanism of Through-Column-Type Joints for Composite Reinforced Concrete and Steel Frames. — Hiroshi Kuramoto and Isao Nishiyama; 130(2), 352-60 (2004).
Biaxial Bending of Steel Angle Section Beams. — N. S. Trahair; 130(4), 554-61 (2004).
T-Cleat Connections to Concrete-Filled Tubular Internal Columns. — Abdel-Kareem Al-Rodan; 130(5), 725-31 (2004).
Reliability Analysis of Block Shear Capacity of Coped Steel Beams. — Cameron R. Franchuk, Robert G. Driver, and Gilbert Y. Grondin; 130(12), 1904-13 (2004).

Steel columns

Compressive Strength of Solid Round Steel Bars. — Khaled Sennah and John Wahba; 130(1), 147-51 (2004).
Postbuckling Behavior of Axially Restrained and Axially Loaded Steel Columns under Fire Conditions. — Y. C. Wang; 130(3), 371-80 (2004).
Compression Tests of High Strength Steel Channel Columns with Interaction between Local and Distortional Buckling. — Demao Yang and Gregory J. Hancock; 130(12), 1954-63 (2004).

Steel construction

Overview of U.S.–Japan Research on the Seismic Design of Composite Reinforced Concrete and Steel Moment Frame Structures. — Gregory G. Deierlein and Hiroshi Noguchi; 130(2), 361-7 (2004).

Steel decks

Strength and Performance of Fiber-Reinforced Concrete Composite Slabs. — Carin L. Roberts-Wollmann, Marcela Guirola, and W. Samuel Easterling; 130(3), 520-8 (2004).
Web Crippling Strength of Steel Deck Subjected to End One Flange Loading. — Onur Avci and W. Samuel Easterling; 130(5), 697-707 (2004).

Steel fibers

Strength and Performance of Fiber-Reinforced Concrete Composite Slabs. — Carin L. Roberts-Wollmann, Marcela Guirola, and W. Samuel Easterling; 130(3), 520-8 (2004).

Steel frames

Lateral Load Behavior of Masonry Infilled Steel Frames with Repair and Retrofit. — H. A. Moghaddam; 130(1), 56-63 (2004).
Durability of Galvanized Light-Gauge Steel Shapes. — Y. Sakumoto, H. Nomura, M. Matsumoto, A. Ninomiya, T. Miyao, and Y. Sakamoto; 130(1), 70-7 (2004).
Finite Element Idealization of a Cold-Formed Steel Portal Frame. — James B. P. Lim and David A. Nethercot; 130(1), 78-94 (2004).
Elastoplastic and Large Deflection Analysis of Steel Frames by One Element per Member. I: One Hinge along Member. — Zhi-Hua Zhou and Siu-Lai Chan; 130(4), 538-44 (2004).
Performance Evaluation of Damaged Steel Frame Buildings Subjected to Seismic Loads. — Kihak Lee and Douglas A. Foutch; 130(4), 588-99 (2004).
Nonlinear Plastic Hinge Analysis of Three-Dimensional Steel Frames in Fire. — K. Y. Ma and J. Y. Richard Liew; 130(7), 981-90 (2004).
Explosion and Fire Analysis of Steel Frames Using Fiber Element Approach. — J. Y. Richard Liew and Hong Chen; 130(7), 991-1000 (2004).
Alternative Approaches for Elastic Analysis and Design of Steel Frames. I: Overview. — Andrea E. Surovek-Maleck and Donald W. White; 130(8), 1186-96 (2004).
Alternative Approaches for Elastic Analysis and Design of Steel Frames. II: Verification Studies. — Andrea E. Surovek-Maleck and Donald W. White; 130(8), 1197-205 (2004).
Seismic Retrofit of Concrete-Masonry-Infilled Steel Frames with Glass Fiber-Reinforced Polymer Laminates. — Wael W. El-Dakhakhni, Ahmad A. Hamid, and Mohamed Elgaaly; 130(9), 1343-52 (2004).
Self-Drilling Screw Joints for Cold-Formed Channel Portal Frames. — Julie Mills and Roger LaBoube; 130(11), 1799-806 (2004).
Elastic Stability of Planar Steel Frames with Unsymmetrical Beam Loading. — A. H. Salem, F. F. El Dib, M. El Aghoury, and M. T. Hanna; 130(11), 1852-9 (2004).

Steel plates

Compressive Behavior of Unconfined and Confined Clay Brick Masonry. — Bryan D. Ewing and Mervyn J. Kowalsky; 130(4), 650-61 (2004).

Steel structures

Elastoplastic and Large Deflection Analysis of Steel Frames by One Element per Member. I: One Hinge along Member. — Zhi-Hua Zhou and Siu-Lai Chan; 130(4), 538-44 (2004).
Elastoplastic and Large Deflection Analysis of Steel Frames by One Element per Member. II: Three Hinges along Member. — Siu-Lai Chan and Zhi-Hua Zhou; 130(4), 545-53 (2004).
Experimental Study of Jumbo Size Reduced Beam Section Connections Using High-Strength Steel. — Sheng-Jin Chen and Chin-Te Tu; 130(4), 582-7 (2004).
Similitude Law of Prefracture Hysteresis of Steel Members. — Hitoshi Kuwamura and Naoto Takagi; 130(5), 752-61 (2004).
Structural Steel Boundary Elements for Ductile Concrete Walls. — Soon Ho Cho, Bryce Tupper, William D. Cook, and Denis Mitchell; 130(5), 762-8 (2004).
Self-Drilling Screw Joints for Cold-Formed Channel Portal Frames. — Julie Mills and Roger LaBoube; 130(11), 1799-806 (2004).
Tests and Design of Fixed-Ended Cold-Formed Steel Plain Angle Columns. — Ben Young; 130(12), 1931-40 (2004).

Stiffening

Design Expressions Based on a Finite Element Model of a Stiffened Cold-Formed Steel C-Section. — Steven R. Fox and G. Wayne Brodland; 130(5), 708-14 (2004).
Tests of Unstiffened Plate Elements Under Combined Compression and Bending. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1602-10 (2004).
Effective Widths of Unstiffened Elements with Stress Gradient. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1611-9 (2004).
Design Provisions for Sections Containing Unstiffened Elements with Stress Gradient. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1620-8 (2004).
Design of Cold-Formed Steel Channel Columns with Complex Edge Stiffeners by Direct Strength Method. — Ben Young and Jintang Yan; 130(11), 1756-63 (2004).
Design of Stiffened Elements in Cold-Formed Stainless Steel Sections. — Kim J. R. Rasmussen, Tim Burns, and Paul Bezkorovainy; 130(11), 1764-71 (2004).

Stiffness

Effects of Reference Displacement and Damage Accumulation in Wood Shear Walls. — Jeffrey D. Langlois, Rakesh Gupta, and Thomas H. Miller; 130(3), 470-9 (2004).
Long-Term Effects on Response of Reinforced Concrete Columns to Cyclic Loading. — A. E. Schultz, S. S. Welton, and L. E. Rey; 130(9), 1320-32 (2004).
Stiffness and Deflection of Steel–Concrete Composite Beams under Negative Bending. — Jianguo Nie, Jiansheng Fan, and C. S. Cai; 130(11), 1842-51 (2004).

Stirrups
Repeated Loading Tests of Concrete Walls Containing Headed Shear Reinforcement. — Young Hoon Kim, Young Soo Yoon, William D. Cook, and Denis Mitchell; 130(8), 1233-41 (2004).

Strain rate
Cyclic Properties of Superelastic Shape Memory Alloy Wires and Bars. — Reginald DesRoches, Jason McCormick, and Michael Delemont; 130(1), 38-46 (2004).
Explosion and Fire Analysis of Steel Frames Using Fiber Element Approach. — J. Y. Richard Liew and Hong Chen; 130(7), 991-1000 (2004).

Strength
Local Buckling of Steel Plates in Double Skin Composite Panels under Biaxial Compression and Shear. — Qing Quan Liang, Brian Uy, Howard D. Wright, and Mark A. Bradford; 130(3), 443-51 (2004).

Stress
Effective Widths of Unstiffened Elements with Stress Gradient. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1611-9 (2004).
Design Provisions for Sections Containing Unstiffened Elements with Stress Gradient. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1620-8 (2004).

Stress strain curves
Behavior of Centrally Loaded Concrete-Filled Steel-Tube Short Columns. — Kenji Sakino, Hiroyuki Nakahara, Shosuke Morino, and Isao Nishiyama; 130(2), 180-8 (2004).
Behavior and Modeling of Fiber Reinforced Polymer-Confined Concrete. — J. G. Teng and L. Lam; 130(11), 1713-23 (2004).

Stress strain relations
Compressive Behavior of Unconfined and Confined Clay Brick Masonry. — Bryan D. Ewing and Mervyn J. Kowalsky; 130(4), 650-61 (2004).
Analysis of the Influence of Tensile Strength on the Stability of Eccentrically Compressed Slender Unreinforced Masonry Walls Under Lateral Loads. — Mu Lu, Arturo E. Schultz, and Henryk K. Stolarski; 130(6), 921-33 (2004).

Structural analysis
Compressive Behavior of Unconfined and Confined Clay Brick Masonry. — Bryan D. Ewing and Mervyn J. Kowalsky; 130(4), 650-61 (2004).
Tension-Stiffening Model for Cracked Flexural Concrete Members. — Ll. Torres, F. López-Almansa, and L. M. Bozzo; 130(8), 1242-51 (2004).
Inelastic Deformation Ratios for Design and Evaluation of Structures: Single-Degree-of-Freedom Bilinear Systems. — Anil K. Chopra and Chatpan Chintanapakdee; 130(9), 1309-19 (2004).

Structural control
Shear-Mode Rotary Magnetorheological Damper for Small-Scale Structural Control Experiments. — Tim Tse and C. C. Chang; 130(6), 904-11 (2004).
Behavior of Torsionally Coupled Structures with Variable Frequency Pendulum Isolator. — Pranesh Murnal and Ravi Sinha; 130(7), 1041-54 (2004).

Structural design
Application of the Improved Immune Algorithm to Structural Design Support System. — Ayaho Miyamoto, Hideaki Nakamura, and Leopold Kruszka; 130(1), 108-19 (2004).
Design of I Beams and Deck Profiles under Concentrated Loading. — Tore Tryland, Per K. Larsen, and Magnus Langseth; 130(3), 411-22 (2004).
Socioeconomic Implications of Life Quality Index in Design of Optimum Structures to Withstand Earthquakes. — Mauricio Sánchez-Silva and Rüdiger Rackwitz; 130(6), 969-77 (2004).
Analysis and Design of Double-Sided High-Rise Steel Pallet Rack Frames. — Lip H. Teh, Gregory J. Hancock, and Murray J. Clarke; 130(7), 1011-21 (2004).
Tension-Stiffening Model for Cracked Flexural Concrete Members. — Ll. Torres, F. López-Almansa, and L. M. Bozzo; 130(8), 1242-51 (2004).
Effective Widths of Unstiffened Elements with Stress Gradient. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1611-9 (2004).
Effects of Site Classes on Damping Reduction Factors. — Yu-Yuan Lin and Kuo-Chung Chang; 130(11), 1667-75 (2004).
Design of Cold-Formed Steel Channel Columns with Complex Edge Stiffeners by Direct Strength Method. — Ben Young and Jintang Yan; 130(11), 1756-63 (2004).
Partial Factor Approach to Repetitive-Member System Factors. — David V. Rosowsky and Guangren Yu; 130(11), 1829-41 (2004).
Inelastic Displacement Ratios for Design of Structures on Soft Soils Sites. — Jorge Ruiz-García and Eduardo Miranda; 130(12), 2051-61 (2004).

Structural dynamics
Modeling the Dynamic Behavior of Electrical Cabinets and Control Panels: Experimental and Analytical Results. — Sudhir Rustogi and Abhinav Gupta; 130(3), 511-9 (2004).

Structural engineering
Cyclic Behavior of Traditional and Innovative Composite Shear Walls. — Qiuhong Zhao and Abolhassan Astaneh-Asl; 130(2), 271-84 (2004).

Structural failures
Medium-Length Thin-Walled Cylinder under Wind Loading—Case Study. — M. Pircher; 130(12), 2062-9 (2004).

Structural members
Failure of Lightly Reinforced Concrete Members under Fire. I: Analytical Modeling. — B. A. Izzuddin and A. Y. Elghazouli; 130(1), 3-17 (2004).
Failure of Lightly Reinforced Concrete Members under Fire. II: Parametric Studies and Design Considerations. — A. Y. Elghazouli and B. A. Izzuddin; 130(1), 18-31 (2004).
Partial Factor Approach to Repetitive-Member System Factors. — David V. Rosowsky and Guangren Yu; 130(11), 1829-41 (2004).

Structural models
Nonlinear Analysis of Steel-Concrete Composite Structures: State of the Art. — Enrico Spacone and Sherif El-Tawil; 130(2), 159-68 (2004).
Seismic Performance and Stress Transferring Mechanism of Through-Column-Type Joints for Composite Reinforced Concrete and Steel Frames. — Hiroshi Kuramoto and Isao Nishiyama; 130(2), 352-60 (2004).

Structural reinforcement
Finite-Element Model for Wood-Based Floors with Lateral Reinforcements. — Lei Jiang, Lin Hu, and Ying-Hei Chui; 130(7), 1097-107 (2004).

Structural reliability
Earthquake Duration Effect on Structural Reliability. — John W. van de Lindt and Ginhuat Goh; 130(5), 821-6 (2004).
Statistical Wavelet-Based Method for Structural Health Monitoring. — Z. Sun and C. C. Chang; 130(7), 1055-62 (2004).
Bridge Rating and Reliability Correlation: Comprehensive Study for Different Bridge Types. — Ferhat Akgül and Dan M. Frangopol; 130(7), 1063-74 (2004).
Response Sensitivity for Nonlinear Beam–Column Elements. — Michael H. Scott, Paolo Franchin, Gregory L. Fenves, and Filip C. Filippou; 130(9), 1281-8 (2004).
Measures of Structural Redundancy in Reinforced Concrete Buildings. I: Redundancy Indices. — Mohamed Husain and Panos Tsopelas; 130(11), 1651-8 (2004).
Measures of Structural Redundancy in Reinforced Concrete Buildings. II: Redundancy Response Modification Factor R_R. — Panos Tsopelas and Mohamed Husain; 130(11), 1659-66 (2004).
Prediction of Reliability and Cost Profiles of Deteriorating Bridges under Time- and Performance-Controlled Maintenance. — Jung S. Kong and Dan M. Frangopol; 130(12), 1865-74 (2004).

Structural reliabilty
Partial Factor Approach to Repetitive-Member System Factors. — David V. Rosowsky and Guangren Yu; 130(11), 1829-41 (2004).

Structural safety
Structural Assessment of Corroded Reinforced Concrete Beams: Modeling Guidelines. — D. Coronelli and P. Gambarova; 130(8), 1214-24 (2004).

Structural stability
Alternative Approaches for Elastic Analysis and Design of Steel Frames. I: Overview. — Andrea E. Surovek-Maleck and Donald W. White; 130(8), 1186-96 (2004).
Alternative Approaches for Elastic Analysis and Design of Steel Frames. II: Verification Studies. — Andrea E. Surovek-Maleck and Donald W. White; 130(8), 1197-205 (2004).

Structural strength
Measures of Structural Redundancy in Reinforced Concrete Buildings. I: Redundancy Indices. — Mohamed Husain and Panos Tsopelas; 130(11), 1651-8 (2004).

Studs
Outrigger Beam–Wall Connections. I: Component Testing and Development of Design Model. — Bahram M. Shahrooz, Jeremy T. Deason, and Gokhan Tunc; 130(2), 253-61 (2004).
Outrigger Beam–Wall Connections. II: Subassembly Testing and Further Modeling Enhancements. — Bahram M. Shahrooz, Gokhan Tunc, and Jeremy T. Deason; 130(2), 262-70 (2004).
Composite Shear Stud Strength at Early Concrete Ages. — Cem Topkaya, Joseph A. Yura, and Eric B. Williamson; 130(6), 952-60 (2004).

Stiffness and Deflection of Steel–Concrete Composite Beams under Negative Bending. — Jianguo Nie, Jiansheng Fan, and C. S. Cai; 130(11), 1842-51 (2004).

Superstructures

Lifetime Performance Analysis of Existing Steel Girder Bridge Superstructures. — Ferhat Akgül and Dan M. Frangopol; 130(12), 1875-88 (2004).

Synthetic fibers

Strength and Performance of Fiber-Reinforced Concrete Composite Slabs. — Carin L. Roberts-Wollmann, Marcela Guirola, and W. Samuel Easterling; 130(3), 520-8 (2004).

T joints

Fatigue Performance of Cracked Tubular T Joints under Combined Loads. I: Experimental. — Sing-Ping Chiew, Seng-Tjhen Lie, Chi-King Lee, and Zhi-Wei Huang; 130(4), 562-71 (2004).

Fatigue Performance of Cracked Tubular T Joints under Combined Loads. II: Numerical. — Seng-Tjhen Lie, Sing-Ping Chiew, Chi-King Lee, and Zhi-Wei Huang; 130(4), 572-81 (2004).

Offshore Tubular T-Joints Reinforced with Internal Plain Annular Ring Stiffeners. — M. M. K. Lee and A. Llewelyn-Parry; 130(6), 942-51 (2004).

Temperature

Postbuckling Behavior of Axially Restrained and Axially Loaded Steel Columns under Fire Conditions. — Y. C. Wang; 130(3), 371-80 (2004).

Influence of Concrete Cover on Fire Resistance of Reinforced Concrete Flexural Members. — Xudong Shi, Teng-Hooi Tan, Kang-Hai Tan, and Zhenhai Guo; 130(8), 1225-32 (2004).

Interaction Model for Unprotected Concrete Filled Steel Columns Under Standard Fire Conditions. — K. H. Tan and C. Y. Tang; 130(9), 1405-13 (2004).

Tendons

Rocking Wall–Frame Structures with Supplemental Tendon Systems. — Jack J. Ajrab, Gokhan Pekcan, and John B. Mander; 130(6), 895-903 (2004).

Tensile strength

Analysis of the Influence of Tensile Strength on the Stability of Eccentrically Compressed Slender Unreinforced Masonry Walls Under Lateral Loads. — Mu Lu, Arturo E. Schultz, and Henryk K. Stolarski; 130(6), 921-33 (2004).

Tension

Active Tensegrity Structure. — Etienne Fest, Kristina Shea, and Ian F. C. Smith; 130(10), 1454-65 (2004).

Reliability Analysis of Block Shear Capacity of Coped Steel Beams. — Cameron R. Franchuk, Robert G. Driver, and Gilbert Y. Grondin; 130(12), 1904-13 (2004).

Test procedures

Development of Test Method for Determining Plasterboard Bracing Performance. — Y. L. Liew, E. F. Gad, and C. F. Duffield; 130(7), 1108-16 (2004).

Tests

Experimental and Analytical Reexamination of Classic Concrete Beam Tests. — F. J. Vecchio and W. Shim; 130(3), 460-9 (2004).

Fatigue Performance of Cracked Tubular T Joints under Combined Loads. I: Experimental. — Sing-Ping Chiew, Seng-Tjhen Lie, Chi-King Lee, and Zhi-Wei Huang; 130(4), 562-71 (2004).

Structural Steel Boundary Elements for Ductile Concrete Walls. — Soon Ho Cho, Bryce Tupper, William D. Cook, and Denis Mitchell; 130(5), 762-8 (2004).

Characterization of Cyclic Behavior of Dry Masonry Joints. — Paulo B. Lourenço and Luís F. Ramos; 130(5), 779-86 (2004).

Active Tensegrity Structure. — Etienne Fest, Kristina Shea, and Ian F. C. Smith; 130(10), 1454-65 (2004).

Thickness

Influence of Concrete Cover on Fire Resistance of Reinforced Concrete Flexural Members. — Xudong Shi, Teng-Hooi Tan, Kang-Hai Tan, and Zhenhai Guo; 130(8), 1225-32 (2004).

Thin shell structures

Concrete Shells Form-Finding with Surface Stress Density Method. — Bernard Maurin and René Motro; 130(6), 961-8 (2004).

Thin wall sections

Design Provisions for Sections Containing Unstiffened Elements with Stress Gradient. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1620-8 (2004).

Thin walled structures

Tests and Design of Fixed-Ended Cold-Formed Steel Plain Angle Columns. — Ben Young; 130(12), 1931-40 (2004).

Three-dimensional analysis

Seismic Analysis of Woodframe Structures. I: Model Formulation. — Bryan Folz and Andre Filiatrault; 130(9), 1353-60 (2004).

Seismic Analysis of Woodframe Structures. II: Model Implementation and Verification. — Bryan Folz and Andre Filiatrault; 130(9), 1361-70 (2004).

Thrust

Thrust Restraint Design of Concrete Pressure Pipe. — Mehdi S. Zarghamee, Daniel W. Eggers, Rasko P. Ojdrovic, and Daniel P. Valentine; 130(1), 95-107 (2004).

Timber construction

Development of Test Method for Determining Plasterboard Bracing Performance. — Y. L. Liew, E. F. Gad, and C. F. Duffield; 130(7), 1108-16 (2004).

Behavior of Timber Pile-to-Cap Connections under Cyclic Lateral Loading. — Ayman. A. Shama and John B. Mander; 130(8), 1252-62 (2004).

Improved Analysis of Timber Rivet Connections. — Douglas C. Stahl, Ronald W. Wolfe, and Marshall Begel; 130(8), 1272-9 (2004).

Fragility Assessment of Light-Frame Wood Construction Subjected to Wind and Earthquake Hazards. — Bruce R. Ellingwood, David V. Rosowsky, Yue Li, and Jun Hee Kim; 130(12), 1921-30 (2004).

Torsion

Biaxial Bending of Steel Angle Section Beams. — N. S. Trahair; 130(4), 554-61 (2004).

Seismic Analysis of Asymmetric Buildings with Flexible Floor Diaphragms. — Dhiman Basu and Sudhir K. Jain; 130(8), 1169-76 (2004).

Plastic Interaction Relationships for Square Hollow Structural Sections: Lower Bound Solution. — Magdi Mohareb and Istemi F. Ozkan; 130(9), 1381-91 (2004).

Torsional vibration

Behavior of Torsionally Coupled Structures with Variable Frequency Pendulum Isolator. — Pranesh Murnal and Ravi Sinha; 130(7), 1041-54 (2004).

Towers

Compressive Strength of Solid Round Steel Bars. — Khaled Sennah and John Wahba; 130(1), 147-51 (2004).

Finite Element Analysis Simulation of Airport Approach Lighting Towers. — D. G. Zimcik, M. Nejad Ensan, S. T. Jenq, and M. C. Chao; 130(5), 805-11 (2004).

Transient response

Explosion and Fire Analysis of Steel Frames Using Fiber Element Approach. — J. Y. Richard Liew and Hong Chen; 130(7), 991-1000 (2004).

Transverse shear

Shear Strength Model for Lightly Reinforced Concrete Columns. — Halil Sezen and Jack P. Moehle; 130(11), 1692-703 (2004).

Triaxial loads

Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. I: Experimental Study. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1119-32 (2004).

Tubes

Seismic Behavior of Composite Concrete Filled Steel Tube Column-Wide Flange Beam Moment Connections. — J. M. Ricles, S. W. Peng, and L. W. Lu; 130(2), 223-32 (2004).

Concrete-Filled Steel Tubes Subjected to Axial Compression and Lateral Cyclic Loads. — Amir Fam, Frank S. Qie, and Sami Rizkalla; 130(4), 631-40 (2004).

Cyclic Bending Tests to Determine Fully Ductile Section Slenderness Limits for Cold-Formed Circular Hollow Sections. — Mohamed Elchalakani, Xiao-Ling Zhao, and Raphael Grzebieta; 130(7), 1001-10 (2004).

Typhoons

Characterizing Nonstationary Wind Speed Using Empirical Mode Decomposition. — Y. L. Xu and J. Chen; 130(6), 912-20 (2004).

Ultimate loads

Elastoplastic and Large Deflection Analysis of Steel Frames by One Element per Member. I: One Hinge along Member. — Zhi-Hua Zhou and Siu-Lai Chan; 130(4), 538-44 (2004).

Ultimate strength

Experimental Studies on Shear Strength of Steel–Concrete Composite Beams. — Jianguo Nie, Yan Xiao, and Lin Chen; 130(8), 1206-13 (2004).

Velocity

Estimation of Seismic Demands on Isolators Based on Nonlinear Analysis. — Keri L. Ryan and Anil K. Chopra; 130(3), 392-402 (2004).

Bound of Earthquake Input Energy. — Izuru Takewaki; 130(9), 1289-97 (2004).

Vibration

Model for Lateral Excitation of Footbridges by Synchronous Walking. — Shun-ichi Nakamura; 130(1), 32-7 (2004).

Hybrid Feedback-Least Mean Square Algorithm for Structural Control. — Hongjin Kim and Hojjat Adeli; 130(1), 120-7 (2004).

Wavelet-Hybrid Feedback-Least Mean Square Al-

gorithm for Robust Control of Structures. — Hojjat Adeli and Hongjin Kim; 130(1), 128-37 (2004).
Experimental and Analytical Modal Analysis of Steel Arch Bridge. — Wei-Xin Ren, Tong Zhao, and Issam E. Harik; 130(7), 1022-31 (2004).

Vibration analysis

Statistical Wavelet-Based Method for Structural Health Monitoring. — Z. Sun and C. C. Chang; 130(7), 1055-62 (2004).

Vibration control

Behavior of Torsionally Coupled Structures with Variable Frequency Pendulum Isolator. — Pranesh Murnal and Ravi Sinha; 130(7), 1041-54 (2004).
Measurement Method for Continua by Image Processing. — Junji Yoshida, Masato Abe, Yozo Fujino, and Lewangamage Chamindalal Sujeewa; 130(8), 1145-56 (2004).
Effects of Site Classes on Damping Reduction Factors. — Yu-Yuan Lin and Kuo-Chung Chang; 130(11), 1667-75 (2004).
Applicability of Seismic Protective Systems to Structures with Vibration-Sensitive Equipment. — J. S. Hwang, Y. N. Huang, Y. H. Hung, and J. C. Huang; 130(11), 1676-84 (2004).

Vibration effects

Applicability of Seismic Protective Systems to Structures with Vibration-Sensitive Equipment. — J. S. Hwang, Y. N. Huang, Y. H. Hung, and J. C. Huang; 130(11), 1676-84 (2004).

Viscoelasticity

Seismic Response of Full-Scale Structure with Added Viscoelastic Dampers. — Kuo-Chun Chang and Yu-Yuan Lin; 130(4), 600-8 (2004).

Vortex shedding

Directional Wind-Induced Fatigue of Slender Vertical Structures. — Maria Pia Repetto and Giovanni Solari; 130(7), 1032-40 (2004).

Walls

Outrigger Beam–Wall Connections. I: Component Testing and Development of Design Model. — Bahram M. Shahrooz, Jeremy T. Deason, and Gokhan Tunc; 130(2), 253-61 (2004).
Outrigger Beam–Wall Connections. II: Subassembly Testing and Further Modeling Enhancements. — Bahram M. Shahrooz, Gokhan Tunc, and Jeremy T. Deason; 130(2), 262-70 (2004).
Experimental Investigation of Unreinforced Brick Masonry Walls in Flexure. — Michael Craig Griffith, Nelson T. K. Lam, John Leonard Wilson, and Kevin Doherty; 130(3), 423-32 (2004).
Displacement-Based Design of Slender Reinforced Concrete Structural Walls—Experimental Verification. — John H. Thomsen, IV, and John W. Wallace; 130(4), 618-30 (2004).
Structural Steel Boundary Elements for Ductile Concrete Walls. — Soon Ho Cho, Bryce Tupper, William D. Cook, and Denis Mitchell; 130(5), 762-8 (2004).
Reversed In-Plane Cyclic Behavior of Posttensioned Clay Brick Masonry Walls. — Owen A. Rosenboom and Mervyn J. Kowalsky; 130(5), 787-98 (2004).
Analysis of the Influence of Tensile Strength on the Stability of Eccentrically Compressed Slender Unreinforced Masonry Walls Under Lateral Loads. — Mu Lu, Arturo E. Schultz, and Henryk K. Stolarski; 130(6), 921-33 (2004).
Partial Factor Approach to Repetitive-Member System Factors. — David V. Rosowsky and Guangren Yu; 130(11), 1829-41 (2004).

Webs

Web Crippling Strength of Steel Deck Subjected to End One Flange Loading. — Onur Avci and W. Samuel Easterling; 130(5), 697-707 (2004).
Design Expressions Based on a Finite Element Model of a Stiffened Cold-Formed Steel C-Section. — Steven R. Fox and G. Wayne Brodland; 130(5), 708-14 (2004).
Strength and Design of Open Web Steel Joists with Crimped-End Web Members. — Joseph Robert Yost, David W. Dinehart, Shawn P. Gross, Joseph J. Pote, and Brian Gargan; 130(5), 715-24 (2004).

Welds

Modern Approach of Design of Welded Components Subjected to Fatigue Loading. — Abir Ghosh; 130(5), 812-20 (2004).
Improving the Ductility of Knee Joints between Rectangular Hollow Sections. — Lip H. Teh and Gregory J. Hancock; 130(11), 1790-8 (2004).

Wind direction

Directional Wind-Induced Fatigue of Slender Vertical Structures. — Maria Pia Repetto and Giovanni Solari; 130(7), 1032-40 (2004).

Wind effects

Displacement-Based Design of Slender Reinforced Concrete Structural Walls—Experimental Verification. — John H. Thomsen, IV, and John W. Wallace; 130(4), 618-30 (2004).

Wind force

Efficacy of the Implied Approximation in the Identification of Flutter Derivatives. — Xinzhong Chen and Ahsan Kareem; 130(12), 2070-4 (2004).

Wind loads

Directional Wind-Induced Fatigue of Slender Vertical Structures. — Maria Pia Repetto and Giovanni Solari; 130(7), 1032-40 (2004).
Medium-Length Thin-Walled Cylinder under Wind Loading—Case Study. — M. Pircher; 130(12), 2062-9 (2004).

Wind speed

Characterizing Nonstationary Wind Speed Using Empirical Mode Decomposition. — Y. L. Xu and J. Chen; 130(6), 912-20 (2004).

Wind tunnel tests

Efficacy of the Implied Approximation in the Identification of Flutter Derivatives. — Xinzhong Chen and Ahsan Kareem; 130(12), 2070-4 (2004).

Wind tunnels

Shear-Mode Rotary Magnetorheological Damper for Small-Scale Structural Control Experiments. — Tim Tse and C. C. Chang; 130(6), 904-11 (2004).

Wood

Energy-based Design of Dowel Connections in Wood-Plastic Composites Hollow Sections. — William R. Parsons and Donald A. Bender; 130(4), 681-9 (2004).

Wood floors

Finite-Element Model for Wood-Based Floors with Lateral Reinforcements. — Lei Jiang, Lin Hu, and Ying-Hei Chui; 130(7), 1097-107 (2004).

Wooden structures

Effects of Reference Displacement and Damage Accumulation in Wood Shear Walls. — Jeffrey D. Langlois, Rakesh Gupta, and Thomas H. Miller; 130(3), 470-9 (2004).
Design Models of Light Frame Wood Buildings under Lateral Loads. — B. Kasal, M. S. Collins, P. Paevere, and G. C. Foliente; 130(8), 1263-71 (2004).
Improved Analysis of Timber Rivet Connections. — Douglas C. Stahl, Ronald W. Wolfe, and Marshall Begel; 130(8), 1272-9 (2004).
Seismic Analysis of Woodframe Structures. I: Model Formulation. — Bryan Folz and Andre Filiatrault; 130(9), 1353-60 (2004).
Seismic Analysis of Woodframe Structures. II: Model Implementation and Verification. — Bryan Folz and Andre Filiatrault; 130(9), 1361-70 (2004).
Partial Factor Approach to Repetitive-Member System Factors. — David V. Rosowsky and Guangren Yu; 130(11), 1829-41 (2004).
Fragility Assessment of Light-Frame Wood Construction Subjected to Wind and Earthquake Hazards. — Bruce R. Ellingwood, David V. Rosowsky, Yue Li, and Jun Hee Kim; 130(12), 1921-30 (2004).

Yield

Experimental Studies on Shear Strength of Steel–Concrete Composite Beams. — Jianguo Nie, Yan Xiao, and Lin Chen; 130(8), 1206-13 (2004).

Yield strength

Nonlinear Plastic Hinge Analysis of Three-Dimensional Steel Frames in Fire. — K. Y. Ma and J. Y. Richard Liew; 130(7), 981-90 (2004).

Author Index

Abe, Masato
Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. I: Experimental Study. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1119-32 (2004).
Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. II: Modeling. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1133-44 (2004).
Measurement Method for Continua by Image Processing. — Junji Yoshida, Masato Abe, Yozo Fujino, and Lewangamage Chamindalal Sujeewa; 130(8), 1145-56 (2004).

Abusiaf , Hadi F.
Size Effect in Axially Loaded Reinforced Concrete Columns. — Sıddık Şener, Ben I. G. Barr, and Hadi F. Abusiaf ; 130(4), 662-70 (2004).

Adeli, Hojjat
Hybrid Feedback-Least Mean Square Algorithm for Structural Control. — Hongjin Kim and Hojjat Adeli; 130(1), 120-7 (2004).
Wavelet-Hybrid Feedback-Least Mean Square Algorithm for Robust Control of Structures. — Hojjat Adeli and Hongjin Kim; 130(1), 128-37 (2004).

Ahn, Il-Sang
Effective Flange Width Definition for Steel–Concrete Composite Bridge Girder. — Methee Chiewanichakorn, Amjad J. Aref, Stuart S. Chen, and Il-Sang Ahn; 130(12), 2016-31 (2004).

Aiken, Ian D.
Component Testing, Seismic Evaluation and Characterization of Buckling-Restrained Braces. — Cameron J. Black, Nicos Makris, and Ian D. Aiken; 130(6), 880-94 (2004).

Ajrab, Jack J.
Rocking Wall–Frame Structures with Supplemental Tendon Systems. — Jack J. Ajrab, Gokhan Pekcan, and John B. Mander; 130(6), 895-903 (2004).

Akgül, Ferhat
Bridge Rating and Reliability Correlation: Comprehensive Study for Different Bridge Types. — Ferhat Akgül and Dan M. Frangopol; 130(7), 1063-74 (2004).
Lifetime Performance Analysis of Existing Steel Girder Bridge Superstructures. — Ferhat Akgül and Dan M. Frangopol; 130(12), 1875-88 (2004).

Alarcón, Enrique
Experimental and Analytical Study of Masonry Infill Reinforced Concrete Frames Retrofitted with Steel Braces. — Ricardo Perera, Susana Gómez, and Enrique Alarcón; 130(12), 2032-9 (2004).

Alqam, Maha
Probabilistic Based Design of Concentrically Loaded Fiber-Reinforced Polymeric Compression Members. — Maha Alqam, Richard M. Bennett, and Abdul-Hamid Zureick; 130(12), 1914-20 (2004).

Al-Rodan, Abdel-Kareem
T-Cleat Connections to Concrete-Filled Tubular Internal Columns. — Abdel-Kareem Al-Rodan; 130(5), 725-31 (2004).

Amadio, C.
Finite-Element Model for Collapse and Long-Term Analysis of Steel–Concrete Composite Beams. — M. Fragiacomo, C. Amadio, and L. Macorini; 130(3), 489-97 (2004).

Aref, Amjad J.
Effective Flange Width Definition for Steel–Concrete Composite Bridge Girder. — Methee Chiewanichakorn, Amjad J. Aref, Stuart S. Chen, and Il-Sang Ahn; 130(12), 2016-31 (2004).

Arlekar, Jaswant N.
Improved Truss Model for Design of Welded Steel Moment-Resisting Frame Connections. — Jaswant N. Arlekar and C. V. R. Murty; 130(3), 498-510 (2004).

Aschheim, Mark A.
Seismic Design of Columns of Short Bridges Accounting for Embankment Flexibility. — Mehmet Inel and Mark A. Aschheim; 130(10), 1515-28 (2004).

Astaneh-Asl, Abolhassan
Cyclic Behavior of Traditional and Innovative Composite Shear Walls. — Qiuhong Zhao and Abolhassan Astaneh-Asl; 130(2), 271-84 (2004).
Moment–Rotation Parameters for Composite Shear Tab Connections. — Judy Liu and Abolhassan Astaneh-Asl; 130(9), 1371-80 (2004).

Avci, Onur
Web Crippling Strength of Steel Deck Subjected to End One Flange Loading. — Onur Avci and W. Samuel Easterling; 130(5), 697-707 (2004).

Azizinamini, Atorod
Moment Connections to Circular Concrete-Filled Steel Tube Columns. — Atorod Azizinamini and Stephen P. Schneider; 130(2), 213-22 (2004).

Baghery, Sohrab
Buckling of Linear Structures above the Surface and/or Underground. — Sohrab Baghery; 130(11), 1748-55 (2004).

Baker, G.
Analytical Model for Predication of Crack Spacing due to Shrinkage in Concrete Pavements. — G. Chen and G. Baker; 130(10), 1529-33 (2004).

Balkaya, Can
Three-Dimensional Effects on Openings of Laterally Loaded Pierced Shear Walls. — Can Balkaya and Erol Kalkan; 130(10), 1506-14 (2004).

Bambach, M. R.
Tests of Unstiffened Plate Elements Under Combined Compression and Bending. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1602-10 (2004).
Effective Widths of Unstiffened Elements with Stress Gradient. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1611-9 (2004).
Design Provisions for Sections Containing Unstiffened Elements with Stress Gradient. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1620-8 (2004).

Barr, Ben I. G.
Size Effect in Axially Loaded Reinforced Concrete Columns. — Sıddık Şener, Ben I. G. Barr, and Hadi F. Abusiaf ; 130(4), 662-70 (2004).

Bartlett, F. Michael
Impact of New ACI 318 Flexural Resistance Factor on Bond Failures. — Christopher R. Scollard and F. Michael Bartlett; 130(1), 138-46 (2004).

Basu, Dhiman
Seismic Analysis of Asymmetric Buildings with Flexible Floor Diaphragms. — Dhiman Basu and Sudhir K. Jain; 130(8), 1169-76 (2004).

Begel, Marshall
Improved Analysis of Timber Rivet Connections. — Douglas C. Stahl, Ronald W. Wolfe, and Marshall Begel; 130(8), 1272-9 (2004).

Bender, Donald A.
Energy-based Design of Dowel Connections in Wood-Plastic Composites Hollow Sections. — William R. Parsons and Donald A. Bender; 130(4), 681-9 (2004).

Bennett, Richard M.
Probabilistic Based Design of Concentrically Loaded Fiber-Reinforced Polymeric Compression Members. — Maha Alqam, Richard M. Bennett, and Abdul-Hamid Zureick; 130(12), 1914-20 (2004).

Bergman, Lawrence A.
Experimental Investigation of a Small-Scale Bridge Model under a Moving Mass. — Cristiano Bilello, Lawrence A. Bergman, and Daniel Kuchma; 130(5), 799-804 (2004).

Bernardo, L. F. A.
Neutral Axis Depth versus Flexural Ductility in High-Strength Concrete Beams. — L. F. A. Bernardo and S. M. R. Lopes; 130(3), 452-9 (2004).

Bezkorovainy, Paul
Design of Stiffened Elements in Cold-Formed Stainless Steel Sections. — Kim J. R. Rasmussen, Tim Burns, and Paul Bezkorovainy; 130(11), 1764-71 (2004).

Bichon, Barron J.
Design of Space Trusses Using Ant Colony Optimization. — Charles V. Camp and Barron J. Bichon; 130(5), 741-51 (2004).

Bilello, Cristiano
Experimental Investigation of a Small-Scale Bridge Model under a Moving Mass. — Cristiano Bilello, Lawrence A. Bergman, and Daniel Kuchma; 130(5), 799-804 (2004).

Billington, David P.
Anton Tedesko and the Introduction of Thin Shell Concrete Roofs in the United States. — Eric M. Hines and David P. Billington; 130(11), 1639-50 (2004).

Billington, Sarah L.
Seismic Analysis of Reinforced Concrete Frame Buildings Using Interface Modeling. — Tong-Seok Han and Sarah L. Billington; 130(8), 1157-68 (2004).

Biondini, Fabio
Cellular Automata Approach to Durability Analysis of Concrete Structures in Aggressive Environments. — Fabio Biondini, Franco Bontempi, Dan M. Frangopol, and Pier Giorgio Malerba; 130(11), 1724-37 (2004).

Black, Cameron J.
Component Testing, Seismic Evaluation and Characterization of Buckling-Restrained Braces. — Cameron J. Black, Nicos Makris, and Ian D. Aiken; 130(6), 880-94 (2004).

Bonet, J. L.
Analytical Approach to Failure Surfaces in Reinforced Concrete Sections Subjected to Axial Loads and Biaxial Bending. — J. L. Bonet, P. F. Miguel, M. A. Fernandez, and M. L. Romero; 130(12), 2006-15 (2004).

Bonowitz, David
Discussion of "Seismic Performance Evaluation of Pre-Northridge Steel Frame Buildings with Brittle Connections" by Kihak Lee and Douglas A. Foutch. — Bruce F. Maison and David Bonowitz; 130(4), 690-1 (2004).

Bontempi, Franco
Cellular Automata Approach to Durability Analysis of Concrete Structures in Aggressive Environments. — Fabio Biondini, Franco Bontempi, Dan M. Frangopol, and Pier Giorgio Malerba; 130(11), 1724-37 (2004).

Bozzo, L. M.
Tension-Stiffening Model for Cracked Flexural Concrete Members. — Ll. Torres, F. López-Almansa, and L. M. Bozzo; 130(8), 1242-51 (2004).

Bracci, Joseph
Recent Findings from Phase V of the United States–Japan Cooperative Earthquake Research Program. — Sherif El-Tawil and Joseph Bracci; 130(2), 155-6 (2004).

Bradford, Mark A.
Local Buckling of Steel Plates in Double Skin Composite Panels under Biaxial Compression and Shear. — Qing Quan Liang, Brian Uy, Howard D. Wright, and Mark A. Bradford; 130(3), 443-51 (2004).

Brodland, G. Wayne
Design Expressions Based on a Finite Element Model of a Stiffened Cold-Formed Steel C-Section. — Steven R. Fox and G. Wayne Brodland; 130(5), 708-14 (2004).

Brown, Kevin
Investigation of Notched Composite Wood–Concrete Connections. — Richard M. Gutkowski, Kevin Brown, Abdalla Shigidi, and Julius Natterer; 130(10), 1553-61 (2004).

Bruneau, Michel
Seismic Testing of Repaired Unreinforced Masonry Building having Flexible Diaphragm. — Jocelyn Paquette, Michel Bruneau, and Svetlana Brzev; 130(10), 1487-96 (2004).

Bruno, Silvia
Role of Damage Functions in Evaluation of Response Modification Factors. — Luis D. Decanini, Silvia Bruno, and Fabrizio Mollaioli; 130(9), 1298-308 (2004).

Brzev, Svetlana
Seismic Testing of Repaired Unreinforced Masonry Building having Flexible Diaphragm. — Jocelyn Paquette, Michel Bruneau, and Svetlana Brzev; 130(10), 1487-96 (2004).

Buchanan, Andrew
Computer Modeling of Restrained Reinforced Concrete Slabs in Fire Conditions. — Linus Lim, Andrew Buchanan, Peter Moss, and Jean-Marc Franssen; 130(12), 1964-71 (2004).

Burns, Tim
Design of Stiffened Elements in Cold-Formed Stainless Steel Sections. — Kim J. R. Rasmussen, Tim Burns, and Paul Bezkorovainy; 130(11), 1764-71 (2004).

Cacciola, P.
Combination of Modal Responses Consistent with Seismic Input Representation. — P. Cacciola, P. Colajanni, and G. Muscolino; 130(1), 47-55 (2004).

Cai, C. S.
Stiffness and Deflection of Steel–Concrete Composite Beams under Negative Bending. — Jianguo Nie, Jiansheng Fan, and C. S. Cai; 130(11), 1842-51 (2004).

Calderone, Anthony
Experimental Evaluation of the Seismic Performance of Reinforced Concrete Bridge Columns. — Dawn Lehman, Jack Moehle, Stephen Mahin, Anthony Calderone, and Lena Henry; 130(6), 869-79 (2004).

Camp, Charles V.
Design of Space Trusses Using Ant Colony Optimization. — Charles V. Camp and Barron J. Bichon; 130(5), 741-51 (2004).

Cervera, Miguel
Modeling Material Failure in Concrete Structures under Cyclic Actions. — Rui Faria, Javier Oliver, and Miguel Cervera; 130(12), 1997-2005 (2004).

Chambers, Janice J.
Single Plate Shear Connection Response to Rotation Demands Imposed by Frames Undergoing Cyclic Lateral Displacements. — Joseph P. Crocker and Janice J. Chambers; 130(6), 934-41 (2004).

Chan, Siu-Lai
Elastoplastic and Large Deflection Analysis of Steel Frames by One Element per Member. I: One Hinge along Member. — Zhi-Hua Zhou and Siu-Lai Chan; 130(4), 538-44 (2004).
Elastoplastic and Large Deflection Analysis of Steel Frames by One Element per Member. II: Three Hinges along Member. — Siu-Lai Chan and Zhi-Hua Zhou; 130(4), 545-53 (2004).

Chang, C. C.
Shear-Mode Rotary Magnetorheological Damper for Small-Scale Structural Control Experiments. — Tim Tse and C. C. Chang; 130(6), 904-11 (2004).
Statistical Wavelet-Based Method for Structural Health Monitoring. — Z. Sun and C. C. Chang; 130(7), 1055-62 (2004).

Chang, Kuo-Chun
Seismic Response of Full-Scale Structure with Added Viscoelastic Dampers. — Kuo-Chun Chang and Yu-Yuan Lin; 130(4), 600-8 (2004).
Performance of a Seismically Isolated Bridge under Near-Fault Earthquake Ground Motions. — Jerry Shen, Meng-Hao Tsai, Kuo-Chun Chang, and George C. Lee; 130(6), 861-8 (2004).

Chang, Kuo-Chung
Effects of Site Classes on Damping Reduction Factors. — Yu-Yuan Lin and Kuo-Chung Chang; 130(11), 1667-75 (2004).

Chao, M. C.
Finite Element Analysis Simulation of Airport Approach Lighting Towers. — D. G. Zimcik, M. Nejad Ensan, S. T. Jenq, and M. C. Chao; 130(5), 805-11 (2004).

Charkas, Hasan
Simplified Nonlinear Analysis of Strengthened Concrete Beams Based on a Rigorous Approach. — Hayder A. Rasheed, Hasan Charkas, and Hani Melhem; 130(7), 1087-96 (2004).

Chen, G.
Analytical Model for Predication of Crack Spacing due to Shrinkage in Concrete Pavements. — G. Chen and G. Baker; 130(10), 1529-33 (2004).

Chen, Hong
Explosion and Fire Analysis of Steel Frames Using Fiber Element Approach. — J. Y. Richard Liew and Hong Chen; 130(7), 991-1000 (2004).

Chen, J.
Characterizing Nonstationary Wind Speed Using Empirical Mode Decomposition. — Y. L. Xu and J. Chen; 130(6), 912-20 (2004).

Chen, Lin
Experimental Studies on Shear Strength of Steel–Concrete Composite Beams. — Jianguo Nie, Yan Xiao, and Lin Chen; 130(8), 1206-13 (2004).

Chen, Sheng-Jin
Experimental Study of Jumbo Size Reduced Beam Section Connections Using High-Strength Steel. — Sheng-Jin Chen and Chin-Te Tu; 130(4), 582-7 (2004).

Chen, Stuart S.
Effective Flange Width Definition for Steel–Concrete Composite Bridge Girder. — Methee Chiewanichakorn, Amjad J. Aref, Stuart S. Chen, and Il-Sang Ahn; 130(12), 2016-31 (2004).

Chen, Xinzhong
Equivalent Static Wind Loads on Buildings: New Model. — Xinzhong Chen and Ahsan Kareem; 130(10), 1425-35 (2004).
Efficacy of the Implied Approximation in the Identification of Flutter Derivatives. — Xinzhong Chen and Ahsan Kareem; 130(12), 2070-4 (2004).

Chiew, Sing-Ping
Fatigue Performance of Cracked Tubular T Joints under Combined Loads. I: Experimental. — Sing-Ping Chiew, Seng-Tjhen Lie, Chi-King Lee, and Zhi-Wei Huang; 130(4), 562-71 (2004).
Fatigue Performance of Cracked Tubular T Joints under Combined Loads. II: Numerical. — Seng-Tjhen Lie, Sing-Ping Chiew, Chi-King Lee, and Zhi-Wei Huang; 130(4), 572-81 (2004).

Chiewanichakorn, Methee
Effective Flange Width Definition for Steel–Concrete Composite Bridge Girder. — Methee Chiewanichakorn, Amjad J. Aref, Stuart S. Chen, and Il-Sang Ahn; 130(12), 2016-31 (2004).

Chintanapakdee, Chatpan
Seismic Response of Vertically Irregular Frames: Response History and Modal Pushover Analyses. — Chatpan Chintanapakdee and Anil K. Chopra; 130(8), 1177-85 (2004).
Inelastic Deformation Ratios for Design and Evaluation of Structures: Single-Degree-of-Freedom Bilinear Systems. — Anil K. Chopra and Chatpan Chintanapakdee; 130(9), 1309-19 (2004).

Cho, Soon Ho
Structural Steel Boundary Elements for Ductile Concrete Walls. — Soon Ho Cho, Bryce Tupper, William D. Cook, and Denis Mitchell; 130(5), 762-8 (2004).

Chopra, Anil K.
Estimation of Seismic Demands on Isolators Based on Nonlinear Analysis. — Keri L. Ryan and Anil K. Chopra; 130(3), 392-402 (2004).
Adapting the CQC3 Rule for Three Seismic Components with Different Spectra. — Oscar A. López, Anil K. Chopra, and Julio J. Hernández; 130(3), 403-10 (2004).
Seismic Response of Vertically Irregular Frames: Response History and Modal Pushover Analyses. — Chatpan Chintanapakdee and Anil K. Chopra; 130(8), 1177-85 (2004).
Inelastic Deformation Ratios for Design and Evaluation of Structures: Single-Degree-of-Freedom Bilinear Systems. — Anil K. Chopra and Chatpan Chintanapakdee; 130(9), 1309-19 (2004).

Chui, Ying-Hei
Finite-Element Model for Wood-Based Floors with Lateral Reinforcements. — Lei Jiang, Lin Hu, and Ying-Hei Chui; 130(7), 1097-107 (2004).

Clarke, Murray J.
Analysis and Design of Double-Sided High-Rise Steel Pallet Rack Frames. — Lip H. Teh, Gregory J. Hancock, and Murray J. Clarke; 130(7), 1011-21 (2004).

Clemson, Robert L.
Parametric Study of Coupled Wall Behavior—Implications for the Design of Coupling Beams. — Kent A. Harries, J. Dan'l Moulton, and Robert L. Clemson; 130(3), 480-8 (2004).

Colajanni, P.
Combination of Modal Responses Consistent with Seismic Input Representation. — P. Cacciola, P. Colajanni, and G. Muscolino; 130(1), 47-55 (2004).

Collins, Kevin R.
Retrofitting Suspension Bridges Using Distributed Dampers. — Thomas P. Murphy and Kevin R. Collins; 130(10), 1466-74 (2004).

Collins, M. S.
Design Models of Light Frame Wood Buildings under Lateral Loads. — B. Kasal, M. S. Collins, P. Paevere, and G. C. Foliente; 130(8), 1263-71 (2004).

Cook, William D.
Structural Steel Boundary Elements for Ductile Concrete Walls. — Soon Ho Cho, Bryce Tupper, William D. Cook, and Denis Mitchell; 130(5), 762-8 (2004).
Repeated Loading Tests of Concrete Walls Containing Headed Shear Reinforcement. — Young Hoon Kim, Young Soo Yoon, William D. Cook, and Denis Mitchell; 130(8), 1233-41 (2004).

Cope, Anne
Hurricane Damage Prediction Model for Residential Structures. — Jean-Paul Pinelli, Emil Simiu, Kurt Gurley, Chelakara Subramanian, Liang Zhang, Anne Cope, James J. Filliben, and Shahid Hamid; 130(11), 1685-91 (2004).

Coronelli, D.
Structural Assessment of Corroded Reinforced Concrete Beams: Modeling Guidelines. — D. Coronelli and P. Gambarova; 130(8), 1214-24 (2004).

Crocker, Joseph P.
Single Plate Shear Connection Response to Rotation Demands Imposed by Frames Undergoing Cyclic Lateral Displacements. — Joseph P. Crocker and Janice J. Chambers; 130(6), 934-41 (2004).

Deason, Jeremy T.
Outrigger Beam–Wall Connections. I: Component Testing and Development of Design Model. — Bahram M. Shahrooz, Jeremy T. Deason, and Gokhan Tunc; 130(2), 253-61 (2004).
Outrigger Beam–Wall Connections. II: Subassembly Testing and Further Modeling Enhancements. — Bahram M. Shahrooz, Gokhan Tunc, and Jeremy T. Deason; 130(2), 262-70 (2004).

Decanini, Luis D.
Role of Damage Functions in Evaluation of Response Modification Factors. — Luis D. Decanini, Silvia Bruno, and Fabrizio Mollaioli; 130(9), 1298-308 (2004).

Deierlein, Gregory G.
Overview of U.S.–Japan Research on the Seismic Design of Composite Reinforced Concrete and Steel Moment Frame Structures. — Gregory G. Deierlein and Hiroshi Noguchi; 130(2), 361-7 (2004).

Delemont, Michael
Cyclic Properties of Superelastic Shape Memory Alloy Wires and Bars. — Reginald DesRoches, Jason McCormick, and Michael Delemont; 130(1), 38-46 (2004).

Delis, Tim
Structural Characterization of Modern Highway Overcrossings—Case Study. — Jian Zhang, Nicos Makris, and Tim Delis; 130(6), 846-60 (2004).

Dere, Yunus
Modified Iterative Group-Implicit Algorithm for the Dynamic Analysis of Structures. — Yunus Dere and Elisa D. Sotelino; 130(10), 1436-44 (2004).

DesRoches, Reginald
Cyclic Properties of Superelastic Shape Memory Alloy Wires and Bars. — Reginald DesRoches, Jason McCormick, and Michael Delemont; 130(1), 38-46 (2004).
Steel Beam-Column Connections Using Shape Memory Alloys. — Justin Ocel, Reginald DesRoches, Roberto T. Leon, W. Gregory Hess, Robert Krumme, Jack R. Hayes, and Steve Sweeney; 130(5), 732-40 (2004).

de Vries, P. A.
Masonry Wall Damage by Restraint to Shrinkage. — G. P. A. G. van Zijl, P. A. de Vries, and A. T. Vermeltfoort; 130(7), 1075-86 (2004).

Dinehart, David W.
Strength and Design of Open Web Steel Joists with Crimped-End Web Members. — Joseph Robert Yost, David W. Dinehart, Shawn P. Gross, Joseph J. Pote, and Brian Gargan; 130(5), 715-24 (2004).

Doherty, Kevin
Experimental Investigation of Unreinforced Brick Masonry Walls in Flexure. — Michael Craig Griffith, Nelson T. K. Lam, John Leonard Wilson, and Kevin Doherty; 130(3), 423-32 (2004).

Driver, Robert G.
Reliability Analysis of Block Shear Capacity of Coped Steel Beams. — Cameron R. Franchuk, Robert G. Driver, and Gilbert Y. Grondin; 130(12), 1904-13 (2004).

Duffield, C. F.
Development of Test Method for Determining Plasterboard Bracing Performance. — Y. L. Liew, E. F. Gad, and C. F. Duffield; 130(7), 1108-16 (2004).

Ďuricová, A.
Discussion of "Analysis of Shear Lag Anomaly in Box Girders" by S. C. Lee, C. H. Yoo, and D. Y. Yoon. — M. Rovňák and A. Ďuricová; 130(11), 1860-1 (2004).

Easterling, W. Samuel
Strength and Performance of Fiber-Reinforced Concrete Composite Slabs. — Carin L. Roberts-Wollmann, Marcela Guirola, and W. Samuel Easterling; 130(3), 520-8 (2004).
Web Crippling Strength of Steel Deck Subjected to End One Flange Loading. — Onur Avci and W. Samuel Easterling; 130(5), 697-707 (2004).

Eggers, Daniel W.
Thrust Restraint Design of Concrete Pressure Pipe. — Mehdi S. Zarghamee, Daniel W. Eggers, Rasko P. Ojdrovic, and Daniel P. Valentine; 130(1), 95-107 (2004).

El Aghoury, M.
Elastic Stability of Planar Steel Frames with Unsymmetrical Beam Loading. — A. H. Salem, F. F. El Dib, M. El Aghoury, and M. T. Hanna; 130(11), 1852-9 (2004).

Elchalakani, Mohamed
Cyclic Bending Tests to Determine Fully Ductile Section Slenderness Limits for Cold-Formed Circular Hollow Sections. — Mohamed Elchalakani, Xiao-Ling Zhao, and Raphael Grzebieta; 130(7), 1001-10 (2004).

El-Dakhakhni, Wael W.
Seismic Retrofit of Concrete-Masonry-Infilled Steel Frames with Glass Fiber-Reinforced Polymer Laminates. — Wael W. El-Dakhakhni, Ahmad A. Hamid, and Mohamed Elgaaly; 130(9), 1343-52 (2004).

El Dib, F. F.
Elastic Stability of Planar Steel Frames with Unsymmetrical Beam Loading. — A. H. Salem, F. F. El Dib, M. El Aghoury, and M. T. Hanna; 130(11), 1852-9 (2004).

Elgaaly, Mohamed
Seismic Retrofit of Concrete-Masonry-Infilled Steel Frames with Glass Fiber-Reinforced Polymer Laminates. — Wael W. El-Dakhakhni, Ahmad A. Hamid, and Mohamed Elgaaly; 130(9), 1343-52 (2004).

Elghazouli, A. Y.
Failure of Lightly Reinforced Concrete Members under Fire. I: Analytical Modeling. — B. A. Izzuddin and A. Y. Elghazouli; 130(1), 3-17 (2004).
Failure of Lightly Reinforced Concrete Members under Fire. II: Parametric Studies and Design Considerations. — A. Y. Elghazouli and B. A. Izzuddin; 130(1), 18-31 (2004).
Realistic Modeling of Composite and Reinforced Concrete Floor Slabs under Extreme Loading. I: Analytical Method. — B. A. Izzuddin, X. Y. Tao, and A. Y. Elghazouli; 130(12), 1972-84 (2004).
Realistic Modeling of Composite and Reinforced Concrete Floor Slabs under Extreme Loading. II: Verification and Application. — A. Y. Elghazouli and B. A. Izzuddin; 130(12), 1985-96 (2004).

Ellingwood, Bruce R.
Fragility Assessment of Light-Frame Wood Construction Subjected to Wind and Earthquake Hazards. — Bruce R. Ellingwood, David V. Rosowsky, Yue Li, and Jun Hee Kim; 130(12), 1921-30 (2004).

El-Tawil, Sherif
Recent Findings from Phase V of the United States–Japan Cooperative Earthquake Research Program. — Sherif El-Tawil and Joseph Bracci; 130(2), 155-6 (2004).
Nonlinear Analysis of Steel-Concrete Composite Structures: State of the Art. — Enrico Spacone and Sherif El-Tawil; 130(2), 159-68 (2004).
Inelastic Dynamic Behavior of Hybrid Coupled Walls. — Mohammad Hassan and Sherif El-Tawil; 130(2), 285-96 (2004).
Editor's Note. — Sherif El-Tawil; 130(12), 1863-4 (2004).

Ensan, M. Nejad
Finite Element Analysis Simulation of Airport Approach Lighting Towers. — D. G. Zimcik, M. Nejad Ensan, S. T. Jenq, and M. C. Chao; 130(5), 805-11 (2004).

Espion, Bernard
Discussion of "Exact Finite Element for Nonuniform Torsion of Open Sections" by Magdi Mohareb and Farhood Nowzartash. — Katy Saadé, Bernard Espion, and Guy Warzée; 130(9), 1420 (2004).

Estes, Allen C.
Bridge Deck Replacement for Minimum Expected Cost Under Multiple Reliability Constraints. — Mark G. Stewart, Allen C. Estes, and Dan M. Frangopol; 130(9), 1414-9 (2004).

Ewing, Bryan D.
Compressive Behavior of Unconfined and Confined Clay Brick Masonry. — Bryan D. Ewing and Mervyn J. Kowalsky; 130(4), 650-61 (2004).

Fam, Amir
Concrete-Filled Steel Tubes Subjected to Axial Compression and Lateral Cyclic Loads. — Amir Fam, Frank S. Qie, and Sami Rizkalla; 130(4), 631-40 (2004).

Fan, Jiansheng
Stiffness and Deflection of Steel–Concrete Composite Beams under Negative Bending. — Jianguo Nie, Jiansheng Fan, and C. S. Cai; 130(11), 1842-51 (2004).

Faria, Rui
Modeling Material Failure in Concrete Structures under Cyclic Actions. — Rui Faria, Javier Oliver, and Miguel Cervera; 130(12), 1997-2005 (2004).

Fenves, Gregory L.
Characterization and Modeling of Friction Pendulum Bearings Subjected to Multiple Components of Excitation. — Gilberto Mosqueda, Andrew S. Whittaker, and Gregory L. Fenves; 130(3), 433-42 (2004).
Response Sensitivity for Nonlinear Beam–Column Elements. — Michael H. Scott, Paolo Franchin, Gregory L. Fenves, and Filip C. Filippou; 130(9), 1281-8 (2004).

Fernandez, M. A.
Analytical Approach to Failure Surfaces in Reinforced Concrete Sections Subjected to Axial Loads and Biaxial Bending. — J. L. Bonet, P. F. Miguel, M. A. Fernandez, and M. L. Romero; 130(12), 2006-15 (2004).

Fest, Etienne
Active Tensegrity Structure. — Etienne Fest, Kristina Shea, and Ian F. C. Smith; 130(10), 1454-65 (2004).

Filiatrault, Andre
Seismic Analysis of Woodframe Structures. I: Model Formulation. — Bryan Folz and Andre Filiatrault; 130(9), 1353-60 (2004).
Seismic Analysis of Woodframe Structures. II: Model Implementation and Verification. — Bryan Folz and Andre Filiatrault; 130(9), 1361-70 (2004).

Filiatrault, André
Seismic Response of Electrical Substation Equipment Interconnected by Flexible Conductors. — André Filiatrault and Christopher Stearns; 130(5), 769-78 (2004).

Filippou, Filip C.
Response Sensitivity for Nonlinear Beam–Column Elements. — Michael H. Scott, Paolo Franchin, Gregory L. Fenves, and Filip C. Filippou; 130(9), 1281-8 (2004).

Filliben, James J.
Hurricane Damage Prediction Model for Residential Structures. — Jean-Paul Pinelli, Emil Simiu, Kurt Gurley, Chelakara Subramanian, Liang Zhang, Anne Cope, James J. Filliben, and Shahid Hamid; 130(11), 1685-91 (2004).

Foliente, G. C.
Design Models of Light Frame Wood Buildings under Lateral Loads. — B. Kasal, M. S. Collins, P. Paevere, and G. C. Foliente; 130(8), 1263-71 (2004).

Folz, Bryan
Seismic Analysis of Woodframe Structures. I: Model Formulation. — Bryan Folz and Andre Filiatrault; 130(9), 1353-60 (2004).
Seismic Analysis of Woodframe Structures. II: Model Implementation and Verification. — Bryan Folz and Andre Filiatrault; 130(9), 1361-70 (2004).

Foutch, Douglas A.
Performance Evaluation of Damaged Steel Frame Buildings Subjected to Seismic Loads. — Kihak Lee and Douglas A. Foutch; 130(4), 588-99 (2004).
Closure to "Seismic Performance Evaluation of Pre-Northridge Steel Frame Buildings with Brittle Connections" by Kihak Lee and Douglas A. Foutch. — Kihak Lee and Douglas A. Foutch; 130(4), 692 (2004).

Fox, Steven R.
Design Expressions Based on a Finite Element Model of a Stiffened Cold-Formed Steel C-Section. — Steven R. Fox and G. Wayne Brodland; 130(5), 708-14 (2004).

Fragiacomo, M.
Finite-Element Model for Collapse and Long-Term Analysis of Steel–Concrete Composite Beams. — M. Fragiacomo, C. Amadio, and L. Macorini; 130(3), 489-97 (2004).

Franchin, Paolo
Response Sensitivity for Nonlinear Beam–Column Elements. — Michael H. Scott, Paolo Franchin, Gregory L. Fenves, and Filip C. Filippou; 130(9), 1281-8 (2004).

Franchuk, Cameron R.
Reliability Analysis of Block Shear Capacity of Coped Steel Beams. — Cameron R. Franchuk, Robert G. Driver, and Gilbert Y. Grondin; 130(12), 1904-13 (2004).

Frangopol, Dan M.
Bridge Rating and Reliability Correlation: Comprehensive Study for Different Bridge Types. — Ferhat Akgül and Dan M. Frangopol; 130(7), 1063-74 (2004).
Bridge Deck Replacement for Minimum Expected Cost Under Multiple Reliability Constraints. — Mark G. Stewart, Allen C. Estes, and Dan M. Frangopol; 130(9), 1414-9 (2004).
Cost–Reliability Interaction in Life-Cycle Cost Optimization of Deteriorating Structures. — Jung S. Kong and Dan M. Frangopol; 130(11), 1704-12 (2004).

Cellular Automata Approach to Durability Analysis of Concrete Structures in Aggressive Environments. — Fabio Biondini, Franco Bontempi, Dan M. Frangopol, and Pier Giorgio Malerba; 130(11), 1724-37 (2004).
Prediction of Reliability and Cost Profiles of Deteriorating Bridges under Time- and Performance-Controlled Maintenance. — Jung S. Kong and Dan M. Frangopol; 130(12), 1865-74 (2004).
Lifetime Performance Analysis of Existing Steel Girder Bridge Superstructures. — Ferhat Akgül and Dan M. Frangopol; 130(12), 1875-88 (2004).

Franssen, Jean-Marc
Computer Modeling of Restrained Reinforced Concrete Slabs in Fire Conditions. — Linus Lim, Andrew Buchanan, Peter Moss, and Jean-Marc Franssen; 130(12), 1964-71 (2004).

Fujii, Sigeru
Closure to "Local Stresses and Crack Displacements in Reinforced Concrete Elements" by Yuichi Sato and Shigeru Fujii. — Yuichi Sato and Sigeru Fujii; 130(5), 827 (2004).

Fujimoto, Toshiaki
Behavior of Eccentrically Loaded Concrete-Filled Steel Tubular Columns. — Toshiaki Fujimoto, Akiyoshi Mukai, Isao Nishiyama, and Kenji Sakino; 130(2), 203-12 (2004).
Inelastic Force-Deformation Response of Joint Shear Panels in Beam-Column Moment Connections to Concrete-Filled Tubes. — Isao Nishiyama, Toshiaki Fujimoto, Toshiyuki Fukumoto, and Kenzo Yoshioka; 130(2), 244-52 (2004).

Fujino, Yozo
Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. I: Experimental Study. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1119-32 (2004).
Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. II: Modeling. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1133-44 (2004).
Measurement Method for Continua by Image Processing. — Junji Yoshida, Masato Abe, Yozo Fujino, and Lewangamage Chamindalal Sujeewa; 130(8), 1145-56 (2004).

Fukumoto, Toshiyuki
Behavior of Concrete-Filled Steel Tube Beam Columns. — Eiichi Inai, Akiyoshi Mukai, Makoto Kai, Hiroyoshi Tokinoya, Toshiyuki Fukumoto, and Koji Mori; 130(2), 189-202 (2004).
Inelastic Force-Deformation Response of Joint Shear Panels in Beam-Column Moment Connections to Concrete-Filled Tubes. — Isao Nishiyama, Toshiaki Fujimoto, Toshiyuki Fukumoto, and Kenzo Yoshioka; 130(2), 244-52 (2004).

Gad, E. F.
Development of Test Method for Determining Plasterboard Bracing Performance. — Y. L. Liew, E. F. Gad, and C. F. Duffield; 130(7), 1108-16 (2004).

Gambarova, P.
Structural Assessment of Corroded Reinforced Concrete Beams: Modeling Guidelines. — D. Coronelli and P. Gambarova; 130(8), 1214-24 (2004).

Gardner, L.
Numerical Modeling of Stainless Steel Structural Components—A Consistent Approach. — L. Gardner and D. A. Nethercot; 130(10), 1586-601 (2004).

Gargan, Brian
Strength and Design of Open Web Steel Joists with Crimped-End Web Members. — Joseph Robert Yost, David W. Dinehart, Shawn P. Gross, Joseph J. Pote, and Brian Gargan; 130(5), 715-24 (2004).

Ghosh, Abir
Modern Approach of Design of Welded Components Subjected to Fatigue Loading. — Abir Ghosh; 130(5), 812-20 (2004).

Goel, Subhash C.
United States–Japan Cooperative Earthquake Engineering Research Program on Composite and Hybrid Structures. — Subhash C. Goel; 130(2), 157-8 (2004).

Goh, Ginhuat
Earthquake Duration Effect on Structural Reliability. — John W. van de Lindt and Ginhuat Goh; 130(5), 821-6 (2004).

Gómez, Susana
Experimental and Analytical Study of Masonry Infill Reinforced Concrete Frames Retrofitted with Steel Braces. — Ricardo Perera, Susana Gómez, and Enrique Alarcón; 130(12), 2032-9 (2004).

Gordaninejad, Faramarz
Assessment of Steel and Fiber Reinforced Plastic Jackets for Seismic Retrofit of Reinforced Concrete Columns with Structural Flares. — M. Saiid Saiidi, Frank Martinovic, Brett McElhaney, David Sanders, and Faramarz Gordaninejad; 130(4), 609-17 (2004).

Goto, Yoshiaki
Analysis to Predict Long-Term Mechanical Performance of Steel Structures with Histories of Corrosion and Repair. — Yoshiaki Goto and Naoki Kawanishi; 130(10), 1578-85 (2004).

Green, Travis P.
Bidirectional Tests on Partially Restrained, Composite Beam-to-Column Connections. — Travis P. Green, Roberto T. Leon, and Gian A. Rassati; 130(2), 320-7 (2004).

Griffith, Michael Craig
Experimental Investigation of Unreinforced Brick Masonry Walls in Flexure. — Michael Craig Griffith, Nelson T. K. Lam, John Leonard Wilson, and Kevin Doherty; 130(3), 423-32 (2004).

Grondin, Gilbert Y.
Reliability Analysis of Block Shear Capacity of Coped Steel Beams. — Cameron R. Franchuk, Robert G. Driver, and Gilbert Y. Grondin; 130(12), 1904-13 (2004).

Gross, Shawn P.
Strength and Design of Open Web Steel Joists with Crimped-End Web Members. — Joseph Robert Yost, David W. Dinehart, Shawn P. Gross, Joseph J. Pote, and Brian Gargan; 130(5), 715-24 (2004).

Grzebieta, Raphael
Cyclic Bending Tests to Determine Fully Ductile Section Slenderness Limits for Cold-Formed Circular Hollow Sections. — Mohamed Elchalakani, Xiao-Ling Zhao, and Raphael Grzebieta; 130(7), 1001-10 (2004).

Guan, Z. W.
Nonlinear Finite Element Modeling of Crack Behavior in Oriented Strand Board Webbed Wood I-Beams with Openings. — Z. W. Guan and E. C. Zhu; 130(10), 1562-9 (2004).

Guirola, Marcela
Strength and Performance of Fiber-Reinforced Concrete Composite Slabs. — Carin L. Roberts-Wollmann, Marcela Guirola, and W. Samuel Easterling; 130(3), 520-8 (2004).

Günay, M. Selim
Performance-Based Seismic Rehabilitation of Damaged Reinforced Concrete Buildings. — Haluk Sucuoğlu, Türel Gür, and M. Selim Günay; 130(10), 1475-86 (2004).

Gunderson, Chad
Brace-Beam-Column Connections for Concentrically Braced Frames with Concrete Filled Tube Columns. — Gregory MacRae, Charles W. Roeder, Chad Gunderson, and Yoshihiro Kimura; 130(2), 233-43 (2004).

Guo, Zhenhai
Influence of Concrete Cover on Fire Resistance of Reinforced Concrete Flexural Members. — Xudong Shi, Teng-Hooi Tan, Kang-Hai Tan, and Zhenhai Guo; 130(8), 1225-32 (2004).

Gupta, Abhinav
Modeling the Dynamic Behavior of Electrical Cabinets and Control Panels: Experimental and Analytical Results. — Sudhir Rustogi and Abhinav Gupta; 130(3), 511-9 (2004).

Gupta, Rakesh
Effects of Reference Displacement and Damage Accumulation in Wood Shear Walls. — Jeffrey D. Langlois, Rakesh Gupta, and Thomas H. Miller; 130(3), 470-9 (2004).

Gür, Türel
Performance-Based Seismic Rehabilitation of Damaged Reinforced Concrete Buildings. — Haluk Sucuoğlu, Türel Gür, and M. Selim Günay; 130(10), 1475-86 (2004).

Gurley, Kurt
Hurricane Damage Prediction Model for Residential Structures. — Jean-Paul Pinelli, Emil Simiu, Kurt Gurley, Chelakara Subramanian, Liang Zhang, Anne Cope, James J. Filliben, and Shahid Hamid; 130(11), 1685-91 (2004).

Gutkowski, Richard M.
Investigation of Notched Composite Wood–Concrete Connections. — Richard M. Gutkowski, Kevin Brown, Abdalla Shigidi, and Julius Natterer; 130(10), 1553-61 (2004).

Hamid, Ahmad A.
Seismic Retrofit of Concrete-Masonry-Infilled Steel Frames with Glass Fiber-Reinforced Polymer Laminates. — Wael W. El-Dakhakhni, Ahmad A. Hamid, and Mohamed Elgaaly; 130(9), 1343-52 (2004).

Hamid, Shahid
Hurricane Damage Prediction Model for Residential Structures. — Jean-Paul Pinelli, Emil Simiu, Kurt Gurley, Chelakara Subramanian, Liang Zhang, Anne Cope, James J. Filliben, and Shahid Hamid; 130(11), 1685-91 (2004).

Han, Lin-Hai
Effects of Sustained Load on Concrete-Filled Hollow Structural Steel Columns. — Lin-Hai Han, Zhong Tao, and Wei Liu; 130(9), 1392-404 (2004).
Tests on Cyclic Behavior of Concrete-Filled Hollow Structural Steel Columns after Exposure to the ISO-834 Standard Fire. — Lin-Hai Han and Xiao-Kang Lin; 130(11), 1807-19 (2004).

Han, Tong-Seok
Seismic Analysis of Reinforced Concrete Frame Buildings Using Interface Modeling. — Tong-Seok Han and Sarah L. Billington; 130(8), 1157-68 (2004).

Hancock, G. J.
Steel Member Strength by Inelastic Lateral Buckling. — N. S. Trahair and G. J. Hancock; 130(1), 64-9 (2004).

Hancock, Gregory J.
Analysis and Design of Double-Sided High-Rise Steel Pallet Rack Frames. — Lip H. Teh, Gregory J. Hancock, and Murray J. Clarke; 130(7), 1011-21 (2004).
Compression Tests of Cold-Reduced High Strength Steel Sections. I: Stub Columns. — Demao Yang and Gregory J. Hancock; 130(11), 1772-81 (2004).
Compression Tests of Cold-Reduced High Strength Steel Sections. II: Long Columns. — Demao Yang, Gregory J. Hancock, and Kim J. R. Rasmussen; 130(11), 1782-9 (2004).
Improving the Ductility of Knee Joints between Rectangular Hollow Sections. — Lip H. Teh and Gregory J. Hancock; 130(11), 1790-8 (2004).
Compression Tests of High Strength Steel Channel Columns with Interaction between Local and Distortional Buckling. — Demao Yang and Gregory J. Hancock; 130(12), 1954-63 (2004).

Hanna, M. T.
Elastic Stability of Planar Steel Frames with Unsymmetrical Beam Loading. — A. H. Salem, F. F. El Dib, M. El Aghoury, and M. T. Hanna; 130(11), 1852-9 (2004).

Harik, Issam E.
Experimental and Analytical Modal Analysis of Steel Arch Bridge. — Wei-Xin Ren, Tong Zhao, and Issam E. Harik; 130(7), 1022-31 (2004).

Harries, Kent A.
Parametric Study of Coupled Wall Behavior—Implications for the Design of Coupling Beams. — Kent A. Harries, J. Dan'l Moulton, and Robert L. Clemson; 130(3), 480-8 (2004).

Hassan, Mohammad
Inelastic Dynamic Behavior of Hybrid Coupled Walls. — Mohammad Hassan and Sherif El-Tawil; 130(2), 285-96 (2004).

Hayes, Jack R.
Steel Beam-Column Connections Using Shape Memory Alloys. — Justin Ocel, Reginald DesRoches, Roberto T. Leon, W. Gregory Hess, Robert Krumme, Jack R. Hayes, and Steve Sweeney; 130(5), 732-40 (2004).

Henry, Lena
Experimental Evaluation of the Seismic Performance of Reinforced Concrete Bridge Columns. — Dawn Lehman, Jack Moehle, Stephen Mahin, Anthony Calderone, and Lena Henry; 130(6), 869-79 (2004).

Hernández, Julio J.
Adapting the CQC3 Rule for Three Seismic Components with Different Spectra. — Oscar A. López, Anil K. Chopra, and Julio J. Hernández; 130(3), 403-10 (2004).

Hess, W. Gregory
Steel Beam-Column Connections Using Shape Memory Alloys. — Justin Ocel, Reginald DesRoches, Roberto T. Leon, W. Gregory Hess, Robert Krumme, Jack R. Hayes, and Steve Sweeney; 130(5), 732-40 (2004).

Hines, Eric M.
Anton Tedesko and the Introduction of Thin Shell Concrete Roofs in the United States. — Eric M. Hines and David P. Billington; 130(11), 1639-50 (2004).

Hu, Lin
Finite-Element Model for Wood-Based Floors with Lateral Reinforcements. — Lei Jiang, Lin Hu, and Ying-Hei Chui; 130(7), 1097-107 (2004).

Huang, J. C.
Applicability of Seismic Protective Systems to Structures with Vibration-Sensitive Equipment. — J. S. Hwang, Y. N. Huang, Y. H. Hung, and J. C. Huang; 130(11), 1676-84 (2004).

Huang, Y. N.
Applicability of Seismic Protective Systems to Structures with Vibration-Sensitive Equipment. — J. S. Hwang, Y. N. Huang, Y. H. Hung, and J. C. Huang; 130(11), 1676-84 (2004).

Huang, Zhi-Wei
Fatigue Performance of Cracked Tubular T Joints under Combined Loads. I: Experimental. — Sing-Ping Chiew, Seng-Tjhen Lie, Chi-King Lee, and Zhi-Wei Huang; 130(4), 562-71 (2004).
Fatigue Performance of Cracked Tubular T Joints under Combined Loads. II: Numerical. — Seng-Tjhen Lie, Sing-Ping Chiew, Chi-King Lee, and Zhi-Wei Huang; 130(4), 572-81 (2004).

Hung, Y. H.
Applicability of Seismic Protective Systems to Structures with Vibration-Sensitive Equipment. — J. S. Hwang, Y. N. Huang, Y. H. Hung, and J. C. Huang; 130(11), 1676-84 (2004).

Husain, Mohamed
Measures of Structural Redundancy in Reinforced Concrete Buildings. I: Redundancy Indices. — Mohamed Husain and Panos Tsopelas; 130(11), 1651-8 (2004).
Measures of Structural Redundancy in Reinforced Concrete Buildings. II: Redundancy Response Modification Factor R_R. — Panos Tsopelas and Mohamed Husain; 130(11), 1659-66 (2004).

Hwang, J. S.
Applicability of Seismic Protective Systems to Structures with Vibration-Sensitive Equipment. — J. S. Hwang, Y. N. Huang, Y. H. Hung, and J. C. Huang; 130(11), 1676-84 (2004).

Hwang, Shyh-Jiann
Closure to "Strength Prediction for Discontinuity Regions by Softened Strut-and-Tie Model" by Shyh-Jiann Hwang and Hung-Jen Lee. — Shyh-Jiann Hwang and Hung-Jen Lee; 130(3), 530-1 (2004).

Inai, Eiichi
Behavior of Concrete-Filled Steel Tube Beam Columns. — Eiichi Inai, Akiyoshi Mukai, Makoto Kai, Hiroyoshi Tokinoya, Toshiyuki Fukumoto, and Koji Mori; 130(2), 189-202 (2004).

Inel, Mehmet
Seismic Design of Columns of Short Bridges Accounting for Embankment Flexibility. — Mehmet Inel and Mark A. Aschheim; 130(10), 1515-28 (2004).

Ingham, Jason M.
Structural Testing of Large-Scale Posttensioned Concrete Masonry Walls. — Peter T. Laursen and Jason M. Ingham; 130(10), 1497-505 (2004).

Izzuddin, B. A.
Failure of Lightly Reinforced Concrete Members under Fire. I: Analytical Modeling. — B. A. Izzuddin and A. Y. Elghazouli; 130(1), 3-17 (2004).
Failure of Lightly Reinforced Concrete Members under Fire. II: Parametric Studies and Design Considerations. — A. Y. Elghazouli and B. A. Izzuddin; 130(1), 18-31 (2004).
Realistic Modeling of Composite and Reinforced Concrete Floor Slabs under Extreme Loading. I: Analytical Method. — B. A. Izzuddin, X. Y. Tao, and A. Y. Elghazouli; 130(12), 1972-84 (2004).
Realistic Modeling of Composite and Reinforced Concrete Floor Slabs under Extreme Loading. II: Verification and Application. — A. Y. Elghazouli and B. A. Izzuddin; 130(12), 1985-96 (2004).

Jain, Sudhir K.
Seismic Analysis of Asymmetric Buildings with Flexible Floor Diaphragms. — Dhiman Basu and Sudhir K. Jain; 130(8), 1169-76 (2004).

Jenq, S. T.
Finite Element Analysis Simulation of Airport Approach Lighting Towers. — D. G. Zimcik, M. Nejad Ensan, S. T. Jenq, and M. C. Chao; 130(5), 805-11 (2004).

Jiang, Lei
Finite-Element Model for Wood-Based Floors with Lateral Reinforcements. — Lei Jiang, Lin Hu, and Ying-Hei Chui; 130(7), 1097-107 (2004).

Kai, Makoto
Behavior of Concrete-Filled Steel Tube Beam Columns. — Eiichi Inai, Akiyoshi Mukai, Makoto Kai, Hiroyoshi Tokinoya, Toshiyuki Fukumoto, and Koji Mori; 130(2), 189-202 (2004).

Kalkan, Erol
Three-Dimensional Effects on Openings of Laterally Loaded Pierced Shear Walls. — Can Balkaya and Erol Kalkan; 130(10), 1506-14 (2004).

Kareem, Ahsan
Equivalent Static Wind Loads on Buildings: New Model. — Xinzhong Chen and Ahsan Kareem; 130(10), 1425-35 (2004).
Efficacy of the Implied Approximation in the Identification of Flutter Derivatives. — Xinzhong Chen and Ahsan Kareem; 130(12), 2070-4 (2004).

Kasal, B.
Design Models of Light Frame Wood Buildings under Lateral Loads. — B. Kasal, M. S. Collins, P. Paevere, and G. C. Foliente; 130(8), 1263-71 (2004).

Kawanishi, Naoki
Analysis to Predict Long-Term Mechanical Performance of Steel Structures with Histories of Corrosion and Repair. — Yoshiaki Goto and Naoki Kawanishi; 130(10), 1578-85 (2004).

Kim, Hongjin
Hybrid Feedback-Least Mean Square Algorithm for Structural Control. — Hongjin Kim and Hojjat Adeli; 130(1), 120-7 (2004).
Wavelet-Hybrid Feedback-Least Mean Square Algorithm for Robust Control of Structures. — Hojjat Adeli and Hongjin Kim; 130(1), 128-37 (2004).

Kim, Jubum
Effect of Beam Growth on Reinforced Concrete Frames. — Jubum Kim, John Stanton, and Gregory MacRae; 130(9), 1333-42 (2004).

Kim, Jun Hee
Fragility Assessment of Light-Frame Wood Construction Subjected to Wind and Earthquake Hazards. — Bruce R. Ellingwood, David V. Rosowsky, Yue Li, and Jun Hee Kim; 130(12), 1921-30 (2004).

Kim, Young Hoon
Repeated Loading Tests of Concrete Walls Containing Headed Shear Reinforcement. — Young Hoon Kim, Young Soo Yoon, William D. Cook, and Denis Mitchell; 130(8), 1233-41 (2004).

Kimura, Yoshihiro
Brace-Beam-Column Connections for Concentrically Braced Frames with Concrete Filled Tube Columns. — Gregory MacRae, Charles W. Roeder, Chad Gunderson, and Yoshihiro Kimura; 130(2), 233-43 (2004).
Effect of Column Stiffness on Braced Frame Seismic Behavior. — Gregory A. MacRae, Yoshihiro Kimura, and Charles Roeder; 130(3), 381-91 (2004).

Kleeman, Peter W.
Modeling Soil/Structure Interaction for Masonry Structures. — Mark J. Masia, Peter W. Kleeman, and Robert E. Melchers; 130(4), 641-9 (2004).

Kong, Jung S.
Cost–Reliability Interaction in Life-Cycle Cost Optimization of Deteriorating Structures. — Jung S. Kong and Dan M. Frangopol; 130(11), 1704-12 (2004).
Prediction of Reliability and Cost Profiles of Deteriorating Bridges under Time- and Performance-Controlled Maintenance. — Jung S. Kong and Dan M. Frangopol; 130(12), 1865-74 (2004).

Kowalsky, Mervyn J.
Compressive Behavior of Unconfined and Confined Clay Brick Masonry. — Bryan D. Ewing and Mervyn J. Kowalsky; 130(4), 650-61 (2004).
Reversed In-Plane Cyclic Behavior of Posttensioned Clay Brick Masonry Walls. — Owen A. Rosenboom and Mervyn J. Kowalsky; 130(5), 787-98 (2004).

Krumme, Robert
Steel Beam-Column Connections Using Shape Memory Alloys. — Justin Ocel, Reginald DesRoches, Roberto T. Leon, W. Gregory Hess, Robert Krumme, Jack R. Hayes, and Steve Sweeney; 130(5), 732-40 (2004).

Kruszka, Leopold
Application of the Improved Immune Algorithm to Structural Design Support System. — Ayaho Miyamoto, Hideaki Nakamura, and Leopold Kruszka; 130(1), 108-19 (2004).

Kuchma, Daniel
Experimental Investigation of a Small-Scale Bridge Model under a Moving Mass. — Cristiano Bilello, Lawrence A. Bergman, and Daniel Kuchma; 130(5), 799-804 (2004).

Kunnath, Sashi K.
Editor's Note. — Sashi K. Kunnath; 130(1), 1-2 (2004).
Editor's Note. — Sashi K. Kunnath; 130(3), 369-70 (2004).
Editor's Note. — Sashi K. Kunnath; 130(4), 533-7 (2004).
Editor's Note. — Sashi K. Kunnath; 130(5), 695-6 (2004).
Editor's Note. — Sashi K. Kunnath; 130(6), 829 (2004).
Editor's Note. — Sashi K. Kunnath; 130(7), 979-80 (2004).
Editor's Note. — Sashi K. Kunnath; 130(8), 1117-8 (2004)
EDITOR'S NOTE. — Sashi K. Kunnath; 130(10), 1423-4 (2004).
Editor's Note. — Sashi K. Kunnath; 130(11), 1637-8 (L) (2004).

Kurama, Yahya C.
Posttensioned Hybrid Coupled Walls under Lateral Loads. — Yahya C. Kurama and Qiang Shen; 130(2), 297-309 (2004).

Kuramoto, Hiroshi
Guidelines: Seismic Design of Composite Reinforced Concrete and Steel Buildings. — Isao Nishiyama, Hiroshi Kuramoto, and Hiroshi Noguchi; 130(2), 336-42 (2004).
Seismic Performance and Stress Transferring Mechanism of Through-Column-Type Joints for Composite Reinforced Concrete and Steel Frames. — Hiroshi Kuramoto and Isao Nishiyama; 130(2), 352-60 (2004).

Kuwamura, Hitoshi
Similitude Law of Prefracture Hysteresis of Steel Members. — Hitoshi Kuwamura and Naoto Takagi; 130(5), 752-61 (2004).

LaBoube, Roger
Self-Drilling Screw Joints for Cold-Formed Channel Portal Frames. — Julie Mills and Roger LaBoube; 130(11), 1799-806 (2004).

Lam, L.
Behavior and Modeling of Fiber Reinforced Polymer-Confined Concrete. — J. G. Teng and L. Lam; 130(11), 1713-23 (2004).

Lam, Nelson T. K.
Experimental Investigation of Unreinforced Brick Masonry Walls in Flexure. — Michael Craig Griffith, Nelson T. K. Lam, John Leonard Wilson, and Kevin Doherty; 130(3), 423-32 (2004).

Langlois, Jeffrey D.
Effects of Reference Displacement and Damage Accumulation in Wood Shear Walls. — Jeffrey D. Langlois, Rakesh Gupta, and Thomas H. Miller; 130(3), 470-9 (2004).

Langseth, Magnus
Design of I Beams and Deck Profiles under Concentrated Loading. — Tore Tryland, Per K. Larsen, and Magnus Langseth; 130(3), 411-22 (2004).

Larsen, Per K.
Design of I Beams and Deck Profiles under Concentrated Loading. — Tore Tryland, Per K. Larsen, and Magnus Langseth; 130(3), 411-22 (2004).

Laursen, Peter T.
Structural Testing of Large-Scale Posttensioned Concrete Masonry Walls. — Peter T. Laursen and Jason M. Ingham; 130(10), 1497-505 (2004).

Lee, Chi-King
Fatigue Performance of Cracked Tubular T Joints under Combined Loads. I: Experimental. — Sing-Ping Chiew, Seng-Tjhen Lie, Chi-King Lee, and Zhi-Wei Huang; 130(4), 562-71 (2004).
Fatigue Performance of Cracked Tubular T Joints under Combined Loads. II: Numerical. — Seng-Tjhen Lie, Sing-Ping Chiew, Chi-King Lee, and Zhi-Wei Huang; 130(4), 572-81 (2004).

Lee, George C.
Performance of a Seismically Isolated Bridge under Near-Fault Earthquake Ground Motions. — Jerry Shen, Meng-Hao Tsai, Kuo-Chun Chang, and George C. Lee; 130(6), 861-8 (2004).

Lee, Hung-Jen
Closure to "Strength Prediction for Discontinuity Regions by Softened Strut-and-Tie Model" by Shyh-Jiann Hwang and Hung-Jen Lee. — Shyh-Jiann Hwang and Hung-Jen Lee; 130(3), 530-1 (2004).

Lee, Kihak
Performance Evaluation of Damaged Steel Frame Buildings Subjected to Seismic Loads. — Kihak Lee and Douglas A. Foutch; 130(4), 588-99 (2004).
Closure to "Seismic Performance Evaluation of Pre-Northridge Steel Frame Buildings with Brittle Connections" by Kihak Lee and Douglas A. Foutch. — Kihak Lee and Douglas A. Foutch; 130(4), 692 (2004).

Lee, M. M. K.
Offshore Tubular T-Joints Reinforced with Internal Plain Annular Ring Stiffeners. — M. M. K. Lee and A. Llewelyn-Parry; 130(6), 942-51 (2004).

Lee, S. C.
Closure to "Analysis of Shear Lag Anomaly in Box Girders" by S.C. Lee, C.H. Yoo., and D.Y. Yoon. — S. C. Lee, C. H. Yoo, and D. Y. Yoon; 130(11), 1861-2 (2004).

Lehman, Dawn
Experimental Evaluation of the Seismic Performance of Reinforced Concrete Bridge Columns. — Dawn Lehman, Jack Moehle, Stephen Mahin, Anthony Calderone, and Lena Henry; 130(6), 869-79 (2004).

Leon, R. T.
Component Modeling of Partially Restrained Composite Joints under Cyclic and Dynamic Loading. — G. A. Rassati, R. T. Leon, and S. Noè; 130(2), 343-51 (2004).

Leon, Roberto T.
Bidirectional Tests on Partially Restrained, Composite Beam-to-Column Connections. — Travis P. Green, Roberto T. Leon, and Gian A. Rassati; 130(2), 320-7 (2004).
Steel Beam-Column Connections Using Shape Memory Alloys. — Justin Ocel, Reginald DesRoches, Roberto T. Leon, W. Gregory Hess, Robert Krumme, Jack R. Hayes, and Steve Sweeney; 130(5), 732-40 (2004).

Li, Yue
Fragility Assessment of Light-Frame Wood Construction Subjected to Wind and Earthquake Hazards. — Bruce R. Ellingwood, David V. Rosowsky, Yue Li, and Jun Hee Kim; 130(12), 1921-30 (2004).

Liang, Qing Quan
Local Buckling of Steel Plates in Double Skin Composite Panels under Biaxial Compression and Shear. — Qing Quan Liang, Brian Uy, Howard D. Wright, and Mark A. Bradford; 130(3), 443-51 (2004).

Liang, Xuemei
Seismic Behavior of Reinforced Concrete Column-Steel Beam Subassemblies and Frame Systems. — Xuemei Liang and Gustavo J. Parra-Montesinos; 130(2), 310-9 (2004).

Lie, Seng-Tjhen
Fatigue Performance of Cracked Tubular T Joints under Combined Loads. I: Experimental. — Sing-Ping Chiew, Seng-Tjhen Lie, Chi-King Lee, and Zhi-Wei Huang; 130(4), 562-71 (2004).
Fatigue Performance of Cracked Tubular T Joints under Combined Loads. II: Numerical. — Seng-Tjhen Lie, Sing-Ping Chiew, Chi-King Lee, and Zhi-Wei Huang; 130(4), 572-81 (2004).

Liew, J. Y. Richard
Explosion and Fire Analysis of Steel Frames Using Fiber Element Approach. — J. Y. Richard Liew and Hong Chen; 130(7), 991-1000 (2004).

Liew, Y. L.
Development of Test Method for Determining Plasterboard Bracing Performance. — Y. L. Liew, E. F. Gad, and C. F. Duffield; 130(7), 1108-16 (2004).

Lim, James B. P.
Finite Element Idealization of a Cold-Formed Steel Portal Frame. — James B. P. Lim and David A. Nethercot; 130(1), 78-94 (2004).

Lim, Linus
Computer Modeling of Restrained Reinforced Concrete Slabs in Fire Conditions. — Linus Lim, Andrew Buchanan, Peter Moss, and Jean-Marc Franssen; 130(12), 1964-71 (2004).

Lin, Xiao-Kang
Tests on Cyclic Behavior of Concrete-Filled Hollow Structural Steel Columns after Exposure to the ISO-834 Standard Fire. — Lin-Hai Han and Xiao-Kang Lin; 130(11), 1807-19 (2004).

Lin, Yu-Yuan
Seismic Response of Full-Scale Structure with Added Viscoelastic Dampers. — Kuo-Chun Chang and Yu-Yuan Lin; 130(4), 600-8 (2004).
Effects of Site Classes on Damping Reduction Factors. — Yu-Yuan Lin and Kuo-Chung Chang; 130(11), 1667-75 (2004).

Liu, Judy
Moment–Rotation Parameters for Composite Shear Tab Connections. — Judy Liu and Abolhassan Astaneh-Asl; 130(9), 1371-80 (2004).

Liu, Wei
Effects of Sustained Load on Concrete-Filled Hollow Structural Steel Columns. — Lin-Hai Han, Zhong Tao, and Wei Liu; 130(9), 1392-404 (2004).

Llewelyn-Parry, A.
Offshore Tubular T-Joints Reinforced with Internal Plain Annular Ring Stiffeners. — M. M. K. Lee and A. Llewelyn-Parry; 130(6), 942-51 (2004).

Lopes, S. M. R.
Neutral Axis Depth versus Flexural Ductility in High-Strength Concrete Beams. — L. F. A. Bernardo and S. M. R. Lopes; 130(3), 452-9 (2004).

López, Oscar A.
Adapting the CQC3 Rule for Three Seismic Components with Different Spectra. — Oscar A. López, Anil K. Chopra, and Julio J. Hernández; 130(3), 403-10 (2004).

López-Almansa, F.
Tension-Stiffening Model for Cracked Flexural Concrete Members. — Ll. Torres, F. López-Almansa, and L. M. Bozzo; 130(8), 1242-51 (2004).

Lourenço, Paulo B.
Characterization of Cyclic Behavior of Dry Masonry Joints. — Paulo B. Lourenço and Luís F. Ramos; 130(5), 779-86 (2004).

Lu, L. W.
Seismic Behavior of Composite Concrete Filled Steel Tube Column-Wide Flange Beam Moment Connections. — J. M. Ricles, S. W. Peng, and L. W. Lu; 130(2), 223-32 (2004).

Lu, Le-Wu
Seismic Behavior and Design of High-Strength Square Concrete-Filled Steel Tube Beam Columns. — Amit H. Varma, James M. Ricles, Richard Sause, and Le-Wu Lu; 130(2), 169-79 (2004).

Lu, Mu
Analysis of the Influence of Tensile Strength on the Stability of Eccentrically Compressed Slender Unreinforced Masonry Walls Under Lateral Loads. — Mu Lu, Arturo E. Schultz, and Henryk K. Stolarski; 130(6), 921-33 (2004).

Lukkunaprasit, Panitan
Load History Effect on Cyclic Behavior of Reinforced Concrete Tied Columns. — Panitan Lukkunaprasit and Jatupon Thepmangkorn; 130(10), 1629-33 (T) (2004).

Ma, K. Y.
Nonlinear Plastic Hinge Analysis of Three-Dimensional Steel Frames in Fire. — K. Y. Ma and J. Y. Richard Liew; 130(7), 981-90 (2004).

Macorini, L.
Finite-Element Model for Collapse and Long-Term Analysis of Steel–Concrete Composite Beams. — M. Fragiacomo, C. Amadio, and L. Macorini; 130(3), 489-97 (2004).

MacRae, Gregory
Brace-Beam-Column Connections for Concentrically Braced Frames with Concrete Filled Tube Columns. — Gregory MacRae, Charles W. Roeder, Chad Gunderson, and Yoshihiro Kimura; 130(2), 233-43 (2004).
Effect of Beam Growth on Reinforced Concrete Frames. — Jubum Kim, John Stanton, and Gregory MacRae; 130(9), 1333-42 (2004).

MacRae, Gregory A.
Effect of Column Stiffness on Braced Frame Seismic Behavior. — Gregory A. MacRae, Yoshihiro Kimura, and Charles Roeder; 130(3), 381-91 (2004).

Maekawa, Koichi
Pre- and Postyield Finite Element Method Simulation of Bond of Ribbed Reinforcing Bars. — Hamed M. Salem and Koichi Maekawa; 130(4), 671-80 (2004).

Mahin, Stephen
Experimental Evaluation of the Seismic Performance of Reinforced Concrete Bridge Columns. — Dawn Lehman, Jack Moehle, Stephen Mahin, Anthony Calderone, and Lena Henry; 130(6), 869-79 (2004).

Maison, Bruce F.
Discussion of "Seismic Performance Evaluation of Pre-Northridge Steel Frame Buildings with Brittle Connections" by Kihak Lee and Douglas A. Foutch. — Bruce F. Maison and David Bonowitz; 130(4), 690-1 (2004).

Makris, Nicos
Seismic Response Analysis of a Highway Overcrossing Equipped with Elastomeric Bearings and Fluid Dampers. — Nicos Makris and Jian Zhang; 130(6), 830-45 (2004).
Structural Characterization of Modern Highway Overcrossings—Case Study. — Jian Zhang, Nicos Makris, and Tim Delis; 130(6), 846-60 (2004).
Component Testing, Seismic Evaluation and Characterization of Buckling-Restrained Braces. — Cameron J. Black, Nicos Makris, and Ian D. Aiken; 130(6), 880-94 (2004).

Malerba, Pier Giorgio
Cellular Automata Approach to Durability Analysis of Concrete Structures in Aggressive Environments. — Fabio Biondini, Franco Bontempi, Dan M. Frangopol, and Pier Giorgio Malerba; 130(11), 1724-37 (2004).

Mander, John B.
Rocking Wall–Frame Structures with Supplemental Tendon Systems. — Jack J. Ajrab, Gokhan Pekcan, and John B. Mander; 130(6), 895-903 (2004).
Behavior of Timber Pile-to-Cap Connections under Cyclic Lateral Loading. — Ayman. A. Shama and John B. Mander; 130(8), 1252-62 (2004).

Martinovic, Frank
Assessment of Steel and Fiber Reinforced Plastic Jackets for Seismic Retrofit of Reinforced Concrete Columns with Structural Flares. — M. Saiid Saiidi, Frank Martinovic, Brett McElhaney, David Sanders, and Faramarz Gordaninejad; 130(4), 609-17 (2004).

Maru, Savita
Simplified Procedure for Creep and Shrinkage Effects in Reinforced Concrete Frames. — Ravi Kumar Sharma, Savita Maru, and A. K. Nagpal; 130(10), 1545-52 (2004).

Masia, Mark J.
Modeling Soil/Structure Interaction for Masonry Structures. — Mark J. Masia, Peter W. Kleeman, and Robert E. Melchers; 130(4), 641-9 (2004).

Matsumoto, M.
Durability of Galvanized Light-Gauge Steel Shapes. — Y. Sakumoto, H. Nomura, M. Matsumoto, A. Ninomiya, T. Miyao, and Y. Sakamoto; 130(1), 70-7 (2004).

Maurin, Bernard
Concrete Shells Form-Finding with Surface Stress Density Method. — Bernard Maurin and René Motro; 130(6), 961-8 (2004).

McCormick, Jason
Cyclic Properties of Superelastic Shape Memory Alloy Wires and Bars. — Reginald DesRoches, Jason McCormick, and Michael Delemont; 130(1), 38-46 (2004).

McElhaney, Brett
Assessment of Steel and Fiber Reinforced Plastic Jackets for Seismic Retrofit of Reinforced Concrete Columns with Structural Flares. — M. Saiid Saiidi, Frank Martinovic, Brett McElhaney, David Sanders, and Faramarz Gordaninejad; 130(4), 609-17 (2004).

Melchers, Robert E.
Modeling Soil/Structure Interaction for Masonry Structures. — Mark J. Masia, Peter W. Kleeman, and Robert E. Melchers; 130(4), 641-9 (2004).

Melhem, Hani
Simplified Nonlinear Analysis of Strengthened Concrete Beams Based on a Rigorous Approach. — Hayder A. Rasheed, Hasan Charkas, and Hani Melhem; 130(7), 1087-96 (2004).

Miguel, P. F.
Analytical Approach to Failure Surfaces in Reinforced Concrete Sections Subjected to Axial Loads and Biaxial Bending. — J. L. Bonet, P. F. Miguel, M. A. Fernandez, and M. L. Romero; 130(12), 2006-15 (2004).

Miller, Thomas H.
Effects of Reference Displacement and Damage Accumulation in Wood Shear Walls. — Jeffrey D. Langlois, Rakesh Gupta, and Thomas H. Miller; 130(3), 470-9 (2004).

Mills, Julie
Self-Drilling Screw Joints for Cold-Formed Channel Portal Frames. — Julie Mills and Roger LaBoube; 130(11), 1799-806 (2004).

Miranda, Eduardo
Inelastic Displacement Ratios for Design of Structures on Soft Soils Sites. — Jorge Ruiz-García and Eduardo Miranda; 130(12), 2051-61 (2004).

Mitchell, Denis
Structural Steel Boundary Elements for Ductile Concrete Walls. — Soon Ho Cho, Bryce Tupper, William D. Cook, and Denis Mitchell; 130(5), 762-8 (2004).
Repeated Loading Tests of Concrete Walls Containing Headed Shear Reinforcement. — Young Hoon Kim, Young Soo Yoon, William D. Cook, and Denis Mitchell; 130(8), 1233-41 (2004).

Miyamoto, Ayaho
Application of the Improved Immune Algorithm to Structural Design Support System. — Ayaho Miyamoto, Hideaki Nakamura, and Leopold Kruszka; 130(1), 108-19 (2004).

Miyao, T.
Durability of Galvanized Light-Gauge Steel Shapes. — Y. Sakumoto, H. Nomura, M. Matsumoto, A. Ninomiya, T. Miyao, and Y. Sakamoto; 130(1), 70-7 (2004).

Moehle, Jack
Experimental Evaluation of the Seismic Performance of Reinforced Concrete Bridge Columns. — Dawn Lehman, Jack Moehle, Stephen Mahin, Anthony Calderone, and Lena Henry; 130(6), 869-79 (2004).

Moehle, Jack P.
Shear Strength Model for Lightly Reinforced Concrete Columns. — Halil Sezen and Jack P. Moehle; 130(11), 1692-703 (2004).

Moghaddam, H. A.
Lateral Load Behavior of Masonry Infilled Steel Frames with Repair and Retrofit. — H. A. Moghaddam; 130(1), 56-63 (2004).

Mohareb, Magdi
Plastic Interaction Relationships for Square Hollow Structural Sections: Lower Bound Solution. — Magdi Mohareb and Istemi F. Ozkan; 130(9), 1381-91 (2004).
Closure to "Exact Finite Element for Nonuniform Torsion of Open Sections" by Magdi Mohareb and Farhood Nowzartash. — Magdi Mohareb and Farhood Nowzartash; 130(9), 1420-1 (2004).

Mollaioli, Fabrizio
Role of Damage Functions in Evaluation of Response Modification Factors. — Luis D. Decanini, Silvia Bruno, and Fabrizio Mollaioli; 130(9), 1298-308 (2004).

Mori, Koji
Behavior of Concrete-Filled Steel Tube Beam Columns. — Eiichi Inai, Akiyoshi Mukai, Makoto Kai, Hiroyoshi Tokinoya, Toshiyuki Fukumoto, and Koji Mori; 130(2), 189-202 (2004).

Morino, Shosuke
Behavior of Centrally Loaded Concrete-Filled Steel-Tube Short Columns. — Kenji Sakino, Hiroyuki Nakahara, Shosuke Morino, and Isao Nishiyama; 130(2), 180-8 (2004).

Mosqueda, Gilberto
Characterization and Modeling of Friction Pendulum Bearings Subjected to Multiple Components of Excitation. — Gilberto Mosqueda, Andrew S. Whittaker, and Gregory L. Fenves; 130(3), 433-42 (2004).

Moss, Peter
Computer Modeling of Restrained Reinforced Concrete Slabs in Fire Conditions. — Linus Lim, Andrew Buchanan, Peter Moss, and Jean-Marc Franssen; 130(12), 1964-71 (2004).

Motro, René
Concrete Shells Form-Finding with Surface Stress Density Method. — Bernard Maurin and René Motro; 130(6), 961-8 (2004).

Moulton, J. Dan'l
Parametric Study of Coupled Wall Behavior—Implications for the Design of Coupling Beams. — Kent A. Harries, J. Dan'l Moulton, and Robert L. Clemson; 130(3), 480-8 (2004).

Mukai, Akiyoshi
Behavior of Concrete-Filled Steel Tube Beam Columns. — Eiichi Inai, Akiyoshi Mukai, Makoto Kai, Hiroyoshi Tokinoya, Toshiyuki Fukumoto, and Koji Mori; 130(2), 189-202 (2004).
Behavior of Eccentrically Loaded Concrete-Filled Steel Tubular Columns. — Toshiaki Fujimoto, Akiyoshi Mukai, Isao Nishiyama, and Kenji Sakino; 130(2), 203-12 (2004).

Murnal, Pranesh
Behavior of Torsionally Coupled Structures with Variable Frequency Pendulum Isolator. — Pranesh Murnal and Ravi Sinha; 130(7), 1041-54 (2004).

Murphy, Thomas P.
Retrofitting Suspension Bridges Using Distributed Dampers. — Thomas P. Murphy and Kevin R. Collins; 130(10), 1466-74 (2004).

Murty, C. V. R.
Improved Truss Model for Design of Welded Steel Moment-Resisting Frame Connections. — Jaswant N. Arlekar and C. V. R. Murty; 130(3), 498-510 (2004).

Muscolino, G.
Combination of Modal Responses Consistent with Seismic Input Representation. — P. Cacciola, P. Colajanni, and G. Muscolino; 130(1), 47-55 (2004).

Nagpal, A. K.
Simplified Procedure for Creep and Shrinkage Effects in Reinforced Concrete Frames. — Ravi Kumar Sharma, Savita Maru, and A. K. Nagpal; 130(10), 1545-52 (2004).

Nakahara, Hiroyuki
Behavior of Centrally Loaded Concrete-Filled Steel-Tube Short Columns. — Kenji Sakino, Hiroyuki Nakahara, Shosuke Morino, and Isao Nishiyama; 130(2), 180-8 (2004).

Nakamura, Hideaki
Application of the Improved Immune Algorithm to Structural Design Support System. — Ayaho Miyamoto, Hideaki Nakamura, and Leopold Kruszka; 130(1), 108-19 (2004).

Nakamura, Shun-ichi
Model for Lateral Excitation of Footbridges by Synchronous Walking. — Shun-ichi Nakamura; 130(1), 32-7 (2004).

Nalinaa, K.
Discussion of "Neural Network Modeling of Confined Compressive Strength and Strain of Circular Concrete Columns" by Andres W. C. Oreta and Kuzuhiko Kawashima. — Sundaramoorthy Rajasekaran and K. Nalinaa; 130(10), 1634-5 (2004).

Natterer, Julius
Investigation of Notched Composite Wood–Concrete Connections. — Richard M. Gutkowski, Kevin Brown, Abdalla Shigidi, and Julius Natterer; 130(10), 1553-61 (2004).

Nethercot, D. A.
Numerical Modeling of Stainless Steel Structural Components—A Consistent Approach. — L. Gardner and D. A. Nethercot; 130(10), 1586-601 (2004).

Nethercot, David A.
Finite Element Idealization of a Cold-Formed Steel Portal Frame. — James B. P. Lim and David A. Nethercot; 130(1), 78-94 (2004).

Nie, Jianguo
Experimental Studies on Shear Strength of Steel–Concrete Composite Beams. — Jianguo Nie, Yan Xiao, and Lin Chen; 130(8), 1206-13 (2004).
Stiffness and Deflection of Steel–Concrete Composite Beams under Negative Bending. — Jianguo Nie, Jiansheng Fan, and C. S. Cai; 130(11), 1842-51 (2004).

Ninomiya, A.
Durability of Galvanized Light-Gauge Steel Shapes. — Y. Sakumoto, H. Nomura, M. Matsumoto, A. Ninomiya, T. Miyao, and Y. Sakamoto; 130(1), 70-7 (2004).

Nishiyama, Isao
Behavior of Centrally Loaded Concrete-Filled Steel-Tube Short Columns. — Kenji Sakino, Hiroyuki Nakahara, Shosuke Morino, and Isao Nishiyama; 130(2), 180-8 (2004).
Behavior of Eccentrically Loaded Concrete-Filled Steel Tubular Columns. — Toshiaki Fujimoto, Akiyoshi Mukai, Isao Nishiyama, and Kenji Sakino; 130(2), 203-12 (2004).
Inelastic Force-Deformation Response of Joint Shear Panels in Beam-Column Moment Connections to Concrete-Filled Tubes. — Isao Nishiyama, Toshiaki Fujimoto, Toshiyuki Fukumoto, and Kenzo Yoshioka; 130(2), 244-52 (2004).
Guidelines: Seismic Design of Composite Reinforced Concrete and Steel Buildings. — Isao Nishiyama, Hiroshi Kuramoto, and Hiroshi Noguchi; 130(2), 336-42 (2004).
Seismic Performance and Stress Transferring Mechanism of Through-Column-Type Joints for Composite Reinforced Concrete and Steel Frames. — Hiroshi Kuramoto and Isao Nishiyama; 130(2), 352-60 (2004).

Noè, S.
Component Modeling of Partially Restrained Composite Joints under Cyclic and Dynamic Loading. — G. A. Rassati, R. T. Leon, and S. Noè; 130(2), 343-51 (2004).

Noguchi, Hiroshi
Finite Element Method Analysis of Hybrid Structural Frames with Reinforced Concrete Columns and Steel Beams. — Hiroshi Noguchi and Kazuhiro Uchida; 130(2), 328-35 (2004).
Guidelines: Seismic Design of Composite Reinforced Concrete and Steel Buildings. — Isao Nishiyama, Hiroshi Kuramoto, and Hiroshi Noguchi; 130(2), 336-42 (2004).
Overview of U.S.–Japan Research on the Seismic Design of Composite Reinforced Concrete and Steel Moment Frame Structures. — Gregory G. Deierlein and Hiroshi Noguchi; 130(2), 361-7 (2004).

Nomura, H.
Durability of Galvanized Light-Gauge Steel Shapes. — Y. Sakumoto, H. Nomura, M. Matsumoto, A. Ninomiya, T. Miyao, and Y. Sakamoto; 130(1), 70-7 (2004).

Nowzartash, Farhood
Closure to "Exact Finite Element for Nonuniform Torsion of Open Sections" by Magdi Mohareb and Farhood Nowzartash. — Magdi Mohareb and Farhood Nowzartash; 130(9), 1420-1 (2004).

Ocel, Justin
Steel Beam-Column Connections Using Shape Memory Alloys. — Justin Ocel, Reginald DesRoches, Roberto T. Leon, W. Gregory Hess, Robert Krumme, Jack R. Hayes, and Steve Sweeney; 130(5), 732-40 (2004).

Ojdrovic, Rasko P.
Thrust Restraint Design of Concrete Pressure Pipe. — Mehdi S. Zarghamee, Daniel W. Eggers, Rasko P. Ojdrovic, and Daniel P. Valentine; 130(1), 95-107 (2004).

Oliver, Javier
Modeling Material Failure in Concrete Structures under Cyclic Actions. — Rui Faria, Javier Oliver, and Miguel Cervera; 130(12), 1997-2005 (2004).

Oreta, Andres W. C.
Closure to "Neural Network Modeling of Confined Compressive Strength and Strain of Circular Concrete Columns" by Andres W. C. Oreta and Kazuhiko Kawashima. — Andres W. C. Oreta; 130(10), 1635 (2004).

Ozkan, Istemi F.
Plastic Interaction Relationships for Square Hollow Structural Sections: Lower Bound Solution. — Magdi Mohareb and Istemi F. Ozkan; 130(9), 1381-91 (2004).

Paevere, P.
Design Models of Light Frame Wood Buildings under Lateral Loads. — B. Kasal, M. S. Collins, P. Paevere, and G. C. Foliente; 130(8), 1263-71 (2004).

Paquette, Jocelyn
Seismic Testing of Repaired Unreinforced Masonry Building having Flexible Diaphragm. — Jocelyn Paquette, Michel Bruneau, and Svetlana Brzev; 130(10), 1487-96 (2004).

Parra-Montesinos, Gustavo J.
Seismic Behavior of Reinforced Concrete Column-Steel Beam Subassemblies and Frame Systems. — Xuemei Liang and Gustavo J. Parra-Montesinos; 130(2), 310-9 (2004).

Parsons, William R.
Energy-based Design of Dowel Connections in Wood-Plastic Composites Hollow Sections. — William R. Parsons and Donald A. Bender; 130(4), 681-9 (2004).

Pekcan, Gokhan
Rocking Wall–Frame Structures with Supplemental Tendon Systems. — Jack J. Ajrab, Gokhan Pekcan, and John B. Mander; 130(6), 895-903 (2004).

Peng, S. W.
Seismic Behavior of Composite Concrete Filled Steel Tube Column-Wide Flange Beam Moment Connections. — J. M. Ricles, S. W. Peng, and L. W. Lu; 130(2), 223-32 (2004).

Perera, Ricardo
Experimental and Analytical Study of Masonry Infill Reinforced Concrete Frames Retrofitted with Steel Braces. — Ricardo Perera, Susana Gómez, and Enrique Alarcón; 130(12), 2032-9 (2004).

Pinelli, Jean-Paul
Hurricane Damage Prediction Model for Residential Structures. — Jean-Paul Pinelli, Emil Simiu, Kurt Gurley, Chelakara Subramanian, Liang Zhang, Anne Cope, James J. Filliben, and Shahid Hamid; 130(11), 1685-91 (2004).

Pircher, M.
Medium-Length Thin-Walled Cylinder under Wind Loading—Case Study. — M. Pircher; 130(12), 2062-9 (2004).

Pote, Joseph J.
Strength and Design of Open Web Steel Joists with Crimped-End Web Members. — Joseph Robert Yost, David W. Dinehart, Shawn P. Gross, Joseph J. Pote, and Brian Gargan; 130(5), 715-24 (2004).

Qian, Jiaru
Discussion of "Mechanical Behavior of Circular Steel—Concrete Composite Stub Columns" by Mathias Johansson and Kent Gylltoft. — Dongliang Zhou and Jiaru Qian; 130(1), 152-3 (2004).

Qie, Frank S.
Concrete-Filled Steel Tubes Subjected to Axial Compression and Lateral Cyclic Loads. — Amir Fam, Frank S. Qie, and Sami Rizkalla; 130(4), 631-40 (2004).

Qing Li, Chun
Reliability Based Service Life Prediction of Corrosion Affected Concrete Structures. — Chun Qing Li; 130(10), 1570-7 (2004).

Rackwitz, Rüdiger
Socioeconomic Implications of Life Quality Index in Design of Optimum Structures to Withstand Earthquakes. — Mauricio Sánchez-Silva and Rüdiger Rackwitz; 130(6), 969-77 (2004).

Rajasekaran, Sundaramoorthy
Discussion of "Neural Network Modeling of Confined Compressive Strength and Strain of Circular Concrete Columns" by Andres W. C. Oreta and Kuzuhiko Kawashima. — Sundaramoorthy Rajasekaran and K. Nalinaa; 130(10), 1634-5 (2004).

Ramos, Luís F.
Characterization of Cyclic Behavior of Dry Masonry Joints. — Paulo B. Lourenço and Luís F. Ramos; 130(5), 779-86 (2004).

Rasheed, Hayder A.
Simplified Nonlinear Analysis of Strengthened Concrete Beams Based on a Rigorous Approach. — Hayder A. Rasheed, Hasan Charkas, and Hani Melhem; 130(7), 1087-96 (2004).

Rasmussen, K. J. R.
Tests of Unstiffened Plate Elements Under Combined Compression and Bending. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1602-10 (2004).
Effective Widths of Unstiffened Elements with Stress Gradient. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1611-9 (2004).
Design Provisions for Sections Containing Unstiffened Elements with Stress Gradient. — M. R. Bambach and K. J. R. Rasmussen; 130(10), 1620-8 (2004).

Rasmussen, Kim J. R.
Design of Stiffened Elements in Cold-Formed Stainless Steel Sections. — Kim J. R. Rasmussen, Tim Burns, and Paul Bezkorovainy; 130(11), 1764-71 (2004).
Compression Tests of Cold-Reduced High Strength Steel Sections. II: Long Columns. — Demao Yang, Gregory J. Hancock, and Kim J. R. Rasmussen; 130(11), 1782-9 (2004).

Rassati, G. A.
Component Modeling of Partially Restrained Composite Joints under Cyclic and Dynamic Loading. — G. A. Rassati, R. T. Leon, and S. Noè; 130(2), 343-51 (2004).

Rassati, Gian A.
Bidirectional Tests on Partially Restrained, Composite Beam-to-Column Connections. — Travis P. Green, Roberto T. Leon, and Gian A. Rassati; 130(2), 320-7 (2004).

Ren, Wei-Xin
Experimental and Analytical Modal Analysis of Steel Arch Bridge. — Wei-Xin Ren, Tong Zhao, and Issam E. Harik; 130(7), 1022-31 (2004).

Repetto, Maria Pia
Directional Wind-Induced Fatigue of Slender Vertical Structures. — Maria Pia Repetto and Giovanni Solari; 130(7), 1032-40 (2004).

Rey, L. E.
Long-Term Effects on Response of Reinforced Concrete Columns to Cyclic Loading. — A. E. Schultz, S. S. Welton, and L. E. Rey; 130(9), 1320-32 (2004).

Richard Liew, J. Y.
Nonlinear Plastic Hinge Analysis of Three-Dimensional Steel Frames in Fire. — K. Y. Ma and J. Y. Richard Liew; 130(7), 981-90 (2004).

Ricles, J. M.
Seismic Behavior of Composite Concrete Filled Steel Tube Column-Wide Flange Beam Moment Connections. — J. M. Ricles, S. W. Peng, and L. W. Lu; 130(2), 223-32 (2004).

Ricles, James M.
Seismic Behavior and Design of High-Strength Square Concrete-Filled Steel Tube Beam Columns. — Amit H. Varma, James M. Ricles, Richard Sause, and Le-Wu Lu; 130(2), 169-79 (2004).

Rizkalla, Sami
Concrete-Filled Steel Tubes Subjected to Axial Compression and Lateral Cyclic Loads. — Amir Fam, Frank S. Qie, and Sami Rizkalla; 130(4), 631-40 (2004).

Roberts-Wollmann, Carin L.
Strength and Performance of Fiber-Reinforced Concrete Composite Slabs. — Carin L. Roberts-Wollmann, Marcela Guirola, and W. Samuel Easterling; 130(3), 520-8 (2004).

Roeder, Charles
Effect of Column Stiffness on Braced Frame Seismic Behavior. — Gregory A. MacRae, Yoshihiro Kimura, and Charles Roeder; 130(3), 381-91 (2004).

Roeder, Charles W.
Brace-Beam-Column Connections for Concentrically Braced Frames with Concrete Filled Tube Columns. — Gregory MacRae, Charles W. Roeder, Chad Gunderson, and Yoshihiro Kimura; 130(2), 233-43 (2004).

Romero, M. L.
Analytical Approach to Failure Surfaces in Reinforced Concrete Sections Subjected to Axial Loads and Biaxial Bending. — J. L. Bonet, P. F. Miguel, M. A. Fernandez, and M. L. Romero; 130(12), 2006-15 (2004).

Rosenboom, Owen A.
Reversed In-Plane Cyclic Behavior of Posttensioned Clay Brick Masonry Walls. — Owen A. Rosenboom and Mervyn J. Kowalsky; 130(5), 787-98 (2004).

Rosowsky, David V.
Partial Factor Approach to Repetitive-Member System Factors. — David V. Rosowsky and Guangren Yu; 130(11), 1829-41 (2004).
Fragility Assessment of Light-Frame Wood Construction Subjected to Wind and Earthquake Hazards. — Bruce R. Ellingwood, David V. Rosowsky, Yue Li, and Jun Hee Kim; 130(12), 1921-30 (2004).

Rovňák, M.
Discussion of "Analysis of Shear Lag Anomaly in Box Girders" by S. C. Lee, C. H. Yoo, and D. Y. Yoon. — M. Rovňák and A. Ďuricová; 130(11), 1860-1 (2004).

Ruiz-García, Jorge
Inelastic Displacement Ratios for Design of Structures on Soft Soils Sites. — Jorge Ruiz-García and Eduardo Miranda; 130(12), 2051-61 (2004).

Rustogi, Sudhir
Modeling the Dynamic Behavior of Electrical Cabinets and Control Panels: Experimental and Analytical Results. — Sudhir Rustogi and Abhinav Gupta; 130(3), 511-9 (2004).

Ryan, Keri L.
Estimation of Seismic Demands on Isolators Based on Nonlinear Analysis. — Keri L. Ryan and Anil K. Chopra; 130(3), 392-402 (2004).

Saadé, Katy
Discussion of "Exact Finite Element for Nonuniform Torsion of Open Sections" by Magdi Mohareb and Farhood Nowzartash. — Katy Saadé, Bernard Espion, and Guy Warzée; 130(9), 1420 (2004).

Saiid Saiidi, M.
Assessment of Steel and Fiber Reinforced Plastic Jackets for Seismic Retrofit of Reinforced Concrete Columns with Structural Flares. — M. Saiid Saiidi, Frank Martinovic, Brett McElhaney, David Sanders, and Faramarz Gordaninejad; 130(4), 609-17 (2004).

Sakamoto, Y.
Durability of Galvanized Light-Gauge Steel Shapes. — Y. Sakumoto, H. Nomura, M. Matsumoto, A. Ninomiya, T. Miyao, and Y. Sakamoto; 130(1), 70-7 (2004).

Sakino, Kenji
Behavior of Centrally Loaded Concrete-Filled Steel-Tube Short Columns. — Kenji Sakino, Hiroyuki Nakahara, Shosuke Morino, and Isao Nishiyama; 130(2), 180-8 (2004).
Behavior of Eccentrically Loaded Concrete-Filled Steel Tubular Columns. — Toshiaki Fujimoto, Akiyoshi Mukai, Isao Nishiyama, and Kenji Sakino; 130(2), 203-12 (2004).

Sakumoto, Y.
Durability of Galvanized Light-Gauge Steel Shapes. — Y. Sakumoto, H. Nomura, M. Matsumoto, A. Ninomiya, T. Miyao, and Y. Sakamoto; 130(1), 70-7 (2004).

Salem, A. H.
Elastic Stability of Planar Steel Frames with Unsymmetrical Beam Loading. — A. H. Salem, F. F. El Dib, M. El Aghoury, and M. T. Hanna; 130(11), 1852-9 (2004).

Salem, Hamed M.
Pre- and Postyield Finite Element Method Simulation of Bond of Ribbed Reinforcing Bars. — Hamed M. Salem and Koichi Maekawa; 130(4), 671-80 (2004).

Sánchez-Silva, Mauricio
Socioeconomic Implications of Life Quality Index in Design of Optimum Structures to Withstand Earthquakes. — Mauricio Sánchez-Silva and Rüdiger Rackwitz; 130(6), 969-77 (2004).

Sanders, David
Assessment of Steel and Fiber Reinforced Plastic Jackets for Seismic Retrofit of Reinforced Concrete Columns with Structural Flares. — M. Saiid Saiidi, Frank Martinovic, Brett McElhaney, David Sanders, and Faramarz Gordaninejad; 130(4), 609-17 (2004).

Sato, Yuichi
Closure to "Local Stresses and Crack Displacements in Reinforced Concrete Elements" by Yuichi Sato and Shigeru Fujii. — Yuichi Sato and Sigeru Fujii; 130(5), 827 (2004).

Sause, Richard
Seismic Behavior and Design of High-Strength Square Concrete-Filled Steel Tube Beam Columns. — Amit H. Varma, James M. Ricles, Richard Sause, and Le-Wu Lu; 130(2), 169-79 (2004).

Schneider, Stephen P.
Moment Connections to Circular Concrete-Filled Steel Tube Columns. — Atorod Azizinamini and Stephen P. Schneider; 130(2), 213-22 (2004).

Schultz, A. E.
Long-Term Effects on Response of Reinforced Concrete Columns to Cyclic Loading. — A. E. Schultz, S. S. Welton, and L. E. Rey; 130(9), 1320-32 (2004).

Schultz, Arturo E.
Analysis of the Influence of Tensile Strength on the Stability of Eccentrically Compressed Slender Unreinforced Masonry Walls Under Lateral Loads. — Mu Lu, Arturo E. Schultz, and Henryk K. Stolarski; 130(6), 921-33 (2004).

Scollard, Christopher R.
Impact of New ACI 318 Flexural Resistance Factor on Bond Failures. — Christopher R. Scollard and F. Michael Bartlett; 130(1), 138-46 (2004).

Scott, Michael H.
Response Sensitivity for Nonlinear Beam–Column Elements. — Michael H. Scott, Paolo Franchin, Gregory L. Fenves, and Filip C. Filippou; 130(9), 1281-8 (2004).

Sebastian, Wendel M.
Collapse Considerations and Electrical Analogies for Statically Indeterminate Structures. — Wendel M. Sebastian; 130(10), 1445-53 (2004).

Şener, Sıddık
Size Effect in Axially Loaded Reinforced Concrete Columns. — Sıddık Şener, Ben I. G. Barr, and Hadi F. Abusiaf ; 130(4), 662-70 (2004).

Sennah, Khaled
Compressive Strength of Solid Round Steel Bars. — Khaled Sennah and John Wahba; 130(1), 147-51 (2004).

Sezen, Halil
Shear Strength Model for Lightly Reinforced Concrete Columns. — Halil Sezen and Jack P. Moehle; 130(11), 1692-703 (2004).

Shahrooz, Bahram M.
Outrigger Beam–Wall Connections. I: Component Testing and Development of Design Model. — Bahram M. Shahrooz, Jeremy T. Deason, and Gokhan Tunc; 130(2), 253-61 (2004).
Outrigger Beam–Wall Connections. II: Subassembly Testing and Further Modeling Enhancements. — Bahram M. Shahrooz, Gokhan Tunc, and Jeremy T. Deason; 130(2), 262-70 (2004).

Shama, Ayman. A.
Behavior of Timber Pile-to-Cap Connections under Cyclic Latcral Loading. — Ayman. A. Shama and John B. Mander; 130(8), 1252-62 (2004).

Sharma, Ravi Kumar
Simplified Procedure for Creep and Shrinkage Effects in Reinforced Concrete Frames. — Ravi Kumar Sharma, Savita Maru, and A. K. Nagpal; 130(10), 1545-52 (2004).

Shea, Kristina
Active Tensegrity Structure. — Etienne Fest, Kristina Shea, and Ian F. C. Smith; 130(10), 1454-65 (2004).

Shen, Jerry
Performance of a Seismically Isolated Bridge under Near-Fault Earthquake Ground Motions. — Jerry Shen, Meng-Hao Tsai, Kuo-Chun Chang, and George C. Lee; 130(6), 861-8 (2004).

Shen, Qiang
Posttensioned Hybrid Coupled Walls under Lateral Loads. — Yahya C. Kurama and Qiang Shen; 130(2), 297-309 (2004).

Shi, Xudong
Influence of Concrete Cover on Fire Resistance of Reinforced Concrete Flexural Members. — Xudong Shi, Teng-Hooi Tan, Kang-Hai Tan, and Zhenhai Guo; 130(8), 1225-32 (2004).

Shi, Zihai
Numerical Analysis of Mixed-Mode Fracture in Concrete Using Extended Fictitious Crack Model. — Zihai Shi; 130(11), 1738-47 (2004).

Shigidi, Abdalla
Investigation of Notched Composite Wood–Concrete Connections. — Richard M. Gutkowski, Kevin Brown, Abdalla Shigidi, and Julius Natterer; 130(10), 1553-61 (2004).

Shim, W.
Experimental and Analytical Reexamination of Classic Concrete Beam Tests. — F. J. Vecchio and W. Shim; 130(3), 460-9 (2004).

Simiu, Emil
Hurricane Damage Prediction Model for Residential Structures. — Jean-Paul Pinelli, Emil Simiu, Kurt Gurley, Chelakara Subramanian, Liang Zhang, Anne Cope, James J. Filliben, and Shahid Hamid; 130(11), 1685-91 (2004).

Sinha, Ravi
Behavior of Torsionally Coupled Structures with Variable Frequency Pendulum Isolator. — Pranesh Murnal and Ravi Sinha; 130(7), 1041-54 (2004).

Smith, Ian F. C.
Active Tensegrity Structure. — Etienne Fest, Kristina Shea, and Ian F. C. Smith; 130(10), 1454-65 (2004).

Solanki, Himat
Discussion of "Strength Prediction for Discontinuity Regions by Softened Strut-and-Tie Model" by Shyh-Jiann Hwang and Hung-Jen Lee. — Himat Solanki; 130(3), 529-30 (2004).
Discussion of "Local Stresses and Crack Displacements in Reinforced Concrete Elements" by Yuichi Sato and Shigeru Fujii. — Himat Solanki; 130(5), 827 (2004).

Solari, Giovanni
Directional Wind-Induced Fatigue of Slender Vertical Structures. — Maria Pia Repetto and Giovanni Solari; 130(7), 1032-40 (2004).

Sotelino, Elisa D.
Modified Iterative Group-Implicit Algorithm for the Dynamic Analysis of Structures. — Yunus Dere and Elisa D. Sotelino; 130(10), 1436-44 (2004).

Spacone, Enrico
Nonlinear Analysis of Steel-Concrete Composite Structures: State of the Art. — Enrico Spacone and Sherif El-Tawil; 130(2), 159-68 (2004).

Stahl, Douglas C.
Improved Analysis of Timber Rivet Connections. — Douglas C. Stahl, Ronald W. Wolfe, and Marshall Begel; 130(8), 1272-9 (2004).

Stanton, John
Effect of Beam Growth on Reinforced Concrete Frames. — Jubum Kim, John Stanton, and Gregory MacRae; 130(9), 1333-42 (2004).

Stearns, Christopher
Seismic Response of Electrical Substation Equipment Interconnected by Flexible Conductors. — André Filiatrault and Christopher Stearns; 130(5), 769-78 (2004).

Stewart, Mark G.
Bridge Deck Replacement for Minimum Expected Cost Under Multiple Reliability Constraints. — Mark G. Stewart, Allen C. Estes, and Dan M. Frangopol; 130(9), 1414-9 (2004).

Stolarski, Henryk K.
Analysis of the Influence of Tensile Strength on the Stability of Eccentrically Compressed Slender Unreinforced Masonry Walls Under Lateral Loads. — Mu Lu, Arturo E. Schultz, and Henryk K. Stolarski; 130(6), 921-33 (2004).

Subramanian, Chelakara
Hurricane Damage Prediction Model for Residential Structures. — Jean-Paul Pinelli, Emil Simiu, Kurt Gurley, Chelakara Subramanian, Liang Zhang, Anne Cope, James J. Filliben, and Shahid Hamid; 130(11), 1685-91 (2004).

Sucuoğlu, Haluk
Performance-Based Seismic Rehabilitation of Damaged Reinforced Concrete Buildings. — Haluk Sucuoğlu, Türel Gür, and M. Selim Günay; 130(10), 1475-86 (2004).

Sujeewa, Lewangamage Chamindalal
Measurement Method for Continua by Image Processing. — Junji Yoshida, Masato Abe, Yozo Fujino, and Lewangamage Chamindalal Sujeewa; 130(8), 1145-56 (2004).

Sun, Z.
Statistical Wavelet-Based Method for Structural Health Monitoring. — Z. Sun and C. C. Chang; 130(7), 1055-62 (2004).

Surovek-Maleck, Andrea E.
Alternative Approaches for Elastic Analysis and Design of Steel Frames. I: Overview. — Andrea E. Surovek-Maleck and Donald W. White; 130(8), 1186-96 (2004).
Alternative Approaches for Elastic Analysis and Design of Steel Frames. II: Verification Studies. — Andrea E. Surovek-Maleck and Donald W. White; 130(8), 1197-205 (2004).

Sweeney, Steve
Steel Beam-Column Connections Using Shape Memory Alloys. — Justin Ocel, Reginald DesRoches, Roberto T. Leon, W. Gregory Hess, Robert Krumme, Jack R. Hayes, and Steve Sweeney; 130(5), 732-40 (2004).

Takagi, Naoto
Similitude Law of Prefracture Hysteresis of Steel Members. — Hitoshi Kuwamura and Naoto Takagi; 130(5), 752-61 (2004).

Takewaki, Izuru
Bound of Earthquake Input Energy. — Izuru Takewaki; 130(9), 1289-97 (2004).

Tan, K. H.
Interaction Model for Unprotected Concrete Filled Steel Columns Under Standard Fire Conditions. — K. H. Tan and C. Y. Tang; 130(9), 1405-13 (2004).
Interactive Mechanical Model for Shear Strength of Deep Beams. — C. Y. Tang and K. H. Tan; 130(10), 1534-44 (2004).
Fire Resistance of Reinforced Concrete Columns Subjected to 1-, 2-, and 3-Face Heating. — K. H. Tan and Y. Yao; 130(11), 1820-8 (2004).

Tan, Kang-Hai
Influence of Concrete Cover on Fire Resistance of Reinforced Concrete Flexural Members. — Xudong Shi, Teng-Hooi Tan, Kang-Hai Tan, and Zhenhai Guo; 130(8), 1225-32 (2004).

Tan, Teng-Hooi
Influence of Concrete Cover on Fire Resistance of Reinforced Concrete Flexural Members. — Xudong Shi, Teng-Hooi Tan, Kang-Hai Tan, and Zhenhai Guo; 130(8), 1225-32 (2004).

Tang, C. Y.
Interaction Model for Unprotected Concrete Filled Steel Columns Under Standard Fire Conditions. — K. H. Tan and C. Y. Tang; 130(9), 1405-13 (2004).
Interactive Mechanical Model for Shear Strength of Deep Beams. — C. Y. Tang and K. H. Tan; 130(10), 1534-44 (2004).

Tao, X. Y.
Realistic Modeling of Composite and Reinforced Concrete Floor Slabs under Extreme Loading. I: Analytical Method. — B. A. Izzuddin, X. Y. Tao, and A. Y. Elghazouli; 130(12), 1972-84 (2004).

Tao, Zhong
Effects of Sustained Load on Concrete-Filled Hollow Structural Steel Columns. — Lin-Hai Han, Zhong Tao, and Wei Liu; 130(9), 1392-404 (2004).

Teh, Lip H.
Analysis and Design of Double-Sided High-Rise Steel Pallet Rack Frames. — Lip H. Teh, Gregory J. Hancock, and Murray J. Clarke; 130(7), 1011-21 (2004).
Improving the Ductility of Knee Joints between Rectangular Hollow Sections. — Lip H. Teh and Gregory J. Hancock; 130(11), 1790-8 (2004).

Teng, J. G.
Behavior and Modeling of Fiber Reinforced Polymer-Confined Concrete. — J. G. Teng and L. Lam; 130(11), 1713-23 (2004).

Thepmangkorn, Jatupon
Load History Effect on Cyclic Behavior of Reinforced Concrete Tied Columns. — Panitan Lukkunaprasit and Jatupon Thepmangkorn; 130(10), 1629-33 (T) (2004).

Thomsen, John H., IV
Displacement-Based Design of Slender Reinforced Concrete Structural Walls—Experimental Verification. — John H. Thomsen, IV, and John W. Wallace; 130(4), 618-30 (2004).

Tokinoya, Hiroyoshi
Behavior of Concrete-Filled Steel Tube Beam Columns. — Eiichi Inai, Akiyoshi Mukai, Makoto Kai, Hiroyoshi Tokinoya, Toshiyuki Fukumoto, and Koji Mori; 130(2), 189-202 (2004).

Topkaya, Cem
Composite Shear Stud Strength at Early Concrete Ages. — Cem Topkaya, Joseph A. Yura, and Eric B. Williamson; 130(6), 952-60 (2004).

Torres, Ll.
Tension-Stiffening Model for Cracked Flexural Concrete Members. — Ll. Torres, F. López-Almansa, and L. M. Bozzo; 130(8), 1242-51 (2004).

Trahair, N. S.
Steel Member Strength by Inelastic Lateral Buckling. — N. S. Trahair and G. J. Hancock; 130(1), 64-9 (2004).
Biaxial Bending of Steel Angle Section Beams. — N. S. Trahair; 130(4), 554-61 (2004).

Tryland, Tore
Design of I Beams and Deck Profiles under Concentrated Loading. — Tore Tryland, Per K. Larsen, and Magnus Langseth; 130(3), 411-22 (2004).

Tsai, Meng-Hao
Performance of a Seismically Isolated Bridge under Near-Fault Earthquake Ground Motions. — Jerry Shen, Meng-Hao Tsai, Kuo-Chun Chang, and George C. Lee; 130(6), 861-8 (2004).

Tse, Tim
Shear-Mode Rotary Magnetorheological Damper for Small-Scale Structural Control Experiments. — Tim Tse and C. C. Chang; 130(6), 904-11 (2004).

Tsopelas, Panos
Measures of Structural Redundancy in Reinforced Concrete Buildings. I: Redundancy Indices. — Mohamed Husain and Panos Tsopelas; 130(11), 1651-8 (2004).
Measures of Structural Redundancy in Reinforced Concrete Buildings. II: Redundancy Response Modification Factor R_R. — Panos Tsopelas and Mohamed Husain; 130(11), 1659-66 (2004).

Tu, Chin-Te
Experimental Study of Jumbo Size Reduced Beam Section Connections Using High-Strength Steel. — Sheng-Jin Chen and Chin-Te Tu; 130(4), 582-7 (2004).

Tunc, Gokhan
Outrigger Beam–Wall Connections. I: Component Testing and Development of Design Model. — Bahram M. Shahrooz, Jeremy T. Deason, and Gokhan Tunc; 130(2), 253-61 (2004).
Outrigger Beam–Wall Connections. II: Subassembly Testing and Further Modeling Enhancements. — Bahram M. Shahrooz, Gokhan Tunc, and Jeremy T. Deason; 130(2), 262-70 (2004).

Tupper, Bryce
Structural Steel Boundary Elements for Ductile Concrete Walls. — Soon Ho Cho, Bryce Tupper, William D. Cook, and Denis Mitchell; 130(5), 762-8 (2004).

Uchida, Kazuhiro
Finite Element Method Analysis of Hybrid Structural Frames with Reinforced Concrete Columns and Steel Beams. — Hiroshi Noguchi and Kazuhiro Uchida; 130(2), 328-35 (2004).

Uy, Brian
Local Buckling of Steel Plates in Double Skin Composite Panels under Biaxial Compression and Shear. — Qing Quan Liang, Brian Uy, Howard D. Wright, and Mark A. Bradford; 130(3), 443-51 (2004).

Valentine, Daniel P.
Thrust Restraint Design of Concrete Pressure Pipe. — Mehdi S. Zarghamee, Daniel W. Eggers, Rasko P. Ojdrovic, and Daniel P. Valentine; 130(1), 95-107 (2004).

van de Lindt, John W.
Earthquake Duration Effect on Structural Reliability. — John W. van de Lindt and Ginhuat Goh; 130(5), 821-6 (2004).

van Zijl, G. P. A. G.
Masonry Wall Damage by Restraint to Shrinkage. — G. P. A. G. van Zijl, P. A. de Vries, and A. T. Vermeltfoort; 130(7), 1075-86 (2004).

Varma, Amit H.
Seismic Behavior and Design of High-Strength Square Concrete-Filled Steel Tube Beam Columns. — Amit H. Varma, James M. Ricles, Richard Sause, and Le-Wu Lu; 130(2), 169-79 (2004).

Vecchio, F. J.
Experimental and Analytical Reexamination of Classic Concrete Beam Tests. — F. J. Vecchio and W. Shim; 130(3), 460-9 (2004).

Vermeltfoort, A. T.
Masonry Wall Damage by Restraint to Shrinkage. — G. P. A. G. van Zijl, P. A. de Vries, and A. T. Vermeltfoort; 130(7), 1075-86 (2004).

Wahba, John
Compressive Strength of Solid Round Steel Bars. — Khaled Sennah and John Wahba; 130(1), 147-51 (2004).

Wallace, John W.
Displacement-Based Design of Slender Reinforced Concrete Structural Walls—Experimental Verification. — John H. Thomsen, IV, and John W. Wallace; 130(4), 618-30 (2004).

Wang, Y. C.
Postbuckling Behavior of Axially Restrained and Axially Loaded Steel Columns under Fire Conditions. — Y. C. Wang; 130(3), 371-80 (2004).

Warzée, Guy
Discussion of "Exact Finite Element for Nonuniform Torsion of Open Sections" by Magdi Mohareb and Farhood Nowzartash. — Katy Saadé, Bernard Espion, and Guy Warzée; 130(9), 1420 (2004).

Welton, S. S.
Long-Term Effects on Response of Reinforced Concrete Columns to Cyclic Loading. — A. E. Schultz, S. S. Welton, and L. E. Rey; 130(9), 1320-32 (2004).

White, Donald W.
Alternative Approaches for Elastic Analysis and Design of Steel Frames. I: Overview. — Andrea E. Surovek-Maleck and Donald W. White; 130(8), 1186-96 (2004).
Alternative Approaches for Elastic Analysis and Design of Steel Frames. II: Verification Studies. — Andrea E. Surovek-Maleck and Donald W. White; 130(8), 1197-205 (2004).

Whittaker, Andrew S.
Characterization and Modeling of Friction Pendulum Bearings Subjected to Multiple Components of Excitation. — Gilberto Mosqueda, Andrew S. Whittaker, and Gregory L. Fenves; 130(3), 433-42 (2004).

Williamson, Eric B.
Composite Shear Stud Strength at Early Concrete Ages. — Cem Topkaya, Joseph A. Yura, and Eric B. Williamson; 130(6), 952-60 (2004).

Wilson, John Leonard
Experimental Investigation of Unreinforced Brick Masonry Walls in Flexure. — Michael Craig Griffith, Nelson T. K. Lam, John Leonard Wilson, and Kevin Doherty; 130(3), 423-32 (2004).

Wolfe, Ronald W.
Improved Analysis of Timber Rivet Connections. — Douglas C. Stahl, Ronald W. Wolfe, and Marshall Begel; 130(8), 1272-9 (2004).

Wright, Howard D.
Local Buckling of Steel Plates in Double Skin Composite Panels under Biaxial Compression and Shear. — Qing Quan Liang, Brian Uy, Howard D. Wright, and Mark A. Bradford; 130(3), 443-51 (2004).

Xiao, Yan
Experimental Studies on Shear Strength of Steel–Concrete Composite Beams. — Jianguo Nie, Yan Xiao, and Lin Chen; 130(8), 1206-13 (2004).

Xu, Y. L.
Characterizing Nonstationary Wind Speed Using Empirical Mode Decomposition. — Y. L. Xu and J. Chen; 130(6), 912-20 (2004).

Yan, Jintang
Design of Cold-Formed Steel Channel Columns with Complex Edge Stiffeners by Direct Strength Method. — Ben Young and Jintang Yan; 130(11), 1756-63 (2004).

Yang, Demao
Compression Tests of Cold-Reduced High Strength Steel Sections. I: Stub Columns. — Demao Yang and Gregory J. Hancock; 130(11), 1772-81 (2004).
Compression Tests of Cold-Reduced High Strength Steel Sections. II: Long Columns. — Demao Yang, Gregory J. Hancock, and Kim J. R. Rasmussen; 130(11), 1782-9 (2004).
Compression Tests of High Strength Steel Channel Columns with Interaction between Local and Distortional Buckling. — Demao Yang and Gregory J. Hancock; 130(12), 1954-63 (2004).

Yao, Y.
Fire Resistance of Reinforced Concrete Columns Subjected to 1-, 2-, and 3-Face Heating. — K. H. Tan and Y. Yao; 130(11), 1820-8 (2004).

Yoo, C. H.
Closure to "Analysis of Shear Lag Anomaly in Box Girders" by S.C. Lee, C.H. Yoo., and D.Y. Yoon. — S. C. Lee, C. H. Yoo, and D. Y. Yoon; 130(11), 1861-2 (2004).

Yoon, D. Y.
Closure to "Analysis of Shear Lag Anomaly in Box Girders" by S.C. Lee, C.H. Yoo., and D.Y. Yoon. — S. C. Lee, C. H. Yoo, and D. Y. Yoon; 130(11), 1861-2 (2004).

Yoon, Young Soo
Repeated Loading Tests of Concrete Walls Containing Headed Shear Reinforcement. — Young Hoon Kim, Young Soo Yoon, William D. Cook, and Denis Mitchell; 130(8), 1233-41 (2004).

Yoshida, Junji
Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. I: Experimental Study. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1119-32 (2004).
Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. II: Modeling. — Masato Abe, Junji Yoshida, and Yozo Fujino; 130(8), 1133-44 (2004).
Measurement Method for Continua by Image Processing. — Junji Yoshida, Masato Abe, Yozo Fujino, and Lewangamage Chamindalal Sujeewa; 130(8), 1145-56 (2004).

Yoshioka, Kenzo
Inelastic Force-Deformation Response of Joint Shear Panels in Beam-Column Moment Connections to Concrete-Filled Tubes. — Isao Nishiyama, Toshiaki Fujimoto, Toshiyuki Fukumoto, and Kenzo Yoshioka; 130(2), 244-52 (2004).

Yost, Joseph Robert
Strength and Design of Open Web Steel Joists with Crimped-End Web Members. — Joseph Robert Yost, David W. Dinehart, Shawn P. Gross, Joseph J. Pote, and Brian Gargan; 130(5), 715-24 (2004).

Young, Ben
Design of Cold-Formed Steel Channel Columns with Complex Edge Stiffeners by Direct Strength Method. — Ben Young and Jintang Yan; 130(11), 1756-63 (2004).
Tests and Design of Fixed-Ended Cold-Formed Steel Plain Angle Columns. — Ben Young; 130(12), 1931-40 (2004).

Yu, Guangren
Partial Factor Approach to Repetitive-Member System Factors. — David V. Rosowsky and Guangren Yu; 130(11), 1829-41 (2004).

Yura, Joseph A.
Composite Shear Stud Strength at Early Concrete Ages. — Cem Topkaya, Joseph A. Yura, and Eric B. Williamson; 130(6), 952-60 (2004).

Zarghamee, Mehdi S.
Thrust Restraint Design of Concrete Pressure Pipe. — Mehdi S. Zarghamee, Daniel W. Eggers, Rasko P. Ojdrovic, and Daniel P. Valentine; 130(1), 95-107 (2004).

Zhang, Jian
Seismic Response Analysis of a Highway Overcrossing Equipped with Elastomeric Bearings and Fluid Dampers. — Nicos Makris and Jian Zhang; 130(6), 830-45 (2004).
Structural Characterization of Modern Highway Overcrossings—Case Study. — Jian Zhang, Nicos Makris, and Tim Delis; 130(6), 846-60 (2004).

Zhang, Liang
Hurricane Damage Prediction Model for Residential Structures. — Jean-Paul Pinelli, Emil Simiu, Kurt Gurley, Chelakara Subramanian, Liang Zhang, Anne Cope, James J. Filliben, and Shahid Hamid; 130(11), 1685-91 (2004).

Zhao, Qiuhong
Cyclic Behavior of Traditional and Innovative Composite Shear Walls. — Qiuhong Zhao and Abolhassan Astaneh-Asl; 130(2), 271-84 (2004).

Zhao, Tong
Experimental and Analytical Modal Analysis of Steel Arch Bridge. — Wei-Xin Ren, Tong Zhao, and Issam E. Harik; 130(7), 1022-31 (2004).

Zhao, Xiao-Ling
Cyclic Bending Tests to Determine Fully Ductile Section Slenderness Limits for Cold-Formed Circular Hollow Sections. — Mohamed Elchalakani, Xiao-Ling Zhao, and Raphael Grzebieta; 130(7), 1001-10 (2004).

Zhou, Dongliang
Discussion of "Mechanical Behavior of Circular Steel—Concrete Composite Stub Columns" by Mathias Johansson and Kent Gylltoft. — Dongliang Zhou and Jiaru Qian; 130(1), 152-3 (2004).

Zhou, Zhi-Hua
Elastoplastic and Large Deflection Analysis of Steel Frames by One Element per Member. I: One Hinge along Member. — Zhi-Hua Zhou and Siu-Lai Chan; 130(4), 538-44 (2004).
Elastoplastic and Large Deflection Analysis of Steel Frames by One Element per Member. II: Three Hinges along Member. — Siu-Lai Chan and Zhi-Hua Zhou; 130(4), 545-53 (2004).

Zhu, E. C.
Nonlinear Finite Element Modeling of Crack Behavior in Oriented Strand Board Webbed Wood I-Beams with Openings. — Z. W. Guan and E. C. Zhu; 130(10), 1562-9 (2004).

Zimcik, D. G.
Finite Element Analysis Simulation of Airport Approach Lighting Towers. — D. G. Zimcik, M. Nejad Ensan, S. T. Jenq, and M. C. Chao; 130(5), 805-11 (2004).

Zureick, Abdul-Hamid
Probabilistic Based Design of Concentrically Loaded Fiber-Reinforced Polymeric Compression Members. — Maha Alqam, Richard M. Bennett, and Abdul-Hamid Zureick; 130(12), 1914-20 (2004).
